A Crying Wrong. In a recent editorial the Cleveland Leader utters some sensible views on the subject of inducing working people to leave this country for foreign lands to obtain homes and employment. The Leader says:

Leader says: "A dispatch from Chihuahua, Mexico. mays that the Americans who a few years ago established a cooperative colony on the western coast of Mexico are now in a destitute condition and are now in a destitute condition and are seeking means of transportation back to the United States. A few days kines part of a band of colonists who went to Brazil several months ago to establish homes for themselves arrived catabish nomes for themselves arrives in New York without money and thor-oughly disgusted with their experi-ence. They reported that it had been impossible for them to de more than maintain existence in the South American republic. From time to time al luring inducements are held out to the working people of the United States to go to Mexico or Central or South Amer-ica and establish colonies. In every in-stance a rosy picture is painted of the stance a rosy picture is painted of the conditions existing in those countries, and it is made to appear that life is so much easier there than here as to make a colonial existence a paradise in com-parison with the lot of the poor here. Invariably, we believe, these colonial enterprises have proved failures, but none has hear more complements in that enterprises nave proved raintres, but nore has been more consplcuous in that respect than the Mexican colony at Topolobampo. The conditions of life umay be hard from time to time in the United States, but as a whole the people of this country are better off than those of any other, and there is no place in the world where the people have so much to eat and wear and are so well housed as in this great republic."

This is a great country, with all sorts of climates. At Memphis, Tenn., one morning recently, the thermometer registered 89 degrees in the shade. By registered so degrees in the shade. By moon the mercury had elimbed to 99, and by two o'clock in the afternoon to 104. Several boys were arrested for swimming in Wolf river. Several cases of sunstroke were reported. The Memphis Commercial Appeal, which supplies this surprising information, sup-plements it as follows: "There is no im-mediate prospect of cooler weather, and to add to our vexations the flies and

WASHINGTON LETTER.

Washington, April 5, 1897. Washington, April 5, 1897. A majority of the executive committee of the Indianapolis monetary conven-tion, more generally known as the Bankers' convention, are in Washington trying to talk senators and representa-tives into supporting a bill providing for a monetary commission. The members of the committee profess to be jubilant over the bill's outlook, but senators and representatives apnear to be entireand representatives appear to be entire ly indifferent to the subject. Represen-tative Heatwole, of Minnesota offered a resolution last week for the creation a resolution last week for the creation of such a commission, but there is nothing in sight to indicate that it will be acted upon, notwithstanding the im-plied support Mr. McKinley gave the scheme just after the Indianapolis cor-vontion

vention. There is some very lively kicking among the newcomers at the working of Mr. McKinley's rule against reappoint-ing men who held office under Harrison. When this rule was first announced the newcomers were delighted, but tie, look at it differently now, when they see the case with which the members of the "ex" brigade are quietly gathering up the good things. The reappointment of Mr. Palmer to be public printer was received with wry faces by the new-comers, but when Mr. Palmer took charge of the government printing office and reappointed W. H. Collins chief clork and H. P. Brian foreman, words were uttured that cannot be printed in a family newspaper.

They are telling a little story about Czar Reed at the expense of a number of senators. According to the story, the Czar just before the meeting of the extra session, attended a dinner party where the meeting exceeded where the guests were nearly all sena-ors, some of whom where expressing tors, some of whom where expressing direful forebodings about what would happen to senatorial dignity when "Bil-iy" Mason, with his free and easy manners, entered that body. The czar tired out of that sort of thing, and turn-ing to the senators asked in that exasper ating drawl which he doesn't drop into so often in the house as he used to, "Do you think Mason will stay in the senate long enough to become as dull as the

long enough to become as dull as the rest of you?" The tariff bill has been in the hands

of the senate finance committee long enough to make it certain that it is going to be cut and slashed very much by that committee, not to mention what will be ione to it after it gets reported to the senate. Republican senators are very free in saying that the bill is not what it ought to be. That, of course, is not a ree in saying that the bill is not what to nght to be. That, of course, is not a ure sign that it will be bettered in the enate, merely a sign that it will be very nuch changed. The clause making the luttics imposed by the bill when it be-roomes a law collectable on all importa-ions ordered after April 1, is generally corrected as unches a function in the second regarded as merely a farcical scarecrow set up to frighten timid importers.

The selection of ex-Representative Benjamin Butterworth, of Ohio, to b commissioner of patents, a place he filled once before to the satisfaction of all those having dealings with the office. can scarcedy be considered political, as Mr. Butterworth has expressed opinions upon the tariff and silver question that were a long ways from being in accord with those held by Mr. McKinley and the men who are dominating his adminis-tration and the R p bilican party at this time. Mr. Butterworth's appointment can be credited to the friendship of Mr. McKinley for him, and to his eminent fitness for the place. ed once before to the satisfaction of all

It now looks as though Speaker Reed It now looks as though Speaker Reed really intended to carry out the programme of only having the house meet twice a week—on Wednesdays and Saturdays—and adjourn. It may be that he can keep this thing up during the two or three months that the senate will take to pass the tariff bill, but many are predicting that he will have to give the house a chance to do some-thing or it will do something in spite of him.

ARCHAEOLOGICAL ITEMS

An uncial Greek codex of the Gospels recently bought by the emperor of Rus-sla from the village of Sarumsahly, northeast of Caesarea, written on fine violet parchment in silver letters near-ly an inch high and dating from the fourth century after Christ, is believer to be the manuscript known to New Testament scholars as N, of which 33 leaves are kept at Patmos, six in the Vatican, four in the British museum and two at Vienna. The caar's copy is said to lack 36 leaves.

PERSONAL MATTERS.

Some Are Beautifully Fainted and Most of Them Very Costly. The most expressive little accessory of a woman's dress is her fan, if she but understands the art of using it. French fans are the most attractive and Over 400 diamonds are known to have been recovered from the ruins of Baby-lon. Many are uncut, but most are pol-ished on one or two sides. Permission to excavate the site of old Corinth, between the Acrocorinthus and the modern city, has been granted to the American school at Athens by the dainty in design. Size is the important point in the fashion of fans just at presont, since they must be very small, and if we go back to the time of our great-grandmothers and resurrect their tiny fans, we will have the proper size for Greek government. At the fiftieth anniversary of the French school at Athens, a performance of "Cedipe Roi," with Mounet-Sully and the Comedie Francaise company, will be given in the theater of Dionysos.

The Empire and Louis Quinze fans use to-day. The Empire and Louis Quinze fans are the popular shapes. The sticks are of mother-of-pearl, ivory, tortoise shell, ebony, and vioiet wood, heautifully enameled and inlaid with gold. Black mother-of-pearl is a novely this sca-son, and the ornamentation of gold shows off with good effect on the dark background. Despite the small size, these fans display the most perfect specimens of fine painting in Watteau fugures, birds and flowers, and the very prettiest mounts are transparent with various designs in silk introduced at the Prof. Homolle thinks that the cop per statue recently exhumed by French scholars at Delphi representes Hiero, tyrant of Syracuse, and was probably made by Onatas, the teacher of Philias; in which ease the value of the status made by Onatas, the teacher of Phildias; in which case the value of the statue would be equal to that of the Hermes of Prasiteles. An important find of skeletons of pre-historic people, supposed to be clift dwellers, was made recently on Beaver creek, Yavapai county, Ariz. The skele-tons were laid out in orderly arrange-ment on natural shelves in the chalk-like cliffs bordering the creek. There were about 40 skeletons in all, and each was laid on a piece of matting. They were evidently of full-grown people. but were very small in size and were in a remarkably good state of preserva-tion.

Large sums of money can be invested in this little article of dress, and some of the later imitations of this old style cost from \$50 to \$1,000, according to the fineness of the workmanship. A fan of green silk painted with violets, with violet wood sticks stained green, is a charming little novely. Much less ex-pensive are the Chinese fans of fine crepe painted with flowers.—N. Y. A damage suit for \$30,000 was recent-ly settled in Missouri by the payment of \$500, half of which goes to the attorney. A bill has been introduced in the New York legislature which absolute-ly prohibits the hounding and "jacking" of deer within that state.
