

Foundation For a Romance.
About the time John Bull was getting his final lesson from Uncle Sam, in 1812, a letter was written by a repentant Pennsylvania father to the discarded son, who never received it. The romance-freighted document has just been discovered at Lenni, Delaware County, Miss. Catherine Mahon, daughter of an old resident of that town, was looking over some old family papers and came across a package of letters that had belonged to her grandmother. Among the collection was a sealed envelope, yellow with age, which bore the superscription: "For my son, Hiram, should he ever return." This was signed "Thaddeus Mahon." Miss Mahon showed the letter to her father, who remembered having heard his father speak of a brother who had left home suddenly and had never returned. It was decided to break the big red seal with which the envelope was fastened, and within it was found the following pathetic letter, addressed to "My son Hiram," and dated July 13, 1812:

"Since you have left I see my mistake. I pray that you may come back in time to forgive me. Thank God your mother is not living to know that I cast her son off. Willingly would I give my consent to your marriage with Nell, for I now see that she is a good woman. Forgive your father, who has broken his heart through his headstrong ways. God bless you."

This was signed "Thaddeus Mahon," but there was nothing to throw any light on the old-time romance that ended so unhappily. No one in Lenni knows who "Nell" was or what became of her, and it can only be conjectured that her lover went to the war under an assumed name and was killed in one of the naval engagements from which this country won glory and money from England.

It is entirely superfluous to tell people that you are getting old; you show it.

Playin' Possum.
"Playin' possum" comes from the fact that the possum will feign sleep or death when pushed into sudden danger of being captured. But pains and aches never play that kind of a game. They never try to fool anybody, and go to work to wake up people, leaving no chance to feign sleep. On the other hand, there is a remedy known as St. Jacobs Oil that will kill a pain or an ache so that it won't wake up again in the cure that follows its use. Pains and aches are great or less in intensity just in degree as we treat them. Prompt treatment with the best remedy—St. Jacobs Oil—prevents their increase and by curing prevents their return. Everything is gained by taking pains and aches in time for a prompt and permanent cure, and there is nothing better than the use of St. Jacobs Oil.

Just try a 10c. box of Cascarets, the finest liver and bowe regulator ever made.

The \$100,000 passenger station that the Baltimore & Ohio Railroad company is erecting in Baltimore, to take the place of the old Camden station, is being rapidly pushed to completion. The train shed will be ready, probably, by the first of May, and the rest of the structure will be thrown open to the public about June 1st.

Shake Into Your Shoes
Allen's Foot-Ease, a powder for the feet, it cures painful, swollen, smarting feet, and instantly takes the sting out of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes tight-fitting or new shoes feel easy. It is a certain cure for sweating, callous and hot, tired, aching feet. Try it today. Sold by all druggists and shoe stores. Mail for \$2c. in stamps. Trial package FREE. Address, Allen S. Olinsted, Le Roy, N. Y.

I could not get along without Piso's Cure for Consumption. It always cures.—Miss E. C. Moulton, Needham, Mass., Oct. 23, '94.

F. J. Cheney & Co., Toledo, O., Props. of Hall's Catarrh Cure, offer \$100 reward for any case of catarrh that cannot be cured by taking Hall's Catarrh Cure. Send for testimonial free. Sold by Druggists, 75.

Tobolok, Russia, claims to be the oldest inhabited place in the world.

No-To-Bac for Fifty Cents.
Over 40,000 cured. Why not let No-To-Bac regulate or remove your desire for tobacco? Saves money, makes health and non-habit. Cures guaranteed. 50 cents and \$1.00 at all druggists.

From Germany we get the custom of celebrating gold and silver weddings.

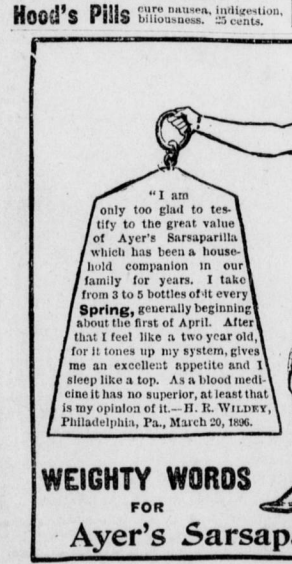

When bilious or constive, eat a Cascaret, candy cathartic; cure guaranteed; 10c.

Impure Air Blood
Eating rich and hearty food, sweets and fats in winter, close confinement and breathing vitiated air in office, store, shop, house, factory or school—these things, if not remedied, impure blood, impure humors, eruptions, boils, pimples, humors are the result. Dizziness, indigestion and many other troubles are also caused by impure blood.

Hood's Sarsaparilla
Is the best—in fact the One True Blood Purifier. Cures nausea, indigestion, biliousness. 25 cents.

"I am only too glad to testify to the great value of Ayer's Sarsaparilla, which has been a household companion in our family for years. I take from 3 to 5 bottles of it every Spring, generally beginning about the first of April. After that I feel like a two year old, for it tones up my system, gives me an excellent appetite and I sleep like a top. As a blood medicine it has no superior, at least this is my opinion of it.—H. E. WILKEY, Philadelphia, Pa., March 20, 1896.

WEIGHTY WORDS FOR Ayer's Sarsaparilla.

THIN BLOOD, WHITE COMPLEXION

Doctor: Diagnosed the Case as Heart Disease and Consumption—But the Symptoms Were Due to Watery Blood Alone, and Disappeared When Blood Was Enriched.

From *Presbyterian Journal, Philad'a Pa.*
After years of patient and intense suffering, Miss Gertrude Gilbert has recovered her lost health, and is to-day a rosy and blooming specimen of young womanhood. Miss Gilbert's illness, which was of several years duration, was due mainly to a lack of blood. To-day her rosy cheeks and healthy appearance denote the grateful change from a life of ill-health to one of freedom from all illness. When a reporter called on her at her home, No. 1919 Glenwood Avenue, Philadelphia, the young lady ran lightly down the steps with all the elasticity of youth.

"I could not have done that eight months ago," she said as she seated herself in a big armchair. "At that time," she continued, "had I run down the steps I did a few moments ago, I would have fainted." With her eyes sparkling, and a vivacious flurry in her manner, Miss Gilbert asked the cause of the reporter's visit. Upon being told that she came to ask about her illness, she said that she would cheerfully relate her experience. "I have been so wonderfully benefited that within the past eight months I have grown from a mere skeleton to what you now see. I had been sick for a long time, when a friend urged me to try Dr. Williams' Pink Pills for Pale People. Previous to this I had been treated by several physicians, who diagnosed my trouble as heart disease, together with consumption, and prescribed accordingly. All this medical treatment did not benefit me in the least. I was in a terrible condition. There was scarcely any blood left in my composition, and my friends often told me that they thought I was a victim of blood disease. My chief trouble was weakness, and after laborious efforts to get upstairs I almost went into a faint, and on several occasions thought I was going to die."

"So little blood had I that my ears were almost transparent, and my complexion was as white as a sheet. I can scarcely describe my sensations, but after repeated treatment by my physicians I became thoroughly discouraged. "It was at this time that Dr. Williams' Pink Pills were recommended to me, and I procured a box. Before I had finished it I began to feel the benefit of my health. This gave me encouragement, and I began a systematic course according to the regulations on the wrapper. At the end of the seventh or eighth box, I forgot which I was an entirely different girl. In addition to having a sufficient quantity and better quality of blood in my veins, I was relieved of that shortness of breath and quick heart action which has been my chief trouble. My appetite returned and I was enabled to do my daily duties with a cheerfulness which I had never before experienced. "Several weeks ago I stopped taking the pills, and while I feel confident I shall never again be in such ill health, I always, as a preventative, keep a box of Dr. Williams' Pink Pills in my room. They are all they are represented to be, and I say again that to them, and them alone, do I owe my restoration to health."

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are also specific for troubles peculiar to females, such as suppression, irregularities and all forms of weakness. They build up the pale and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature. Pink Pills are sold in boxes (never in loose bulk) at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Company, Schenectady, N. Y.

A Trick that Failed.
The dishonest man is pretty sure to overreach himself sooner or later, as in the following story, borrowed from an exchange:

In a hotel in Berlin there was a night watchman who did not take kindly to the system adopted a few years ago, requiring him to go through the hotel at certain hours and touch a set of electric buttons. After much thought he rigged up an automatic arrangement on several of the buttons, so that they would report at certain hours. Soon the button system got so out of order that the management abolished it, and a pedometer was given to the watchman, which would register every step he took. All went well the first two nights; but on the third morning the old man was missing. On search being made, he was found sound asleep in the engine-room, and the pedometer so attached to the piston-rod of the engine that with every stroke it registered a step. It had been traveling all night, and when taken off it registered two hundred and twelve miles.

The Comment.
"I was telling Miss Cayenne about an accident with which I recently met," remarked Willie Wishington, with a melancholy look in his eye.

"Indeed?"
"Yes, I was getting off an electric car. Didn't realize how fast it was going and landed on my hands instead of my feet."

"What did Miss Cayenne say about it?"
"Not much. She merely remarked that I had at last succeeded in being original."—Washington Star.

HOW ENSILAGE IS KEPT.
The question whether it is absolutely necessary to get all the air out from among ensilage when picking it, so as to insure its keeping, must be answered in the negative. It is true that the air is mostly expelled from fruit by boiling in the cans before they are sealed. But even then we do not get all the air out, as we can continue to boil, and air would still rise to the surface. What we really do to greatly lessen the amount of air in the can, but leaving some, which, as the can is nearly filled with fruit and juice, will be found at the top. This air will cause some of the juices at the surface to decompose, generating carbonic acid gas, and forming a thick white scum over the fruit in the can, which excludes air from the fruit, and thus preserves it. This is exactly what happens in the silo. The generation of carbonic acid gas, as soon as it goes far enough, stops further fermentation, provided air from below does not get at the silage. There will always be some rotten silage at the top, which has to be thrown away. But for this reason the top of the silo should be finished with straw or coarse stuff that has little nutritive value. If this is done all the valuable silage may be saved. If not the top layer will be wasted just as it is in the fruit can.—American Cultivator.

CORN SMUT.
In an exhaustive treatise on corn smut the Kansas Experiment Station claims that the annual loss to the farmers is as high in some instances as one-fourth of the crop.

It also states that smut is a low order of plant life which fastens itself upon the corn and lives upon it as mites or fleas live upon animals, exhausting its strength and vitality. The black, powdery mass formed in the later stages of its development are the seed spores.

In the study of smut, the station authorities have, in three years, examined over 200,000 stalks in more than 500 fields. These examinations showed that smut does not appear till the plant is one or two months old, and first attacks the blades, later the joints, then the tassels, and later the ears

Moisture favors its germination and development. The younger and newer spores germinate quicker than older ones.

Some very remarkable results of these experiments with smut were that it was almost impossible to spread the smut artificially, and the weakest, puniest stalks were least liable to be attacked by it. Very few of the corn plants upon which the smut spores were sprinkled were attacked, and no stunted, weak stalks were found anywhere, attacked by smut.

It was noticed that smut was most abundant in dry seasons. The nabobs of India esteem the blooms of the cassia tree as an especially dainty food. They have a sweet, spicy flavor.—New York Tribune.

TEMPING APPLE DESSERT.
Mrs. Lemcke's formula for a temping apple dessert is one dozen Spitzenberg apples pared and cored whole; these are put in a wide saucenpan with sufficient water to cover them, the water being brought to the boil before the apples are added. Cook the apples till a straw will easily pierce them, then carefully take out and arrange in a large glass dish; boil the liquor down till it is reduced to a quart, add one cup of sugar and one ounce of gelatine soaked for fifteen minutes in a little cold water; boil the syrup with these for a few minutes, then set aside to cool slightly before pouring it over the apples, and putting the dish on ice to get firm. Serve with whipped cream. Almonds blanched and finely chopped, or grated cocoanut sprinkled over the jelly, improve both taste and appearance of this dish. Peaches, pears, and quinces may be prepared in the same way, the two latter needing somewhat longer cooking.—New York Post.

PECAN CANDY.
Take one pound of light brown sugar. The genuine rich brown sugar, which is the unrefined product of the cane, can no longer be found for sale in the market, though a small quantity of this sugar is still prepared on some Southern plantations, and occasionally a little is forwarded to Northern customers or to friends. This sugar makes the most delicious "pralines." The light sugar of our market, however, is a fairly good substitute for it. Add two-thirds of a cupful of boiling water and two even tablespoonsful of sweet, saltless butter to a pound of the sugar. Stir it until it melts. Add a mere pinch of cream of tartar, and let the syrup boil without stirring again until a drop of it will make a soft ball when rolled between the fingers.

Wet the fingers in ice water before testing the syrup. When the drop is stiff, but does not stick, the candy is ready. If it is hard, so that the drop cracks when bitten, it has boiled too long, and in that case add a tablespoonful of water and let the syrup boil an instant. Do not stir it, however, but merely test it again. When it has reached the "ball" or soft, creamy condition, remove it from the fire and pour in a cup of nice pecan kernels. Pour the candy out into very thin sheets on buttered tins, and when it is partly cooled create it with a knife into candies about two inches square. Break the sheet into separate candies when it is cold.

Another way is to take out the candy by the teaspoonful as soon as the syrup has cooled for about two minutes. Allow each spoonful room to spread on the buttered tin sheet on which it is dropped.—New York Tribune.

HOUSEHOLD HINTS.
Scraped apple is said to disguise the taste of quinine.

Sand baths, artificially heated, offer an excellent means of inducing perspiration, exciting the functions of the skin, etc. They are useful in rheumatism and have no bad effect upon heart or circulation.

A nice flavor may be given to a boiled steak by cutting an onion in halves, and rubbing the cut edges over the heated platter intended for the steak. The platter should contain a little melted butter.

When the new rag carpet comes home from the weaver's, measure the length of the breadths. Then run four rows of machine stitching across each breadth. Cut between the rows, two on each side, and it will not ravel. In making up an ingrain carpet the same plan is advisable.

If you have cooked cornmeal mush, instead of filling the kettle with water to soak after it is emptied, set it on the back of the stove, where it will keep pretty warm, and let dry. In a few hours the mush will have dried and is ready to peel off, leaving the kettle so that an ordinary washing will clean it.

A housewife suggests, as a method of preventing rich cookie dough from sticking to the moulding board to cover the board with thin unbleached muslin, put on without a wrinkle, dust it well with flour, then roll out the dough. We know a much less troublesome method than this, and it is very simple. Don't make rich cookies. Then you'll have no trouble with them.

An attractive way of preparing fried bread or croutons, as they are called, for serving with soups is to cut the slices of bread in small circles the size of a silver quarter; place them upon a tin with a little soup stock. Put the tin in the oven, and cook the bread until it is crisp and brown. While hot dip them in melted butter, and quickly roll in grated cheese.

PLANTAIN WEED SEED.
When buying clover seed it is always best to use a microscope to detect weed seeds that of late years have become very plentiful in clover. No one of these weeds is worse than the plantain, or sheep's tongue, as it used to be called from its long, narrow leaves. It has numerous small, black seed, much smaller than clover seed. When land is once seeded with the plantain it is almost impossible to get rid of it, as the seeds remain in the ground for years, only germinating when the plow brings successive strata of seed filled soil to the surface. Both sheep and cattle will eat plantain, though it is less nutritious and palatable than other grasses, and of course much inferior to clover.

FEATHER EATING FOWLS.
Feather eating is a vice rather than a disease. Like all bad habits, it contaminates all within its reach, so when a fowl is noticed doing the unclean thing, the surest way to stop the ill effects of this bad example is to use the hatchet and put the offender in the pot.

If a valuable bird it may be broken of the habit by the use of a bridle which can be bought for a few cents. A remedy recommended by some is this: Make an ointment of sulphur, kerosene, lard and carbolic acid. Anoint that part of the plumage that is being pulled out, and the offender, not relishing this "saucce," may soon stop its offense.

One poultryman fed his stock feathers and they soon got disgusted with such fare and behaved themselves. It is very seldom a busy flock has any feather eaters in it, especially if they are furnished fresh meat or green bone.

It is idleness that begets the evil. Keep the flock scratching, hustling.—Farm, Field and Fireside.

PLANTING APPLE ORCHARDS.
How far apart should apple trees be planted? The small, thin, whiplike trees with a few roots attached look very lonesome when set at the proper distance apart. It requires strong imagination and some faith to see these in the future, spreading fifteen to eighteen feet on either side, and with branches that interlock each other. Yet they will surely do it if not placed forty feet apart. And on good ground that, for the spreading varieties, like Greening and Baldwin, is none too near. The Northern Spy apple grows more upright, and that may be planted thirty feet apart, partly to crowd the roots and induce earlier bearing. But even with the Northern Spy we should prefer to have the trees planted forty feet apart, and then plant in between the rows peach trees or dwarf pear trees to produce a crop until the apple trees come into bearing. No kind of apple so much needs sunlight as does the Northern Spy. But this can be best secured by pruning out the inside branches of the tree and letting sunlight to the centre. The Northern Spy apples that grow on these inside branches are small, colorless and poor in flavor. The fruit at best needs a long season to ripen, and should have all the sunlight that can be given it.—Boston Cultivator.

DEBRY BULLETIN.
The growing of a berry calls into action some of the most wonderful laws of nature.

In the growth of plants we find these laws in perfection. We also find in various forms a complete supply of every element required for the development of both plant and fruit.

Nature gives us all these products without stint. She simply asks in return that we assist her in some of the smaller details of the work.

She asks that the soil be made rich and well prepared. That the plant be of good quality and carefully set out. That frequent hoeing and cultivation be given. That plants be protected from winter frosts and summer drought. That no insect pest or fungous disease find an abiding place with them. That you treat them as a friend and love them as a brother.

Both pleasure and profit comes in greatest measure from closest attention to all these details.

Nature furnishes almost every good with a prodigal hand, but she is a niggard to him who will not work in her ways. You cannot cheat her in farm or garden. You cannot get something for nothing. These are days of progress.

Every line of business must advance with the time or drop to the rear. The farmer has been the laggard.

The safest, the surest, the most ancient and the most honorable business on earth should be in the most progressive ranks.

An army of best newspapers are stationed all along the agricultural highway, to guard us from error and direct us to success. We cannot afford to be without them. Read them! Study them. Experiment in a moderate way, give extra preparation and cultivation to certain tracts, and mark results as compared with ordinary tillage. Observe results of similar experiments on your neighbor's farm. Compare notes with him and reason together.

Extend like experiments to the seeds you sow, the stock you grow and trees, plants and shrubs you set.

Such experiments are almost sure to lead to more careful selection of seed, stock and plants, to a more thorough cultivation of the soil and better results every way from farm, fruit and garden.—M. A. Thayer, of Wisconsin.

Morocco's Sultan has engaged an Aberdeen man to play the bagpipes at his court.

HOUSEHOLD AFFAIRS.

RHUBARB DESSERT.
Make a rich syrup by adding sugar to water in which long strips of orange peel have been boiled until tender, lay into it a single layer of pieces of rhubarb three inches long and stew gently until clear. When done, remove and cook another layer. This makes a handsome dessert dish by ornamenting with puff paste cut in fancy shapes.

CHRYSANTHEMUM SALAD.
Not every one knows that chrysanthemums may be converted into a very dainty dish. Chopped very fine and served with pure, fresh cream, the gorgeous Japanese blossom is said to make a most delicious salad. It tastes a little like cauliflower, but is more delicate. The people in some of the provinces of France make an extremely palatable salad of the white and pink clover blossoms, and every one knows that nasturtium blooms taste very much like watercress. The nabobs of India esteem the blooms of the cassia tree as an especially dainty food. They have a sweet, spicy flavor.—New York Tribune.

TEMPING APPLE DESSERT.
Mrs. Lemcke's formula for a temping apple dessert is one dozen Spitzenberg apples pared and cored whole; these are put in a wide saucenpan with sufficient water to cover them, the water being brought to the boil before the apples are added. Cook the apples till a straw will easily pierce them, then carefully take out and arrange in a large glass dish; boil the liquor down till it is reduced to a quart, add one cup of sugar and one ounce of gelatine soaked for fifteen minutes in a little cold water; boil the syrup with these for a few minutes, then set aside to cool slightly before pouring it over the apples, and putting the dish on ice to get firm. Serve with whipped cream. Almonds blanched and finely chopped, or grated cocoanut sprinkled over the jelly, improve both taste and appearance of this dish. Try Grain-O! Try Grain-O!
Ask your grocer to lay to show you a package of Grain-O, the new food drink that takes the place of coffee. The children may drink it without injury as well as the adult. All who try it like it. Grain-O has that rich, real brown of Mocha or Java, and it is made from pure grains, and the most delicate stomach receives it without offense. One-quarter the price of coffee. 15c. and 30c. per package. Sold by all grocers.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c. a bottle.

CASCARETS stimulate liver, kidneys and bowels. Never sicken, weaken or gripe; 10c.

A man in a balloon four miles above the earth can plainly hear the barking of a dog.

A Distinction.
Maud—What are dukes worth, papa? Struckoff (after his trip abroad)—Not a darn cent.

Maud—I mean what are they selling for?
Struckoff—Oh, about a million, spot cash.—Up-to-Date.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. R. E. KLINE, Ltd., 931 Arch St., Phila., Pa.

General Manager Greene, of the Baltimore & Ohio railroad, has issued an order requiring all live stock to be watered and fed at least once every 24 hours. Yard masters are to be held strictly accountable, and the penalty for violation is rather severe.

SILENT SUFFERERS.
Women do not Like to Tell a Doctor the Details of Their Private Ills.

The reason why so many women suffer in silence from the multiple disorders connected with their sexual system is that they cannot bear to broach the subject to a man, even if he is a physician.

No one can blame a modest, sensitive woman for this reticence. It is unnecessary in these times, however, for a woman makes to all afflicted women a most generous offer. Mrs. Pinkham of Lynn, Mass., bids every woman who suffers to write to her and confide every symptom that annoys her, and she will give her advice without charge, and that advice is based upon the greatest experience ever possessed by man or woman in this country, and extends over a period of twenty-three years, and thousands upon thousands of cases. Why suffer in silence any longer, my sister, when you can get help for the asking? Don't fear to tell her everything.

The case of Mrs. Colony, whose letter to Mrs. Pinkham we publish, is an illustration of the good to be received from Mrs. Pinkham's advice; here is a woman who was sick for years and could get no relief—at last in despair she wrote to Mrs. Pinkham—received in return a prompt, sympathetic and interested reply. Note the result and go and do likewise.

"I was troubled with such an aching in my back and hips, and I felt so tired all the time, and had for four years. For the last year it was all I could do to drag around. I would have such a ringing in my head by spells that it seemed as though I would grow crazy. I ached from my shoulders to my feet and was very nervous. I was also troubled with a white discharge. I wrote to Mrs. Pinkham at Lynn, Mass., received a prompt reply and followed her advice, and now I have no backache and begin to feel as one ought; in fact, I never felt better in ten years than I do now. I thank God that I went doctored with Mrs. Pinkham when I did, for if I had not I know I would have been in my grave."

—MRS. NELLIE E. COLONY, Nehma, Mich.

A Distinction.
Maud—What are dukes worth, papa? Struckoff (after his trip abroad)—Not a darn cent.

Maud—I mean what are they selling for?
Struckoff—Oh, about a million, spot cash.—Up-to-Date.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. R. E. KLINE, Ltd., 931 Arch St., Phila., Pa.

General Manager Greene, of the Baltimore & Ohio railroad, has issued an order requiring all live stock to be watered and fed at least once every 24 hours. Yard masters are to be held strictly accountable, and the penalty for violation is rather severe.
