

Feed Hood's Sarsaparilla

Your nerves upon rich, red blood and you will not be nervous. Blood is made rich and pure by Hood's Sarsaparilla.

The One True Blood Purifier. All drug stores. 21c.
Hood's Pills are always reliable. 25 cents

Harold is Annoyed.
Harold Frederic is much annoyed by the betrayal of his identity with "George Forth," under which name he published his clever book, "March Hares." The book has already established itself as a favorite in London. Mr. Frederic resorted to anonymity in this case because he did not want to interfere with the sale of his more ambitious book, the novel "Illumination."

Society Women Who Collect Fans.
One of the fans which Mrs. Almeric Paget inherited from her mother, Mrs. Whitney, has gold and ivory sticks, a lac mount, and is valued at the trifling sum of \$1,000. Among enthusiastic collectors of fans are Mrs. Sloane, Mrs. Whitelaw Reid, Mrs. Cornelius Vanderbilt and Mrs. Seward Webb, who own fortunes in these fluttering baubles.

WOMEN WANT TO KNOW.

TO WHOM CAN THEY TELL THEIR TROUBLES?

A Woman Answers "To Me"—Anxious Inquirers Intelligently Answered—Thousands of Grateful Letters.

Women regard it as a blessing that they can talk to a woman who fully understands their every ailment, and thus avoid the examinations, experiments, and theories of incompetent physicians, whose sex deprives them of knowing by experience. The endless confidence placed in Mrs. Pinkham by American women, prompts them to seek her advice constantly. Female diseases yield to Lydia E. Pinkham's Vegetable Compound at once. Inflammation, ulceration, falling and displacement of the womb, ovarian troubles, spinal weakness and kidney complaints, all have their symptoms, and should be "nipped in the bud." Bearing-down pains, backache, headache, nervousness, pains in groins, lassitude, whites, irregularities, dread of impending evil, blues, sleeplessness, faintness, etc.

Here is testimony right to the point: "The doctors told me that unless I went to the hospital and had an operation performed, I could not live. I had falling, enlargement and ulceration of the womb."
"I was in constant misery all the time; my back ached; I was always tired. It was impossible for me to walk far or stand long at a time. I was surely a wreck. I decided that I would give your Compound and Sanative Wash a trial."
"I took three bottles of Lydia E. Pinkham's Vegetable Compound, and used two packages of Sanative Wash, and I am now almost well. I am stouter and healthier than I have ever been in my life. My friends and neighbors and the doctors are surprised at my rapid improvement. I have told them all what I have been taking."
—Mrs. ANNETTA BICKMEIER, Bellaire, Belmont Co., O.

Why pay the same price for the inferior "just as good" when you can get

NEWS AND NOTES FOR WOMEN.

WOMAN IN OFFICE IN LONDON.
A young woman has been appointed as registrar of births, marriages and deaths by the guardians of the City of London. Miss Kemm, the lady in question, has for some time acted as assistant to her father.

WORKING HER WAY.
Miss Clara Howard is working her way through the University of California by selling newspapers. "I believe in work," she says. "I think that any woman does not need to allow any pecuniary obstacles to interfere with it. She can always reach an intellectual object through manual labor. It is a means to an end, and, besides, it is conducive to clearness of thought. I believe, also, in simplifying physical wants for the sake of intellectual gratification, and the demands of the understanding constitute the imperative." She says that she intends to become a philosopher; but she would appear to be a pretty good one already.

WINNING ALL HEARTS.
The young Duchess of Marlborough has made, it is understood, an extremely agreeable impression in England. It is mentioned there that she is rapidly gaining the affections of her English relatives and connections, and the people about Blenheim are delighted with her. One enthusiast writes: "Were we asked what was the most striking of the sights we saw at this great palace, with its grand and surroundings, we should answer a large painting, a portrait in the first room we entered. The fair face upon the canvas was that of the present Duchess of Marlborough. The benevolent eyes are almost black, and so expressive. In spite of all the other beauties of Blenheim, they seemed ever the fairest sight; sweetly they linger in memory, inspire the soul, and are a moving influence for good. Because this young Duchess has come as a bride, crossed the blue Atlantic, some think she is a stranger to our land; but this is a mistake. When a tiny child of three she came to England and has voyaged the ocean so often since that the flying Hollander, with its phantom vessel and his phantom crew, is not more familiar with the perils of the sea. It is pleasant to notice at Blenheim how every one loves her Grace. Marlborough did not conquer his enemies as she has conquered the hearts of her people."

Another English observer, in commenting on the successful dinner parties lately given by the Duke and Duchess at their London house, says concerning the young lady that she "is quiet, natural and very sweet in disposition. She is not exactly pretty, but she has a sweet and charming face, a clear, rather pale complexion, and dark hair, and deep, clear blue eyes, which often look quite dark. She is very tall and slight and carries herself erect and gracefully. Her voice is pretty, and altogether her Grace is really a great social acquisition."

MILADY IS MILKING COWS.
Society's latest fad, if we may believe report, says milady is milking cows for amusement and charity. At a certain fashionable country seat the hostess, who is much interested in parish work, invented, or rather inaugurated, this fad for charitable purposes, with the result that society has taken it up, and for the moment the Holsteins and other breeds of cattle are wondering what on earth is the matter. Bazaars may not be considered for the church, but to see dainty daughters of society in picturesque costume or evening dress sitting on the lawn milking a gentle eyed cow is so great a novelty every man for miles around will come and buy a glass of milk for sweet charity's sake, thereby swelling the receipts for milady's pet work. What the cows think of it cannot be recorded. Their expression would lead one to suppose they feel highly honored. Milady's tapering fingers and deft manipulation of their udders does not lead them to suppose she is not an expert, for can it be said she is not. As soon as milady is interested, languid and indolent as she may seem, whatever is a fad with her will quickly be learned. It was with some trepidation, however, that the milking of cows began. Every time the cow looked around or switched her tail milady grew frightened and expected the pail to be kicked over. On one or two occasions this did happen, to the great amusement of the persons who stood around. We shall hear of innumerable ism fetes, where the principal feature will be the milking of cows by society women this summer, and many a flirtation, carried on over the milk pail, will later on terminate in an engagement in the conservatory. There is nothing more bewitching than two rounded arms, bared to the elbow, two roguish eyes glancing up at you, a sensitive mouth smiling at you, and then you are lost—it may be milk you are drinking at \$5 a glass, but you don't care. Milady sometimes wears a milking costume of Dresden shepherdess design, and then she is like a picture. Two or three girls whose houses are adjoining had the cows brought up near the veranda, and while milking them kept up a fire of conversation about the current events in society.

GOSHIP.
The whole of Princess Maud's trousseau was made in England. Twenty-six Kansas women have banded together to write a novel. At the present time the Princess of Wales's holding of pearls cannot be worth less than \$50,000. Forty Carthage (Mo.) girls have started a local fad by having a breakfast picnic and wading party. Princess Helene, the Duchess of Sparta's baby, is Queen Victoria's twenty-second great-grandchild. A bride in Montreal appeared at the altar with her pet canary fastened to her shoulder by a golden chain. During the marriage ceremony the bird broke into song.

"Do not belong to any woman's club or organization," says Ella Wheeler Wilcox, "with the single exception of the Daughters of the American Revolution." Paris dressmakers have declared themselves in favor of the proportions of the Venus de Milo, and health and beauty of the artistic kind are prophecied as the result of the movement. The eyeglass threatens to come into fashion among a section of very smart and up-to-date London ladies. In Bond street you may see three or four ladies who use a single glass with skill and ease. Dr. Sarah I. Shney, who has just been elected President of the Board of Health of Oakland, Cal., is the first woman to receive such an honor in that commonwealth. The office was given to her without the least solicitation on her part. Queen Wilhelmina of Holland has a miniature farm, the produce of which she gives to the poor and to the hospitals. Her Swiss chalet is stocked with the accumulated toys of twelve years or more and here she learned to "keep house" in the most approved Dutch style. Mr. Victoria Woodhull Martin, an American who now edits a London journal, says that the cause of woman suffrage in America is virtually won. Professor Goldwin Smith says the cause is dead in this country. This seems a case where great minds run in different grooves. Ex-Queen Emma of Samoa is now in Berlin on a visit to the exhibition, accompanied by her husband, who was formally an officer in the German Army. They are said to be an ideally happy couple. Her ex-Majesty has dropped her queenly title and travels as a simple German frau. New Yorkers may be surprised to read in the London Sketch that the latest new thing in Gotham is a lady's bicycle hat, of Tyrolean shape, in straw or light felt, but surmounted by a white quill "rising from a miniature bicycle wheel, with a rubber tire and natural-looking spokes."

The good old fashion of home weaving threatens to become a fad since the Princess of Wales and her daughters have turned their attention that way. Woolen homespun, cotton and silks are not only more durable, but more satisfactory from an esthetic point of view, when handwoven. The Rev. Dr. J. F. Clymer, of the State Street M. E. Church, Troy, N. Y., in a recent sermon on the bicycle, characterized the wheel as "a mechanical embodiment of the principles of Christianity" and a "nineteenth century sign of the emancipation of woman from bondage of sex." A memorial has been addressed to the Vice-Chancellor of Cambridge University bearing the name of 139 members of the Senate who favor the conferring of some title which does not imply membership of the university upon women who, having satisfied the requirements of the university, have already passed or shall hereafter pass a tripos examination.

FASHION NOTES.
Pale blue has the preference above all other colors on warm days. Bicycle gloves open in the back, thus avoiding any pressure on the palm. The fashion for ladies' sleeve links gives enterprising jewelers scope for many new designs. Silver candlesticks are quite the rage, and those in colonial pattern continue to please. Belts of white kids, jeweled with turquoise, give instance of the expense lavished on this accessory to summer dress. Wash your white veil in warm water with good soap, pin to the pillow until dry and you will have saved fifty cents. If you have a last year's summer wash-silk gown cover it with organdy and you have the latest idea in costume. Fall will usher in a velvet season. Velvet frocks, velvet coat and velvet skirts will be worn by all who can possibly afford them.

SCIENTIFIC AND INDUSTRIAL.

Experiments made at Paris by Dr. Bertillon have proved that kleptomania is easily cured by hypnotic suggestion. A prize of \$20 is hereafter to be offered semi-annually to the surgical intern of the Boston City Hospital "who administers ether in the most skillful and humane manner." Various nostrums are proposed for the extermination of the army worm, but the majority of them seem to have the knack of destroying the plants themselves, root and branch. Superintendent D. W. Crafts, of the gas company of Northampton, Mass., has found by experiment that a refuse from the gas works known as "spent lime" is very effective in exterminating the army worm and similar pests. According to a Singapore paper sixty per cent. of the cholera patients taken to the pumper hospital have been cured by hypodermic injections of strychnine, while fifty per cent. were saved in the general hospital by other treatment.

The newest thing in the way of aeroplanes is the proposal of Professor W. W. McEwan, of Jackson, Md., to ascend to a height of two miles by means of a rocket. This is not a suicide scheme, as the professor will provide a parachute to assist his descent. Egyptologists are engaged in considering a scheme, presumably emanating from the Egyptian Government, for the preparation of a comprehensive and descriptive catalogue of antiquities of Egypt in the possession of all the public museums and private collections throughout the world.

A case of complete and immediate relief from the effects of ivy poisoning is reported in the Medical World by Dr. W. L. Shanks. His patient was swollen from head to foot, but in an hour after bathing in a solution of sodium hyposulphite was attending to business as if nothing had happened. It is said that an Ohio driver has an ingenious electric contrivance for shooting speed into a tired horse. It is claimed that this battery was used for the first time in turf history at the recent Akron (Ohio) meeting. There has been some talk about it and some protests against its use on the ground of cruelty.

The Evolution of a Tornado.
Usually it is in the afternoon, between the hours of two and five, after a warm and moist day, that the ominous tornado clouds begin to form. For two hours before the breaking of the storm the sky may have the peculiar appearance given it by the ball like masses of vapor, or there may be a warning of only half an hour before the clouds become suddenly stirred to violent agitation. A vast commotion is taking place on high; there seems to be a panic among the clouds. Like great monsters black masses advance heavily but rapidly, sending out dire threats and warnings in jagged lightning flashes. Fleecy clouds beneath them race madly along and twist and whirl and scurry this way and that, as if terrified and uncertain where to flee. The light grows less and less until houses are dark and men running for shelter seem like black phantoms. Everything is very quiet; the leaves on the trees are stirring slightly and tremulously, in strange contrast to the vast movement and excitement overhead. There have been a thousand rapid changes among the hurrying clouds; now a supreme one comes. Off in the southwest, near the horizon, the clouds seem to rush together and drop from the sky in a black mass that sends out a great streamer to the ground. Hailstones and great drops of rain begin to fall, and with flashes of lightning and a grinding roar the thing comes rushing on. Tall trees in its path shoot suddenly upward; homes collapse, and their roofs and furniture soar aloft until this demon cloud becomes laden with impediments. But it quickly tires of these toys of its fury; it hurls them violently aside and comes tearing on as it wild with insatiable rage and a desire for greater victims. Huge buildings of stone burst as if undermined with dynamite when it reaches them. The water in rivers mounts in a monster wave, and stanch vessels are left capsized and foundering. The tornado's duration at a given point rarely lasts over ten minutes, and frequently not over two or three; at the end of this brief period it has gone raging and roaring on. But they have been long and eventful moments.—Demorest's Magazine.

An Educated Horse.
There is a horse in Philadelphia whose business is to draw a collection wagon over a postoffice route in the middle of the city which knows the location of letter boxes as well as its driver, the postman. There are a number of these boxes near together on Broad street, just below Chestnut—too near together for the postman to bother about driving from one to the other. He is saved all trouble of leading his horse, however, by the intelligence of that animal, which as soon as the postman alights at the first box walks off to the second and patiently waits there for his master.

One Melodious Goose.
Henry Giles, farmer of Lytham, England, is the owner of a black Egyptian goose which has a voice like an emerald bird. Every evening, at dusk the goose twitter and trill most beautifully.

AN HISTORIC STEAMER.

It Has Had a Remarkable Career on the Hudson River.
The steamer Drew left Albany on her last trip Saturday night, amid the shrieking of tugs and steamers. If the noisy demonstration was not so great as that which heralded its first arrival it is because not so many vessels ply the waters of the Hudson at Albany as there did thirty years ago. Then the river front of Albany was lively and bustling. Now but for the tugs of the Roman line, the New York and Newburg boats, and the few steamers that carry freight and passengers to nearby points, the waters of the river would be unpeopled by passing craft. It is the day of the railroad, but, while wind and water hold, the pleasure and profit of marine adventure will never lose their charm. And so, though we speed the departing Drew, the coming Adirondack is cordially welcomed. If at the end of the first quarter of the twentieth century the boat which comes so gay in bunting and gleaming paint, so endowed with all that makes marine architecture of this time wonderful and complete—if we say, this boat, then grown old and out of date, is retired with a record as honorable as that which the Drew takes with it in retirement, its owners will have reason to congratulate themselves. For the Drew's history is one of great distinction and honor.

This notable steamer has been commanded by Stephen J. Roe, now transferred to the Adirondack, from the day it went into commission. If its saloons and cabins could talk what a history they would tell; for, in its time, the Drew carried as passengers nearly every person of prominence on this side of the Atlantic, and travelers from the old world were bound to have one trip on the Hudson River night boats, the fame of which had penetrated wherever travelers go.

There was nothing like them in the world—certainly nothing in Europe—when they were first introduced for space of accommodation, for appointments, and for general comfort. The boats on the Rhine were small when compared with them, while the channel packets produced hideous nightmarish contrasts with the luxury of travel on the Hudson. Not even the boats on the Mississippi, when travel on that river was at its height, were to be mentioned in the same breath. The Hudson River steamers confessedly led all lines of inland travel until Colonel James Fisk, Jr., took charge of the Fall River line of steamers. That marked the beginning of another era in American steamboating, and now the Sound boats in many respects are unapproachable. But the officers of the People's line are resolved that the glory of steamboating on the Hudson shall not be permitted to decline.—Albany Journal.

Stars and Distances.
In all the heavens, with the exception of passing meteors or meteorites, not one body occupies a position closer to earth than the moon, which is some 240,000 miles away. Very far, of course, side by side with any earthly distances, but a mere fraction still by side with other astronomical distances. Next to the moon, our nearest occasional neighbor is Venus, and then Mars. Both Venus and Mars, however, are often further away from us than the sun, which remains always at somewhere about the same distance, roughly at 90,000,000 to 93,000,000 miles. This dividing space between sun and earth is of great importance in thinking about the stars, and it should be clearly impressed upon the mind. Next to the sun in point of nearness come the more distant planets—Jupiter, which is about five times as far from the sun as our earth is; Saturn, nearly twice as far as Jupiter; Uranus, nearly twice as far as Saturn; and Neptune, nearly three times as far as Saturn. All these planets belong to our sun, all are members of his family, all are part of the solar system as a whole, consisting of the sun and his planets, including the earth, may be fairly well grasped by any one taking the trouble to master two simple facts. They are these: That our earth is roughly about 92,000,000 miles away from the sun, and that Neptune, the outermost planet of the solar system, is nearly thirty times as far distant from the sun as our earth is.—Chambers' Journal.

A man does a fierce job of loving while he is at it, but it doesn't last longer than ice cream in front of a boy. Do men who have cork legs go to bed with them on?

Just a line
to tell you that if you want to do your washing easily, in the "up to date" way, the Sunlight way, without rubbing your clothes all to pieces (and your hands too) you must use **Sunlight Soap**. Cleanses clothes and most everything else with less labor and greater comfort. Lever Bros., Ltd., Hudson & Harrison Sts., N. Y.

EVERY FARMER IN THE NORTH CAN MAKE MORE MONEY IN THE MIDDLE SOUTH.
It can make twice as much. It can sell its Northern farm and get twice as many acres for his money down here. We will improve farms for \$300 an acre. Plenty of railroad land of them. No droughts. Neither too hot nor too cold—climate just right. Northern farmers are coming every year. If you are a farmer, or have a farm, or want to know the questions you want to know, please write to us to answer them.
SOUTHERN HOMESITE & LAND COMPANY, Somerville, Tenn.

You Will Realize that "They Live Well Who Live Cleanly," if You Use SAPOLIO

IF SILVER WINS and if farm produce, labor and labor products double in price, then metals must also double in price, as they are 99% labor. If labor doubles in cost and the price of the mine doubles in cost, the price of the mine doubles in cost. A general rule to cover future needs, while it buys so much, may quickly exhaust our resources and compel the nation to give up the gold standard. If you buy now, you are assured and advance avoided. **IF YOU BUY NOW**

Ornamental Swallows.

A flight of swallows made of the most glittering brilliants is one of the newest ornaments with which the summer matron delights to adorn herself. Each of the five jeweled birds can be separated and worn either as a brooch or as an ornament for the hair. To those who find the swallow too modest a device the robin redbreast is a fashionable substitute. The robin is mounted on a branch of leaves and berries, and has gay, jeweled wings and a breast of enameled iridescent red. A conceit that is more odd than beautiful takes the form of a white rabbit, his body all pearly, his pink eyes of the balala ruby, and his long ears are pearls with suggestions of pink about their tips. Often, by way of further elaboration, the little rabbit is mounted upon his hind legs upon a gold bar, and is gazing upon a butterfly glistening with golden beryls and purple amethysts.

Britain's Railway Clearing-House.
The railway clearing-house is one of the largest offices in Britain. It has a staff of 1,000 clerks and 450 out-of-door officers. "Penny wise and pound foolish" are those who think it economy to use cheap soda and rosin soap, instead of the good old Bobbin's Electric Soap; for sale by all grocers since 1860. Try it once. Be sure, buy genuine.

The Microscopical Association at a meeting in Pittsburgh upheld and endorsed the practice of vivisection. LUCAS COUNTY, Pa. FRANK J. CHENEY makes oath that he is the senior partner of the firm of F. J. CHENEY & Co., doing business in the City of Toledo, Ohio, and State of Ohio, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE.

SWORN TO before me and subscribed in my presence, this 6th day of December, 1891. A. D. 1891. A. W. GREGSON, Notary Public. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. Sold by Druggists, 75c. F. J. CHENEY & Co., Toledo, O. Hall's Family Pills are the best.

FIT STOPPED free and permanently cured. No fits after first day's use of DR. KLINE'S GREAT NERVE RESTORER. Free 32-page booklet treated. Send to Dr. Kline, 531 Arch St., Philadelphia, Pa.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain; cures wind colic, 25c a bottle. I cannot speak too highly of Pilo's Cure for Consumption.—Mrs. FRANK MORRIS, 215 W. 23d St., New York, Oct. 26, '94.

THE UNIVERSITY OF NOTRE DAME
NOTRE DAME, INDIANA.
Classical, Letters, Science, Law, Civil, Mechanical and Electrical Engineering. Through Preparatory and Commercial Courses. Ecclesiastical and Social Rates. Rooms Free. Junior or Senior Year. Collegiate Courses. St. Edwards' Hall, for boys, founded in 1863. The 106th Term will open September 21st, 1896. Catalogues sent free on application to Very Rev. A. Morrissey, C. S. C., President.

OPPIUM and WHISKY habit cured. Book sent FREE. Dr. R. M. WOOLLEY, Astoria, Ore. P. N. U. 33

Ornamental Swallows.

Gladness Comes
With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that 80 many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

BATTLE AX

BIG AND GOOD.

Battle Ax
PLUG

Sometimes quality is sacrificed in the effort to give big quantity for little money. No doubt about that. But once in a while it isn't. For instance, there's "BATTLE AX." The piece is bigger than you ever saw before for 5 cents. And the quality is, as many a man has said, "mighty good." There's no guess work in this statement. It is just a plain fact. You can prove it by investing 5 cents in "BATTLE AX."

IF SILVER WINS and if farm produce, labor and labor products double in price, then metals must also double in price, as they are 99% labor. If labor doubles in cost and the price of the mine doubles in cost, the price of the mine doubles in cost. A general rule to cover future needs, while it buys so much, may quickly exhaust our resources and compel the nation to give up the gold standard. If you buy now, you are assured and advance avoided. **IF YOU BUY NOW**
