The New Year Outlook.

The business of the country has become so dependent upon politics, especially the manufacturing and importing interests, that there is again a lull in its activities, wait ing to see what changes may take place in tariff and other laws bearing upon such important branches of trade. As Congress cannot mature such changes much before the last of summer, the outlook is somewhat discouraging. But at the same time the other consists of the control o

Japan's Great Cathedral.

When foreign architects visit Japan and see the Cathedral of Buddhism for the first time they are generally astonished at the magnificent structure. It is executed in pure Oriental style, and is richly ornamented with carvings. H. Ho, a famous builder, of Nagova City, designed it. The structure was commenced in 1878, and was completed this year. The cost has been sitimated at \$17,000,000. It would have greatly exceeded this amount had not numbers of Buddhists worked without any recompense.

As the structure neared completion the committee having the work in charge was much perplexed as to fire insurance. They found that no company would assume the risk on such a valuable wooden structure, the danger of destruction by fire being very great, and thus the premiums would amount to an enormous sum of money. At last the committee decided on a design devised by Dr. Tanabe. Numbers of powerful foundations were constructed, both exterior and interior, which can be made to play on all parts of the structure at the same time.

Usually only one great ornamental fountain is playing, rising to the great highly of 157 feet. This is probably the largest artificial fountain in existence, emitting \$2,080 gallons per hour. In case of fire all the water pressure is directed through the numbers of exterior and interior fountains, thus every part of the structure, both inside and out, could soon be drenched, and any condagration soon extinguished.

A worthy couple who have come within a fortnight from the North of Ireland were fortunate enough to form the acquaintance of some kindly Americans who occupied the apartment directly under them, and tried their best to make the strangers feel at home amid their new surroundings. On Saturday they sent them a few of our native delicacles for their Sunday dinerently under them, and tried their best to make the strangers feel at home amid their new surroundings. On Saturday they sent them a few of our native delicacles for their Sunday dinercinals wife. "In hope you

and—"
"Hard to digest!" exclaimed the American. "Why, they're perfectly digestible. It must have been something else—"

else—"
"How did you eat them?" put in his
wife, a new light breaking upon her
face.
"Oh, with sugar and cream," replied
the Irish gentleman placidly.—New

York Journal.

As to the Great Dane.

When Prince Bismarck lost his favorite Great Dane, Reichshund, the young German Emperor gave him another, and the news was cabled all over the world. Until then very few except those born in the Fatherland were aware that the dog was indigenous to that country. Credit is undoubtedly due to the Germans and Danes for the preservation of these dogs, and for bringing them to such a high degree of domestication. There is reason to believe that these descendants of the dogs used for hunting the wild boar by German noblemen are of the family of "dogs of war" of the ancients, which were clad in armor and fought side by side with soldiers. At the siege of Corinth fifty of these terrible dogs were stationed at an important outpost, and on the enemy's landing they attacking and fought until only one was left alive. He fled and woke the drunken garrison, and saved the city.

Bitten by a Wasp.

Bitten by a Wasp.

George Holbrook's 3-year-old child while playing near the home of its parents in Letcher County, Missouri, was stung by a yellow Jacket. The little one screamed and its mother ran to its assistance. The sting had entered its left leg below the knee. The limb began to swell rapidly, the child went in to spasms, and in ten minutes after the insect had stung it the little one died.

on the theme they had been discussing.

"There are, after all," she said, "few men who are not commonplace," "No man is always commonplace," he replied, gravely. "There are times in the life of even the most ordinary man when he is unusual. Those things depend too much on environment to generalize about them."

She gave him a surprised glance, which he did not notice, for they were close to the beach now and his eyes were on the sea.

"Would you think me very commonplace if I were to tell you that it will be most unwise for us to row round the island to-day?"

"Yes, I should," she answered, tersely.

He frowned impatiently.

"I should not have asked you to go. Look at that sky and wind; it is going to storm frightfully in about half an hour."

"I shall like that," said Greta, reck-

comes to stay

There is more than one food which will cause the body to increase in weight. A free supply of sugar will do this; so will the starchy foods; cream, and some other fats. But to become fleshy, and yet remain in poor health, is not what you want. Cod-liver oil increases the weight because it is a fat-producing food. But it is a fat-producing food. But it does far more than this. It alters, or changes, the pro-cesses of nutrition, restoring the normal functions of the various organs and tissues.

Scotts Emulsion

of Cod-liver Oil, with hypophosphites, is pure cod-liver in a digested condition. So that, when a person gains in weight from taking Scott's Emulsion, it is because of two things: First, the oil has acted as a fat-producing food; and, second, it has restored to the body a healthy condition. Such an improvement is permanent: it comes to stay.

Mr. E. M. Cross, a special Associated Press reporter, who lives at 1916 Maple Avenue, Huntington, W. Yu, has knowledge of the remarkable cure of Mrs. Martha Gilktson, the wife of a carpenter of the east end of the city, who, on the 22d of September, 1895, related her experience as follows: "For a good many years! have been bothered an awful sight with my stomach. I got so I couldn't eat anything at all without souring on my stomach. Lots of times while working I would spit up great mouthfuls of stuff bitter as gall. I kept getting worse all the time and took piles of doctor medicine, but I might as well took that rauch starch for all the good it done me. It run into neuralgia of the stomach and worked itself all over me. Dr. Gardener, the new doctor up on Twentieth Street, told me when I saw him it was my stomach that caused all the trouble and give me an order to the drug store. I took it there, and the boy give me a hox of Ripans Tubules. began getting better, and have used a little overtwo boxes, and am now sound and well. (Signed), MARTHA GILLINGON, NO. 1820 Fourth Avenue, Huntington, W. Va."

also partly accounted for by the prevalence of westerly winds.

Sarsaparilla Sense.

Any sarsaparilla is sarsaparilla. True. So any tea is tea. So any flour is flour. But grades differ. You want the best. It's so with sarsaparilla. There are grades. You want the best. If you understood sarsaparilla as well as you do tea and flour it would be easy to determine. But you don't. How should you?

When you are going to buy a commodity whose value you don't know, you pick out an old established house to trade with, and trust their experience and reputation. Do so when buying sarsaparilla.

Ayer's Sarsaparilla has been on the market fifty years. Your grandfather used Ayer's. It is a reputable medicine. There are many sarsaparillas.

But only one Ayer's. IT CURES. will be nothing to hope for."

For a moment she did not answer. Perhaps she was thinking of Clinton, for her eyes grow tender. Then she threw off her hat and said:

"I think you are right. If it means life or death, I must do my best to make the swim easier; my shoes—and—and—"

A faint color crept into her white face.

"Yes," said Greyford, gontly. "It will be hard battle—and we must both of us do without our useless clothes."

He pulled in the other or and turned his back to her to remove his own shoes and coat. One moment Greta hesitated; then her shoes came off and the long outer skirt. She gave a little gasp and another look at the water to be gone through; then she loosened the full blons of her gown, removing its girdle and what other impediments to her free movement that she could. She wrapped her clothes into a bundle swittly and gave a few deft touches to her costume—a white skirt and a green and white shouse.

"I am ready," she murmured.

With ready test he did not answer.

Born in the Tower of London, Inches on gone of the Old World, and a highly response of the Old World, and she was born in the Tower of London, England—" (Parker, Major James Fallerton, was in father, Major James Fallerton, was in own shoes and coat.
