A Bon Mot of W. S. Gibbert,
the author dropped into the operat
of a parvenue friend one evening
ten "The Magic Flute" was on the
s. After asking him who wrote the
sic, the woman said: "Mozart? Mot? Never heard of him before. He's
mense! Why isn't he here? Why
t he doing something else? Why
t he composing?"
Because he's decomposing, my dear
y," answered Gibert.

This is a good year for the stock of files and a continue until the breeding period begins.—Rural begins to feel and prolitable of others to our own. The Northwestern Agriculturis on this subject very correctly says that measuring is a very crude, mastifactory method of estimation to the turns of the sake of the large transportation to the turn weight will naswer all purposes. Then, by taking into consideration that him, not thay will pack more closely than a coarser, stiffer quality, that when a testimate of the quantity in a load or of the restimate of the quantity, that when a steeled will need the rest of the proposal to the transport of the pig. It has been should be at the lowest state of fleek in ow, and should be at the lowest state of fleek in ow, and should begin to fatthe and so continue until the breeding period begins.—Rural Life.

MIRASCRING IAV IN THE STACK.

We are often asked how to measure hay, and waile we have had some experience, we prefer to adopt that of others to our own. The Northwestern Agriculturis on this subject very correctly says that measuring is a very crude, mustifactory method of estimating the weight of hay. There are times, however, when it is impracticable to use the scales, and a close approximation to the true weight will naw water in each feed. Regular attention to the true weight will naw water in each feed. Regular attention to the true weight will naw star in each feed. Regular attention to the true weight will naw star in each feed. Regular attention to the true weight will naw star in each feed to the scale of the concept of the concept of the scale of the concept of the scale of the

rifle was found lying on a rack on a wall of the room in which the killing occurred, and the bullet fitted the tube.

Avery was arrested for the crime, as he was the only living close relative to Ensley, and by his death profited to the amount of about \$100,000.

Avery was tried, pleaded not gatlly, but was convicted of marder in the first degree and sentenced to be hanged. He appealed to the Supreme Court, and engaged Mr. Wallis to defend him. The Supreme Court remanded the case back to the Circuit Court on technical errors. Two mistrials were brought about, and then came the strangest part of the story. The brilliant Wallis struck the keynote to the mystery. In August, 1891, he had the rifle loaded and hung on the wall. A white sheet, with the form of a man marked on it, was placed in exactly the position occupied by Avery when lying asleep, and a heavy cut glass pitcher of water like the one found in the room was placed on the shelf above. The temperature was ninety degrees in the shade, one of the hottest days of the year.

The pitcher acted as a sun glass and the hot rays of the sun shining through the water were refracted directly on the cartridge chamber of the rifle.

Eight witnesses were in the room, and a tew minutes after 3 o'clock a puff and a report occurred and the ball struck the outlined form back of the ear, in the exact location where Ensley was shot, and the theory of circumstantial evidence went to pieces.

freumstantial evidence went to pieces. The incident being witnessed ausworn to, readily explained itself the jury.
