## Situation in Santa Clara Something Terrible.

### Women and Children Dying of Starvation—Government Troops Attacked by Insurgents and All Their Arms and Ammunition Captured—Part of a Convoy Destroyed.

New York, Sept. 10.—Private advices received in this city from Cuba state that the situation in the province of Santa Clara is something terrible. Provisions are scarce and the women and children are dying of starvation. Most of the men have joined the insurgents. Numerous bands of insurgents are reported near San Juan de la Sierra, in Las Villas district. A band of 200 insurgents entered the town of Calmeto, in Las Villas district, on Sunday. A detachment of soldiers and carried off several hundred head of horses.

**Government Troops Routed.**  
A band of Cubans commanded by Bernabe Fernandez attacked a company of troops commanded by a sergeant at the sugar station San Rafael, near Remedios, on August 29, killing the sergeant and nine soldiers, and capturing all their arms and ammunition. Six hundred insurgents commanded by Pedro Diaz and Napoleón attacked the town of Remedios, near Remedios, on August 30. After exchanging a few shots they withdrew.

### Part of a Convoy Sunk.

Mayra Rodriguez, with a large band, is reported advancing towards Sangua Grande and Colon. On Sept. 1 Serranillo Sanchez and band were encamped near the town of Santo Espirito. Jose Barone, a prominent Spanish cavalry captain, died of yellow fever at Santo Espirito. A convoy composed of three tugs, commanded by Gen. Casco, that left Manzanillo on Aug. 28 was attacked by Cubans near El Manzanillo. The tugs were sunk. The Cubans killed two engineers, several firemen and an officer and sunk two schooners. On Aug. 31 the insurgents attacked the town of Campichuela, Santiago de Cuba. After fighting an hour the Cubans commenced to retreat and the troops followed. Then they turned on them, killing forty-six.

Sir Henry Tyler has been in this city for several days in conference with members of the Baldwin firm, and it was decided upon last night to make the experiment, and the party leaves for South America from New York.

**Ligonia, Me., Rolling Mill Employees Demand Higher Wages.**  
Portland, Me., Sept. 10.—Eighteen of the 150 employees at the Portland rolling mills at Ligonia have quit work, their demand for a restoration of the full amount of last year's cut down having been refused. The cut down amounted to 10 per cent. The corporation recently made a 5 per cent. advance. At the company's office it was stated that the absence of the eighteen men from the rolling department would make no particular difference in the running of the works and that if they did not return at once their places would be filled.

## WORK MUST BE PUSHED

### No More Delay in Completing Our Cruisers.

#### Secretary Herbert Says Ship Building at the Navy Yards Has Been Lagging for Years—Contractors Are Also Allowed to Escape from Fines Imposed.

Washington, Sept. 9.—Secretary Herbert last evening stated the published statements that he had ordered working vessels under construction to be expedited were entirely correct. "The ships building in the navy yards have been lagging for years," he said. "For a long time the delay was for want of armor, but armor is now being furnished promptly. The Texas and the Maine, the former of which has just been put in commission, and the latter of which will be in a few days, really ought to have been in service months ago. Officials at navy yards naturally desire to keep a regular force steadily employed, and the disposition is to take work from the ships that are building and the repair work with them, putting them back when the repair work is completed. Not only have the Texas and Maine been delayed by this practice but also the monitors Terror, Monadnock and the Puritan. All these ships ought to be now in commission, and I have ordered that they be pushed to completion. The average of the same reasons which have operated to delay the building of ships at navy yards naturally influence contractors. They are sometimes tempted to neglect government work and use part of the force on the government ships to do outside work as it comes in.

The contracts all provide penalties for failure to complete work in time. Penalties for delay have frequently been imposed upon contractors by the navy department, but, unfortunately, congress has in almost every instance, when it was asked, relieved against these penalties. The effect of such acts is necessarily demoralizing. The department has recently given orders to push all work on navy yard ships and has also been urging the contractors to increased diligence. It is to be hoped that penalties incurred in the future for delay will be allowed to stand.

"There is really nothing about ship building that now renders it difficult in the United States. No good reasons can be given why ships authorized by congress should not be completed with reasonable dispatch, and I am simply insisting on prompt compliance with contract obligations. We have already shown that we can build ships and guns equal to any in the world, and I hope our ship builders, who are now looking for contracts abroad, will demonstrate to the world that ships can be built not only as well but as rapidly in the United States as anywhere in the world. Of course I am pushing along the manufacture of ordnance and everything else at the same time."

### INGERSOLL ON SPOOKS.

**Gives His Reasons for Attending a Spiritualist Camp Meeting.**

Elmwood, Ill., Sept. 9.—Concerning his recent appearance at a spiritualist camp meeting at Onset Bay, Mass., Robert G. Ingersoll yesterday gave the following characteristic interview to a reporter: "The spiritualists are liberal, willing to hear all sides, and so they invited me to speak at their meetings. Of course I gave them my ideas with perfect frankness, and they treated me with perfect fairness. I am not a believer in spiritualism, because I have never had the evidence, the facts, to convince me, but I have no objection to their ideas if they turn out to be true. I believe in intellectual honesty, and I think that most of the spiritualists, in spite of my infidelity, are my friends. In no respect have I changed my belief. I am just as orthodox as ever, and still believe that facts without faith are better than faith without facts."

## OUTLOOK OF BUSINESS.

New York, Sept. 7.—Dun's weekly review of the condition of business will today say: There is no real reaction in business. Gains which were recognized as temporary are vanishing, but there remains a decided increase over last year at date, although prices average 8.8 per cent. lower than a year ago. It needs no keen observer to see that the reaction against rapid advance of prices is strong. Hides were the first to rise, and a decided break has come. Coke was suddenly raised to \$1.40, but has recently sold at \$1.10. Wheat jumped over 20 cents at \$1.10, but is now slow of sale at about 65. Wool was late in rising, but has lost about an eight of a cent in average price within the past fortnight. Iron still rises, the miners' strike having hindered shipments of ore, but with troops guarding, the ore begins to move. Cotton is strong, but has paused. The general tendency to curtail purchases where prices have notably advanced grows clearer in boots and shoes, in wool, and in some products of iron.

In the boot and shoe industry many shops are discharging hands, and in the woolen manufacture a few works are closing for want of orders. Shipments of boots and shoes now fall below last year's or those of 1892, and except in split shoes there are but few orders. Dealers are distinctly slow to buy advanced prices. But holders of western hides who refused 9.24 cents a pound ago are hunting for buyers at 9 cents. Sales of wool which averaged over 10,000,000 lbs. per week when great speculative stocks were being taken, have shrunk to 5,380,500 for the week against 7,557,300 for the same week in 1892. The average for 104 grades is now 14.68 cts. against 14.48 a year ago and 22.81 in 1892. Manufacturers buy slowly because business in all men's goods is dull, particularly in medium and low grades.

The brightest feature in all the horizon is the certainty that the crop of corn will be enormous. Frosts now can only affect a small fraction, and the surplus will go into the manufacture of meats, because at 35.7 cents at New York, near 4 cents below a week ago, there is no other profitable use for corn. The latest reports of wheat threshing induced the best western judges to raise their estimate of yield over 40,000,000 bushels, and with 450,000,000 bushels added to 70,000,000 bushels brought over, the supply will exceed all probable demand. The price has again dropped about 3 cents, and with western receipts of 4,550,104 bushels, against 5,564,210 last year, the western farmer seems again to discover that holding back wheat is a losing business.

The railroads have gained .03 of 1 per cent in earnings over last year for August, the last week doing better, though the tonnage eastbound from Chicago was 7 per cent. smaller for the month than in 1892, and the earnings of all roads were 14.3 per cent. smaller. Hopes of coal settlement still deferred and continuing exports of gold cause uneasiness. The demand for commercial and manufacturing loans and for the abroad, will demonstrate that the money markets are still easy. Failures in four weeks of August showed liabilities of \$8,046,237, of which \$3,844,832 were of manufacturing and \$4,052,385 of trading concerns, against \$10,139,477 last year in all, \$3,173,350 manufacturing and \$5,077,553 trading. Failures for the week ended Sept. 18 in the United States against 219 last year.

## WARNED BY KOORDS

### They Tell Armenians To "Arise and Flee."

#### Obstacles Interposed by the Turkish Government to the Rebuilding of Afflicted People's Ruined Homes in the Valley of Moush—Sufferings Aggravated by Prospective Famine

New York, Sept. 10.—Herant M. Kirechjian, general secretary of the Armenian Relief association, has given out to the press the following, containing a direct communication from the valley of Moush, being an extract from a private letter, not written for publication: "The remnants of the people from the Sassoun region have returned to their villages. They are rebuilding the ruins, but the government is raising obstacles, so that the rebuilding may be retarded. The government has let loose the Bakrantsi Koords over the hills of Sassoun. Our people who have returned to their ruined villages are in terror and dismay.

**Warning from Friendly Koords.**  
"Koords who are friendly with our village have sent us word, saying: 'For the love of God, arise and flee, that you may save your lives. The government has brought the Bakrantsi Koords for the purpose of utterly exterminating what is left of your people.' This has thrown the people into great anguish. Last year they had some arms to defend themselves. This year they have not that means of protection and are in utter extremity of misery. We see no hope of assistance from God or from men."

#### Sufferings Aggravated by Famine.

This will help to explain also the meaning of a dispatch to the London Daily Telegraph to the effect that the horrors of the present famine around the whole region of the massacre are aggravated by the fact that peasants of a portion of the Sassoun district, not having enough land to raise sufficient wheat for their sustenance, were in the habit of purchasing the remainder from Diarbekir in exchange for fruit and other produce they could raise. But now, with hostile Kurdish tribes, that were leaders of the massacre of last year, infesting the country, the Armenians dare not venture out of their villages for fear of being attacked. The friends of the Armenian cause will, we appreciate, feel the value and importance of speedy relief for a peasantry without home or provisions and soon to be exposed to the rigor of the snow storms of a long highland winter.

#### More Turkish Outrages.

London, Sept. 10.—The Daily News today publishes a dispatch from Kars stating that fresh outrages have been perpetrated in the Erzerum district. A band of brigands attacked on Aug. 12 a company of gendarmes, killing a sergeant. Therefore the Turkish authorities, without making any inquiry, decided that the assailants were Armenian revolutionaries from Kemakh, who intended to release exiled Armenians who are still in prison at Kars. A force of one thousand Turkish troops was sent to Kemakh and five villages were pillaged. One thousand persons were rendered homeless. Men were tortured and women and children ravished. Four monasteries were sacked. It is reported that the Turkish minor officials have formed an anti-Christian society to slaughter Christians if the porte accepts the scheme of reforms the powers insist upon.
