A MARVELOUS DISCOVERY

The Latest Wonder Which Hypnotism Has Developed.

Dr. Luys' Wonderful Headpiece—Possible to Remove Emotions from One Person, Store Them Up and Later Transfer Them to Another.

COPYRIGHT, 1895.

It impressed me as a strange coincidence that my pilgrimage in search of the private workshop of the greatest hypnotist in the world should take me to the same part of Paris which I had already searched in gathering photographs of the localities in which "Trilby" that romance of hypnotism, was born.

Dr. Luys is one of the most remarkable men in Paris. Here is a Frenchman, but he is well built enough to be an American, and a mighty fine American at that.

His private workshop is the Charity hospital, of which he is the head—is a part of his home. His study is a little room full of books. That is where he receives his private patients.

Most of the doctor's discoveries have been brought about by his work with two especially good hypnotic subjects named Gabrielle and Esther.

It is difficult to understand wherein science is to any appreciable extent benefited by the cruel practices of some experimenters in its interests.

It is claimed that fully twenty million acres of American land are owned by great land-owners in England and Scotland.

A ROCKLAND (Me.) newspaper announces that "scarlet fever of a benevolent type" is prevalent in that city.

A PITTSBURGH girl of sixteen killed herself a few days ago by eating paris green because her mother had given birth to a baby girl and she wanted a brother.

A WEST VIRGINIA man is so peculiarly affected by riding on a train that he has to chain himself to a seat to prevent his jumping out of the car window.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Miners should wear the "Wear Well" working shoe. It is the best.

which most affairs not commonplace and thoroughly accepted by all the rest of the world first are sent by this distinguished but exasperatingly deliberate group of scientists.

Prof. Luys has found a way of hypnotically administering medicines—that is, he is on the path which he thinks will end in his being able to administer the "influence" of a drug without administering the drug itself.

Dr. Luys more than a year ago found that certain substances, placed in glass tubes, affected hypnotized subjects strangely, even when held at a distance.

son—one of those persons who are naturally happy. He gives it to you as simply as he would give you an ordinary electrical treatment.

The discovery came about in a strange way. I had under treatment a young woman who was in no sense insane, but who was suffering from one species of melancholia.

Finally I had this big horseshoe magnet made. I had no especial plan in so doing, only feeling that magnetism thus applied might be more effective than it had been applied in the other ways which I had tried.

After she had gone I determined to try the effect of the thing. I put it on my head and wore it for half an hour.

Instantly I saw what had occurred. In every way I felt as the young woman had told me that she felt.
