

Feed Your Nerves

Upon rich, pure, nourishing blood by taking Hood's Sarsaparilla, and you will be free from those spells of despair, those sleepless nights and anxious days, those gloomy, deathlike feelings, those sudden starts at mere thoughts, those desyncopic symptoms and blinding headaches. Hood's Sarsaparilla has done this for many others—it will cure you.

Hood's Sarsaparilla

is America's Greatest Medicine. \$1; six for \$5.

Hood's Pills cure sick headache. 25c.

Beware of Ointments for Catarrh That Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken internally and is made in Toledo, Ohio, by F. J. Cheney & Co., Testimonials free. Sold by druggists; price 75c. per bottle. Hall's Family Pills are the best.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Free trial bottle and full particulars free. Dr. R. H. Kline, Ltd., 361 Arch St., Philadelphia.

A single lump of coal weighing exactly 4,880 pounds was recently shipped from the United States to Manchester. A special derrick had to be rigged to get it from the railroad car into the steamer's hold.

Beauty Is Blood Deep.

Clean blood means a clean skin. No beauty without it. Cascarets, Candy Cathartic, clean your blood and keep it clean, by stirring up the lazy liver and driving all impurities from the body. Begin to-day to banish pimples, boils, blotches, blackheads, and that sickly bilious complexion by taking Cascarets—beauty for ten cents. All druggists, satisfaction guaranteed. 10c, 25c, 50c.

"Lady took also lady performed exactly 4,880 pounds was recently shipped from the United States to Manchester. A special derrick had to be rigged to get it from the railroad car into the steamer's hold.

To Cure A Cold In One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 25c.

Early morning exercise is denounced nowadays by the majority of hygienic teachers. At that time, they say, vitality is at its lowest ebb, and needs the stimulation of food.

Educate Your Bowels With Cascarets.

Candy Cathartic, cure constipation forever. 10c, 25c, 50c. If C. C. Co., druggists refund money.

According to the Color.

On the state railways in Germany the carriages are painted according to the colors of the tickets of their respective classes. First-class carriages are painted yellow, second-class green and third-class white.

The primary cause of the horrible disaster to the steamship La Bourgogne was the fact that it was moving at a high rate of speed in a heavy fog. Very likely this had been the usual custom of La Bourgogne on previous voyages. On every such occasion, however, a risk was taken which no steamship owner has a right to take with the lives of passengers. Times without number the risk has been taken without being attended with the disaster that always threatens the steamer moving rapidly in a fog. It was inevitable, however, that the continual coquetting with danger must finally prove disastrous. La Bourgogne disregarded the precaution once too often, and the vessel went to the bottom, carrying most of its passengers with it. The making of rapid speed in foggy weather is a crime not peculiar to La Bourgogne. Nearly all the ocean liners are guilty of the dangerous practice, which they should be forced to discontinue. The saving of time is not of so great importance that lives must be sacrificed in order to effect that end. Safety must be the first condition of ocean travel.

CONSULTING A WOMAN.

Mrs. Pinkham's Advice Inspires Confidence and Hope.

Examination by a male physician is a hard trial to a delicately organized woman.

She puts it off as long as she dare, and is only driven to it by fear of cancer, polypus, or some dreadful ailment. Most frequently such a woman leaves a physician's office where she has undergone a critical examination with an impression, more or less, of discouragement.

This condition of the mind destroys the effect of advice; and she grows worse rather than better. In consulting Mrs. Pinkham no hesitation need be felt, the story is told to a woman and is wholly confidential. Mrs. Pinkham's address is Lynn, Mass., she offers sick women her advice without charge.

Her intimate knowledge of women's troubles makes her letter of advice a wellspring of hope, and her wide experience and skill point the way to health. "I suffered with ovarian trouble for seven years, and no doctor knew what was the matter with me. I had spells which would last for two days or more. I thought I would try Lydia E. Pinkham's Vegetable Compound. I have taken seven bottles of it, and am entirely cured."—Mrs. JOHN FOREMAN, 26 N. Woodberry Ave., Baltimore, Md.

The above letter from Mrs. Foreman is only one of thousands.

WANTED—Case of bad health that E-I-P-A-N-G will not benefit. Send 5c. to Ripans Chemical Co., New York, for 10 samples and 100 testimonials.

EULATE'S FRIENDLY ACT.

SENT SPANISH MARINES TO THE AID OF AN AMERICAN CONSUL.

How the Vizcaya's Captain Earned the Praise of Nineteen Nations—Rescued Foreign Consuls From Imprisonment—Placed His Ship Under American Flag.

While the war revenue bill was before Congress Hon. Amos Cummings made a speech in the House in the course of which he gave many incidents connected with his visit to Cuba. One of them is especially interesting just now, when the Spanish Captain Eulate is a prisoner of war in our hands. Mr. Cummings said:

"A story full of romantic and interesting is told of Captain Eulate, the commander of the cruiser Vizcaya, the late victor of the harbor of New York. The incident occurred in La Guayra, on the Spanish main, in 1891. The American Consul there was Mr. Hanna. The city was raided by one of Dictator Mendocza's generals. He imprisoned all of the foreign merchants and seventeen consuls, representing the different nations, demanding a large ransom for their release. Hanna was out of town when the raid began. On his return he sensed the situation and took immediate steps for the rescue of his colleagues.

"The only war vessel in the harbor was the Jorge Juan, a little Spanish ship with three small guns, detailed for coast-guard duty. Her commanding officer was Eulate, then a sub-lieutenant in the Spanish navy. Hanna tried to communicate by cable with the United States Government, but failed. He next tried to reach the American Minister at Caracas, and was again shut off. Finally, at a last resort, he took a boat and boarded the Jorge Juan. Lieutenant Eulate received him with marked courtesy, and listened graciously to his story.

"Hanna detailed the startling events that had occurred, and asked the aid of the Spanish gunboat in rescuing the imprisoned consuls. Eulate replied that his ship was at Mr. Hanna's disposal, and asked him what he intended to do. 'I propose to demand the release of the imprisoned consuls,' was the reply.

"Lieutenant Eulate then placed thirty Spanish marines at the disposal of Consul Hanna. He ordered his crew for action. The marines were embarked in the launch, which displayed the American flag. Consul Hanna landed with them and demanded the release of the imprisoned consuls within twenty minutes, saying that if this was not done the gunboat would open fire upon the city. A single shot was fired at the Spanish vessel from the shore. It struck her in the bow, and Lieutenant Eulate responded with a blank broadside. The consuls were released under Hanna's ultimatum. He then demanded the release of the imprisoned foreign merchants. General Pepper, representing the dictator Mendocza, promptly complied with the demand, and his troops evacuated the city. The American flag was then hauled down from the Jorge Juan and the Spanish ensign appeared at the stern. The marines were returned to the ship, and Captain Hanna and the released consuls warmly thanked Lieutenant Eulate for his services.

"This, however, was not the end of the matter. The Spanish Government was indignant at the action of its lieutenant. He was ordered back to Havana, deprived of his command, and sent to Morro Castle. A court-martial was ordered, the lieutenant being charged with piratical acts at La Guayra. Before a verdict was rendered the Spanish Government had officially received the thanks of nineteen foreign governments, ranging from the gigantic empire of Russia to the Queen of Hawaii. This opened the eyes of Spain. She recognized the injustice done to Eulate. He was released from custody, was awarded one of the highest naval decorations, and placed on waiting orders. Within a short time he was made a captain in the Spanish navy and appointed chief of the arsenal in Havana.

"When it was determined to send the Vizcaya to New York Captain Eulate was placed in command. It was believed that his action at La Guayra would especially commend him to the American people. Spain thought that it could not offer a greater act of courtesy. Unfortunately the action of Eulate at La Guayra had never attracted the attention of the American newspapers. The public were in ignorance of the facts. They remembered only that Eulate had presided over the court that sentenced the Competitor prisoners to death. When the court-martial was held up by orders from Madrid, Captain Eulate resented the action. He indignantly asked for leave of absence and went into retirement at Porto Rico.

Dust in Office Buildings. Modern office buildings with mechanical or other powerful ventilation apparatus have been much troubled by dust. Experiments have been carried out for the passing of the air through the fabric of long bags. A number of bags, thirty feet long, suspended in a framework, formed a filtering medium through which the air was forced before its entry into the building. The bags hung vertically, and the dust tended to settle in the bottom of the same. A quantity of dust was thus arrested, measuring several quarts in a limited time. Great improvement resulted from the filtration of the air.

A Lotion For Weak Eyes. An old-time lotion for weak and aching eyes is a weak decoction of sage leaves. Pour a quart of boiling water over a handful of freshly picked leaves, cover closely and allow it to steep gently on the back of the range Strain and bottle.

OUR PIRATE WAR.

A Little Struggle Almost Forgotten by the Present Generation.

A little war, which seems to be forgotten by the present generation, was that waged by the Government against the West Indian pirates. They were the outgrowth of the privateer system of slave trading, and of the demoralized conditions of life upon the Spanish islands in the Antilles. These cutthroats of the sea began to make depredations upon commerce as early as 1811, when they were found to have been guilty of wrecking ships by setting false lights or giving false information, and also by preying upon very small American craft. They grew bolder during the war with Great Britain, and their captures of British ships were charged by the English to Americans and of American ships to the English. In addition to this, Spain was engaged, as usual, in cutting the throats of its subjects in nearly every Spanish possession around the Caribbean, so that civilization and society were thoroughly demoralized. It was not until 1819 that the United States waded indignant and Commodore Oliver Hazard Perry was detailed to take charge of a naval expedition. He visited the waters and began negotiations with the South American governments with a view of obtaining the necessary information. He was stricken down with yellow fever and died near Trinidad Island.

The work went along slowly. Not until five light draught vessels and three gunboats were sent to the Caribbean did operations begin in earnest. On October 16, 1821, the first engagement occurred, in which two pirate schooners were burned, three captured and forty pirates sent to Charleston. The following March four pirate barges and three launches were captured. In 1822 Commodore James Biddle arrived with other ships. The force increased worked more rapidly. Ship after ship was captured throughout the remainder of the year. In 1823 Captain David Porter took charge of the force and kept up the work. By the close of 1824 the navy had destroyed more than 200 piratical craft, had killed or captured about 2000 members of the "Brotherhood of the Coast," as they called themselves, and dismantled every pirate fort and broke up every known resort. A few of the outlaws were left, who continued to prey upon local craft, but these, in turn, soon disappeared the moment steam vessels came into use in that part of the world.—New York Mail and Express.

The Elephant's Strength. If the elephant knew his power he would be an awkward animal to have around. Some experiments conducted in London give an approximate idea of the great strength of this animal. A dynamometer was attached to a small carriage, which again was secured to stakes in the ground by strong ropes. Two draft horses were first tried, and their combined effort was registered in one ton and two tenths. From the conditions under which the horses worked the test was not considered satisfactory, so they were afterward yoked to a wagon and the wagon was hitched to the testing machine. Thus equipped the horses ran the scale up to 1.6 tons. Then the male elephant known as "Mandarin" was harnessed to the testing outfit, and registered 1.85 tons. His female companion, "Babe," was next tried. At the first pull she ran the score up to 3 tons. Stretching her self a second time, she raised the figure to 3.3 tons. She did not seem to understand the refusal of the load to budge, for in her previous experience everything she had tackled had to give way. Encouraged by her keeper, she settled down to a third pull, with the result that the dynamometer registered no less than 5.25 tons. In a subsequent comparison of these tests with human power, eighty-three men registered 2.7 tons, when the rope snapped. At the next trial the same number of men brought the record up to 3.7 tons, when the hemp again parted, with ignominious results to the operators. Finally 101 men outdid "Babe's" best effort by raising the pointer to 5.6 tons.—Chicago Record.

The Curfew in Cambridge. The Board of Aldermen of Cambridge, Mass., seems favorably disposed towards a curfew ordinance providing that children under sixteen years old shall not be in the streets after half past nine in the evening unless accompanied by a parent or guardian, or furnished with a note written the same day authorizing them to be away from home. This ordinance, which has progressed so far as enrollment, has a majority of five to three behind it, and its effects are likely to be tried. Its enforcement will call for much discretion on the part of the police, and the experience that Cambridge, as with it will doubtless influence the action of other New England cities. The objection is made that Cambridge is too much of a city for the ordinance to be enforced without hardship, but Cambridge is not too much of a city to tolerate a no-license law, and where a no-license law gives public satisfaction a curfew ordinance may work well too.—Harper's Weekly.

Was Not an Ordinary Case. A Wisconsin sweetheart named Hall has caused the arrest of a Miss Short for assaulting him with intent to deprive him of his hair and eyes. The local justice will fix the penalty, but the case should go before the Interstate Commerce Commission, as it deals directly with the "Short-Hall claws."—Denver (Col.) Times.

Cast-Off Uniforms.

Many of the cast-off uniforms of English soldiers are exported to Africa for trading purposes with the Kaffirs.

AGRICULTURAL TOPICS

Care of Late Chickens.

Late hatched chicks in the fall weather can often be safely steered over the first weakly days of premature incubation by equal warmth and a longer period of rest in artificially warmed nests on frosty mornings. These late chickens if properly cared for bring high prices for frites in January.

Time to Bud.

The best time to bud young stock is usually during its growth in summer. Buds which are set too early often push into growth, and not having sufficient time to mature their wood before winter are killed by cold. Then again the operation of budding may often be successfully performed in the spring, when vegetation is just starting into growth, or when the sap has begun to flow freely.

Thinning Early Apples.

Most of the early apples are abundant bearers, and are apt to be small. Those that are sweet are not good for much until ripe. But Early Harvest and the Twenty Ounce apple will bear picking when two-thirds grown, and make excellent pies. If this is done in all parts of the tree, plucking a few apples where they are fullest on the bough, it will make what apples remain much larger and better, besides supplying early apples for household use.

Duckweed to Clean Land.

The midsummer plowing which is required to fit land to seed with duckweed kills many of the weeds plowed under at this time, and after the grain is up its broad leaf prevents most of the annual weeds from starting. The duckweed root and stalk are not eaten, so far as we know, by any kind of worm or insect. The crop is sometimes sown three years in succession to starve out worms and wire worms, where the land is so infested with them that no other crop can be grown.

Midsummer Vegetable Gardening.

Nearly the entire list of garden vegetables may be sown in midsummer, around July and August, with a fair chance of producing excellent crops all during autumn, but no time should be lost in planting if one desires to raise such late crops, and the ground must be worked deep and thorough. Beans, beets, carrots, sweet corn, cucumbers, kohlrabi, lettuce, okra, peas, radishes, spinach, squash, turnips and some other kinds will all do well if sown during the above time, and tomatoes, cabbages and cauliflower plants should produce crops. In case of protracted drouth it may become necessary to water the young plants and the ground should be kept light and loose during the entire season.—American Agriculturist.

Marketing Early Potatoes.

To those who are unfamiliar with potato growing, the high prices which early potatoes command might seem to make it an object to dig a large part of the crop and market it while the price is up. But there are several drawbacks in marketing potatoes early. The weather is hot, and while the skins of potatoes are tender, they will rub off their jackets if handled freely, and the potatoes are almost then sure to rot. Hence they are never sent far or in large quantities. In digging potatoes early there is great waste, as only a few of the largest are marketable size, and those that will sell would grow still larger if left a few days longer in the hill. We have seen growers put their hand into a potato hill and pull off those potatoes that they found large enough, leaving the small ones. But this is only practicable on a small scale.

Practical Turkey Feeding.

During the first two or three weeks I feed them as often as three times a day, the food being a few bread crumbs, a little corn meal, mixed with a curd made from thick sour milk. Nearly every morning I mix a little black pepper with the food. After a few weeks I add some wheat, and when the fowls are about three months old, I begin feeding them clear grain, giving them wheat in the morning and corn at night.

The last two or three weeks before marketing I feed them all they will eat. My turkeys are always ready for the Thanksgiving market, as they are hatched early, well fed, get their growth, and are ready to be fattened by the first of October. A turkey will not fatten until fully grown. Last year our flock was said to be the finest in these parts. They averaged nearly fifteen pounds apiece and were half cent per pound above the market price.—M. J. Rice, in Orange Judd Farmer.

Poultry on the Range.

Bear in mind that poultry on the range during the summer are subsisting on products that the farmer cannot utilize, and at the same time are enriching the ground. If wire netting cost four times its present price it would still pay to fence in a liberal area of ground for a range every two years. Intelligence should be used in caring for poultry during the summer, as well as in the winter, and instead of allowing them to practically run wild on the farm they should be confined to ranges where the ground may be afterward put into some crop. They will pick up insects, destroy weeds by eating the seed, scratch for worms of various kinds and add fertility to the soil with their droppings. Furnish plenty of pure fresh water, green foods of the kinds they do not get on the range, some grain at night, occasionally or regularly as required, and the fowls will go into winter quarters in the fall ready for a winter's work in egg production, having cost you comparatively little for food during the summer. This sort of care means profit.

Told by the Sergeant.

From The Democrat, Grand Rapids, Mich. At the Michigan Soldiers' Home, in Grand Rapids, lives Sergeant Richard Dunn, hale and hearty, although he carries the scars of several wounds sustained in some of the battles of the Civil War. In recounting his experience to a reporter, Mr. Dunn said: "About a year and a half ago I began to have trouble with my stomach. My suffering was so intense that I tried different medicines and doctored with several physicians, but without permanent relief.

"I read an account of Dr. Williams' Pink Pills for Pale People having cured a case much like mine, and I decided to give them a trial, which I did. "After taking five boxes I was cured. I never felt better than I do now, even in my old age. You get that stomach trouble, together with rheumatism, which afterward set in, were making fast inroads upon my health, and I am satisfied that it would have been but a short time before my comrades would have been conducting the regulation funeral ceremonies over my remains, had I not changed to read of and taken Dr. Williams' Pink Pills for Pale People.

"There are several others in the home who are taking these pills and are receiving great benefit." Richard Dunn, X-ray.

Subscribed and sworn to before me, this 1st day of Nov., 1897. HENRY GINSON, Notary Public. Sergeant Dunn is perfectly willing that anyone should write him in reference to his case, provided stamp is enclosed for the reply.

All the elements necessary to give new life and richness to the blood and restore shattered nerves are contained in a condensed form in Dr. Williams' Pink Pills for Pale People. They are also a specific for troubles peculiar to females, such as suppressions, irregularities and all forms of weakness. In men they cure causes arising from mental worry, overwork or excesses of whatever nature.

Rise of the English Language.

We all know, says the St. Louis Globe-Democrat, that the English language has been growing at a remarkable rate during this century, and that it has been spreading over the whole globe. But few, however, really comprehend how rapid this growth has been. At the opening of the century French was spoken by 31,000,000 people, German by 30,000,000, Russian by 30,000,000, Spanish by 27,000,000, English by 21,000,000, and Italian by 16,000,000. To-day English is the language of 130,000,000, French of 45,000,000, German of 70,000,000, Russian of 75,000,000, Spanish of 35,000,000, and Italian of 35,000,000. In other words, during the present century English has not only risen from the fifth place to the first, but has gained enormously on the rest in relative magnitude, expanding from about 13 per cent. of the total to over 30 per cent. With this increase of the English speaking people the language itself has kept pace. Concurrent with this growth of the language there has been an equal, if not greater, increase in knowledge. Three hundred years ago one man could know all there was to be known. To-day one man can know thoroughly only one small branch of one science. This increase of knowledge has been most rapid during the last part of the present century. More than any other cause, the progress of modern invention and science has brought about an enormous extension of the language. Thousands of technical words and expressions now in common use would never have been coined but for the innumerable parts of the never ending list of new inventions in mechanics and discoveries in science. In no better way can this rapid increase in knowledge, and thereby in the number of words used, be realized than by a comparison of the first reference works with those of the present day.

Women Criminals Outnumber Men.

Russia's penal statistics show that in the dominion of the Czar the women criminals outnumber the men by nearly 50 per cent., just the contrary being the case in other countries. Most of the women criminals are unmarried, and the majority come from the laboring classes in the cities.

Mrs. Winslow's Soothing Syrup for Children

teething, softens the gums, reduces inflammation, always pain, cures wind colic, 25c a bottle.

The Mother Was Not Deceived.

He was a tired looking young man as he leaned up against a shade tree on Miami avenue, and the patrolman who came along and halted to look him over finally queried: "Well, what are you doing here?" "More or less t-t-tight," was the answer.

"What's that paper you have in your hand?" "Bank check, eh?" said the officer as he scanned it under the light. "Have you been trying to work a confidence game?" "Oh, no," replied the young man as he yawned sleepily. "That was a little racket on my own account."

"How do you mean?" "Why, I'm going with a girl who loves me for myself alone, but her mother looks at the cash side of the question."

"And you filled out this check to deceive her?" "That's what I did. I showed her that I had \$3,000 in the bank, but what did she do but post right down there and find out that I didn't have a hair pin on deposit?" "And what?" "Why, that's how I came to get tight. She showed me the door and I knew from the way she closed it behind me that the syndicate was busted, and so I went to ruin at the nearest saloon!"—Detroit Free Press.

He Was There.

Some visitors in Virginia hired an old Negro on a plantation to drive them to see the Natural Bridge. So says the Toronto Saturday Night. On nearing the bridge they asked the colored man its height and width, and after a while his replies were so vague that one of them said: "Now, Sam, confess; you never been so near the bridge before?" "Lord, suh!" he replied, "I member coming here to help de day dey lay de corner-stone; but I ain't took notice 'bout how high de bridge was built, nor how far 'cross 'twidz. Of co'se, I ain't come heah much sence; but dis nigger never goin' to forget dat day."

No-To-Bac for Fifty Cents.

Guaranteed tobacco habit cure, makes weak men strong, blood pure. 50c, \$1. All druggists.

A tax of sixpence per head is levied

on all passengers landed in the Isle of Man. It is collected from the steamship companies carrying the passengers.

Ever Have a Dog Bother You

When riding a wheel, making you wonder for a few minutes whether or not you are to get a fall and a broken neck? Wouldn't you have given a small farm just then for some means of driving off the beast? A few drops of ammonia shot from a Liquid Pistol would do it effectively and still not permanently injure the animal. Such pistols sent postpaid for fifty cents in stamps by New York Union Supply Co., 135 Leonard St., New York City. Every bicyclist at times wishes he had one.

THE EXCELLENCE OF SYRUP OF FIGS

is due not only to the originality and simplicity of the combination, but also to the care and skill with which it is manufactured by scientific processes known to the CALIFORNIA FIG SYRUP CO. only, and we wish to impress upon all the importance of purchasing the true and original remedy. As the genuine Syrup of Figs is manufactured by the CALIFORNIA FIG SYRUP CO. only, a knowledge of that fact will assist one in avoiding the worthless imitations manufactured by other parties. The high standing of the CALIFORNIA FIG SYRUP CO. with the medical profession, and the satisfaction which the genuine Syrup of Figs has given to millions of families, makes the name of the Company a guaranty of the excellence of its remedy. It is far in advance of all other laxatives, as it acts on the kidneys, liver and bowels without irritating or weakening them, and it does not gripe nor nauseate. In order to get its beneficial effects, please remember the name of the Company— CALIFORNIA FIG SYRUP CO. SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y.

"Cleanliness is Nao Pride, Dirt's Nao Honesty." Common Sense Dictates the Use of

6% GOLD BONDS,

Payable semi-annually at the Globe Trust Company, Chicago, Ill.

These bonds are a first mortgage upon the entire plant, including buildings, land and other property of an Industrial Company located close to Chicago.

The Company has been established for many years, is well known and doing a large and increasing business.

The officers of the Company are men of high reputation, esteemed for their honesty and business ability. They have made so great a success of this business that the bonds of this Company are rarely ever offered for sale.

A few of these bonds came into our hands during the hard times from parties who had purchased them several years ago. We offer them in issues of \$100.00 each for \$90.00 and accrued interest.

For security and a large interest rate these Industrial Bonds are recommended as being among the best.

First-class bonds and securities of all kinds bought and sold.
