### AN UNKNOWN ROOM.

AN UNKNOWN ROOM.

Sealed Up for Years in New York's
Court House.

A room the existence of which was
known to few, if any, present on.ce
boiders, was discovered last week in
the County Court House. It is the
southeast corner, under the office of
the Surrogate's clerks. It was tightly
fastened, and, it is said, has not been
spened for twelve to fifteen years. No
one in the building had any control
over the room or its contents, but on in
quiry it was found that the room had
been taken years ago for the deposit of
records of the Comptroller's office. The
inquiry was pursued until a key to the
room was found filed away in the ofdee of the Comptroller and the room
was opened.

The dead air tastile nearly knocked

ace of the Comptroller and the room was opened.

The dead air inside nearly knocked over the curious men who looked in, and the door was quickly shut up again. The hasty glance taken of the interior showed that it contained a lot of books and bundles of vouchers and such papers. It was the unwholesome door that hung about the Surrogate's office, where nine clerks are employed in a small room, that led to the search which resulted in the discovery of the sealed apartment. It is thought this come of the waste pipes have sprung a leak in the room.

sealed apartment. It is thought that some of the waste pipes have sprung a feak in the room.

It is understood that this secret room is the only part of the building retained for the Comptroller after an effort on his part several years ago to secure quarters in the County Courthouse. The difficulty, as explained to the writer by Justice Van Brunt some time ago, arose through Comptroller Andrew II. Green insisting that he had the right to take possession of quarters in the County Court House under authority of the Commissioner of Public Works, in whose charge are the municipal buildings. The Comptroller was partly installed before the Justices of the Supreme Court got into action. He wanted the lower floor on the west side of the building, chiefly the part now used as docket clerks' rooms.

"We told him," said the Justice, "that the State had subscribed something like \$200,000 for the building, and that the State would have something to say as to how the building was used. Mr Green was told that he would be brought before us for contempt if he did not vacate, and he vacated."

The room now appears to show that the Judges were contemmed just a litile.—New York Sun.

The Art of Complimenting.

The Art of Complimenting.

Compliments are the poetfeal touches which redeem the monotony of prosaic existence. In the intercourse of sympathetic people they have a natural place, and it is as pleasant to recognize by word or look the charms of our friends as it is to profit by them. Profit we do, undoubtedly, as all that makes life fairer makes it better, and a whole-some discernment of good traits must add to our faith in human nature and fits capabilities. Rigid moralists declare that compliments are so akin to fattery that it is wrong to use praise in any way. This is "most intolerable, and not to be endured," for all need both to give and receive encouragement in this practical and hurrying world. And, reprehensible as hard natures find it, there is a charm in opening our eyes to the attractions of others and a warm, healthy flow accompanies the utterance of words which attest our admiration.

sel almly surveying the knife which he held in his hand. Tm a butcher by trade and can do the job easily with this tool."

"Here he paused to examine with his thumb the edge of the knife, which looked rather blunt, and as he did so an idea struck me, and I remarked:

"Your knife does not seem to have a wery keen edge; the trachea is tough, you know, and rather difficult to ent with a curious expression, as if trying to read my thoughts, and then, after examining the knife more closely, seemed to think my suggestion a good one; for he said:

"Yes, doctor, I think you are right. A little sharpening will do no harm; so if you don't mind waiting I will go to the galley and get the cook to help me put an edge on it with his door after him, I thought my escape would be easy. But jecture my dissovered that the door was locked as the corticle and shoutedwith all my might for assistance, but the fury of the gale was now so great that all my gent for assistance, but the fury of the gale was now so great that all my gent for assistance, but the fury of the gale was now so great that all my gent there was not so much as a stick to be found in my cabin. I put my car to the keyhole, and, thinking I heard footsteps approaching, I imputsively threw off my coat, went to the furthest end of the room, and standing as definantly as possible, resolved to fight to the last.

"I remember then the door bursting spen and the entry of the madman, not alone, as I expected, but securely in the last.

Tourness to consequence with a series of the control of th

Into that flash?"

A Good Wall's Good Work.

In times past many financial projects were carried into effect toward "saving the Old South Church," but the principal way it was saved at the time of Boston's great fire was through the fact that, though the interior of the Transcript Building was burned to the basement, its northerly wall, six tall stories in height, of solid brick, and unpierced with windows except at the very top story, stood firmly as a barrier against the further spread of the fire to the north. This wall was built on honor, starting at twenty-four inches and carried nearly all the way up at that thickness. It stood as plumb and intact the day after the fire as the day the top layer of brick was put on it in building. Some even say that the fire was stopped on the west by this wall, as well as on the south, and that City Hall was thus saved.—

Then it occurred to Father Lambert to try other feathers, and it was found that any feather, excepting those of the ostrich, produced the same result.

A World representative visited Father Lambert in his home last week, and had demonstrated for the World's benefit £the remarkable effect of a feather on the dog. Duke was at the door wagging his tail vigorously when the reporter approached. As soon as the reception room door opened he larted across to the further side, and, sitting on his haunches, watched alertly a closed drawer in the cabinet. "Ah!" said the maid, "Duke if after his feather." Then she explained briefly the dog's unique fascination.

Another remarkable characteristic about Duke is that he will not under any circumstances eat the flesh of birds. No matter how it is cooked, he will not touch it. Once a little piece of cooked chicken was put with a lot of other food given him. He ate all the rest, but left the chicken untouched.—New York World.

rest, but left the chic hed.—New York World.

Bill Nye's Long Search.

When the late "Bill" Nye was a boy leand his brother once had a great time searching after a calf that had got lost in a piece of woods. The search was kept up for days. Finally it had to be abaudoned. Everybody but the humorist forgot all about it, and he said nothing of it to any one for more than twenty years. One day his brother—the same who had helped in the search—got a letter from Bill, in which a pending long trip to Europe was described.

The letter wound up something like this: "You see, I'm going a long ways, and shall be away some time. While I'm gone I shall keep a sharp lookout everywhere. Maybe I'll find that blame calf. I've looked for it everywhere in the United States without success, and I'm going to try the old world."—Philadelphia Press.

Jane to bring a fresh bucket of water."

"You doubtless mean a bucket of fresh water," corrected the professor. "I wish you would pay some attention to your rhetoric. Your mistakes are curions." A few minutes later the professor said:

"My dear, that picture would show to better advantage if you were to hang it over the clock."

"Ah," she replied, quietly, "you doubtless mean if I were to hang it over the clock. If I were to hang it over the clock. If I were to hang it over the clock. We could not tell the time. I wish you would be more careful with your rhetoric, my dear, your mistakes are curious."—Syracuse Standard.

Proud of the Capital.

The people of the country are fond of their capital. More than the Washingtonians themselves, they have seen the wonderful progress of Washington, for by visits at intervals—some of them extending over years—they have met with some contrasts which tell the story to the spectator more thoroughly than constant living in the city could do. In different parts of the country we have heard people discuss the growth of Washington with pride and relate the comparisons of the various visits. The man who was there ten or twenty years ago, and who goes again this year, takes a tale back home which he never tires of telling.

And not only will Washington have no rival in the sense of competition, but it is destined to be beautiful beyond any other city or any other capital in

Advice to Klondikers.

Arrested A Whole Funeral.

It has long been the custom of funerals the world over to proceed slowly; not so, however, with funerals in the outskirts of Brooklyn. The other day in that city a funeral was spinning along when the hearse driver carelessly ran over a boy's bicycle and ruined it.

The policeman, who gave chase over.

hauled the hearse, climbed up on the box and arrested the driver for his recklessness.

"All you people follow me!" the policeman shouted to the drivers of the carriages in the funeral cortege.

Thereupon he turned the horses toward the police station and started them at a trot. The hearse driver was dumb with astonishment. All the carriages duffully trundled along behind. Imagine the astonishment of the citizens of Brooklyn upon seeing a whole funeral procession trotting toward the lockup. The unhappy occupants of the carriages, knowing nothing of the reas son for the change in their itinerary, were full of indignation.

The sergeant refused to entertain the charge against the hearse driver, and he advised the boy to get a warrant for the driver if he wished to prosecute him. Thereupon the funeral procession resumed its journey toward the cemetery.
