FREELAND TRIBUNE.
PUBLISHED EVERY MONDAY AND THURSDAY.
THOS. A. BUCKLEY, EDITOR AND PROPRIETOR.
OFFICE: MAIN STREET ABOVE CENTRE
SUBSCRIPTION RATES:
One Year \$1.50
Six Months75
Two Months25
Subscribers are requested to observe the figures following the name on the labels of their papers. By reference to these they can ascertain to what date their subscription is paid. For instance: Grover Cleveland 25 June 96 means that Grover is paid up to June 28, 1896. Keep the figures in advance of the present date. Report promptly to this office whenever you do not receive your paper. All arrangements must be paid when paper is discontinued.
FREELAND, NOVEMBER 11, 1895.

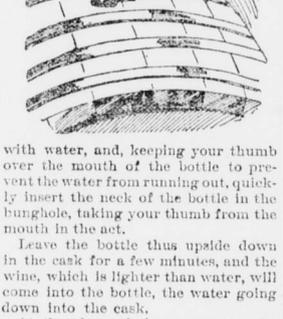

WASHINGTON LETTER.
Washington, November 8, 1895.
Political defeat is a part and portion of the history of every political party and amounts to little when the members of the defeated party have the sense and courage to profit by the lesson which can always be learned from defeat. The lesson of the defeat by which the Democratic party this week lost the states of New York, New Jersey, Maryland and Kentucky, which are naturally Democratic, and allowed the Republicans to pile up abnormal off-year majorities in other states, is so plain that he who runs may read it, and he can run a great deal faster than some of the Democratic candidates did in the states named, too. If the rank and file of the party displays the sense and courage to profit by this lesson the Democratic party has still a good fighting chance to elect the president and a majority of the house next year—there is no chance to regain control of the senate before 1899 or later; if not, its chance for doing either may be considered infinitesimal. Everybody knows the cause of the Democratic defeat this week, as well as that at last year's congressional elections. It is because there are not enough Democrats to win when they are divided into administration and anti-administration Democrats. In 1892 when the party was united it won a great victory, capturing at one time the presidency and the control of both branches of congress. Barring the control of the senate that victory can be duplicated in 1896, provided that the Cleveland Democrats and the anti-Cleveland Democrats can be made to become just plain Democrats, and so stop cutting each other's throats.
President Cleveland has, in accordance with his usual custom, moved from the White House to his suburban residence in order to be able to put more time upon his message to congress than he could possibly do when liable to almost constant interruptions from callers whom he would not care to decline seeing. These he is entirely free from at his suburban residence, as no one goes there to call upon him, unless specially invited. While not stated as a certainty, there are good reasons for the belief that his annual message to congress will not deal with the diplomatic controversy with England over the application of the Monroe doctrine in Venezuela, further that to say that the whole subject will be fully treated in a special message which will follow the annual message and be accompanied by the diplomatic correspondence, the president and every member of his cabinet are well pleased with the present status of this Venezuelan matter, and very confident that they will be still better pleased a little later. A diplomatic victory is preferable to one achieved by the use of powder and ball in some cases, and this is one of the cases.
One of the principal reasons why a united Democracy will stand an excellent chance of winning next year is found in the present condition of the Republican party, which regards its winning next year as such a certainty that its members have already begun to fight for the control of the spoils of victory, and by the time they succeed in nominating a presidential ticket they are likely to be hopelessly split up into fighting factions. If the Democratic party remains as it now is it will be in no condition to take advantage of such a state of affairs. It is only a question of whether Democrats prefer following up personal grudges and "getting even" with Democrats against whom they are held and losing to subordinating their personal feelings for the success of the party and winning.
Hon. Lawrence Gardner, secretary of the Democratic national committee, speaking of the elections said: "I do not think that our defeat means that we have no hope for '96. It was not against the principles of Democracy that the people voted," and ex-Representative Coombs, of N. Y., gave an explanation of the result in his state after saying that he had none to give, by adding: "But we must get together in New York. The way the Democracy is divided there is astonishing." S.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Old newspapers for sale.

ABOUT PARIS GREEN.
The Most Rapid and Effective of Arsenical Insecticides.
It is estimated that more than two thousand tons of Paris green are annually used as an insecticide in the United States, since it is the most rapid and effective of the arsenical preparations used for this purpose. The chief difficulty in using it is the readiness with which it settles to the bottom of the tank of spraying apparatus. This is because it is less finely divided than London purple—a point in which the latter compound has a certain advantage. In Insect Life Dr. C. L. Marlatt explains that there is no reason for this coarseness of grain in Paris green, except that the market has demanded a dark colored article, and the darker color is due to the larger size of the crystals. Paris green would be much more satisfactory as an insecticide if it were reduced to a fine powder, but it would then lose its intensity of color and become whitish, which, in popular estimation, would indicate adulteration. The fact is that the manufacturer who for years controlled the market did so because he had discovered a method of crystallizing the product in unusually large particles, which were, therefore, very deeply colored. Of course, it was less valuable in this form, and yet the dark green large-sized crystals were more difficult to manufacture and more expensive, and the country went on using this for years, although a more effective poison could have been used for less money. In testing Paris green when reduced to fine powder, Dr. Marlatt found that it remained in suspension three times as long as the ordinary product did, while, undoubtedly, the fineness in division made it more effective against insects. The last step in the process of manufacturing Paris green is the combination with acetic acid. When, however, this acid is omitted, an impalpable powder, instead of a crystalline product, is secured, and this will remain in suspension almost perfectly for many hours. Experiments are now in progress to ascertain whether this can be used as a substitute for Paris green, to which it is so superior in fineness, while it costs only half as much.

THE MAGIC BOTTLE.
It May Be Filled with Wine from the Bung-hole of a Cask.
This is a very neat illustration of the law of gravity. It is necessary to the successful making of the experiment that the cask be entirely full of wine. To transfer a part of the wine to the bottle, entirely fill the latter

with water, and keeping your thumb over the mouth of the bottle to prevent the water from running out, quickly insert the neck of the bottle in the bung-hole, taking your thumb from the mouth in the act.
Leave the bottle thus upside down in the cask for a few minutes, and the wine, which is lighter than water, will come into the bottle, the water going down into the cask.
At the close of the experiment the bottle will contain unmixed wine, the water all having given place to it.

INSECTS AND CONTAGION.
The Damage That Can Be Done Even by a Gnat's Sting.
It is generally understood that the stings of some insects are essentially poisonous in a greater or less degree and must therefore be early and carefully treated, says the Lancet.
Pain alone in such cases will suffice for a danger signal, and few when thus warned would care to neglect the puncture made by a hornet, a wasp, or even a bee. The fact that other insects, like some species of fly, are capable of equal or even greater mischief is not so commonly known as it ought to be. The recent death of a woman at Kingston from septic erysipelas thus caused may be quoted in illustration. In accounting for such occurrences two points are especially noteworthy—namely, the condition of health of the person attacked and the previous habits of the assailant.
In no case probably is it possible to define exactly the influence exercised by each of these contributing factors. This much we know, however, that no matter how trivial or how great the effect of the conveyed poison it is much enhanced by all conditions of weakness or blood impurity existing in the sufferer. A mere middle or gnat bite in one person will prove almost as serious in its effect as a septic wound in another. There are in the system all the materials for a conflagration and a spark may light it up as well as a fire-brand. The habits of insects afford a clew to the seeming vagary of their occasional and accidental violence.
The sting of the mandibles, which perhaps are buried a hour previously in some putrid sore, excreta or offal, cannot penetrate a living tissue without leaving in it something of the same putrid character. It is safer, therefore, for the medical practitioner to regard each and every injury of this kind, however slight, as a possible source of illness and at once to contrive its relief by promptly anti-septic compresses or the means.

ARE YOU THINKING?
Of course you are, about something or another. But if it is about Jewelry, Watches or Clocks we want to help you. We can give you valuable pointers on purchasing and tell you truthfully of the quality of Things In Our Line.

This is a Clock which was sketched at random from our stock of beautiful and accurate time pieces which we carry all the year.
It is pretty, isn't it? But we are not content with it alone. We can surpass it by a hundred prettier designs, easy to reach!

IF YOU ARE desirous of getting the best value in a Diamond Ring or a Gold Watch either to keep or to give away, call and see what we have to show you.

THE KELLMER PIANOS
FACTORY: CHESTNUT STREET, BETWEEN CHURCH AND LAUREL, HAZLETON.
Are the only HIGH GRADE and strictly first class pianos sold direct from the factory to the final buyer.
Are the only pianos on which you can save the dealers' profits and enormous expenses, agents' salaries and music teachers' commissions.
Are the only pianos every agent condemns, for the natural reason that NO AGENTS are employed by us.
Are the only pianos which are not sold in a single store in the United States, because we closed all our agencies over a year ago, and now sell only to the final buyer, at the actual cost of production at our factory. We have no store on Broad street, but the factory warehouse is open every day till 6 p. m., and Saturday evenings from 7 to 10.
