

United States Legation in Berlin.
 The United States government has been inquiring through the proper channel as to the cost of purchasing or erecting its own buildings for the embassies and legations and several of the large consulates-general in Europe. It may astonish many to learn that Berlin was found the most expensive capital in the world, so far as the cost of real estate and of buildings was concerned. The only really suitable building found there for the purpose would cost \$800,000. The Russian embassy building in Berlin, which is located Unter den Linden, and which is, indeed, a veritable palace, so spacious and stately is it, would cost about \$4,000,000 to build to-day, ground and all. But it is, too, roomy and elegant enough to have served repeatedly for traveling quarters for Russian Czaars passing through Berlin. What a miserable contrast forms the excuse for an office which the United States embassy occupies in Berlin, in Kronen strasse, a street of small shops. In the basement of the building is a barber shop, on the ground floor a wine and schnapps shop, and above the embassy offices reside a score of private persons.

Possibly no man is as anxious to go to war as he pretends to the reporters.

Hip Disease

Had Five Running Sores—Could Not Walk Without Crutches.
 "I suffered from hip disease and had five running sores on one of my hips. I could not walk without crutches for several weeks at a time. I began taking Hood's Sarsaparilla and it has accomplished a perfect cure. I am now well and have no trouble from impure blood." Annie Robert, 49 Fourth Street, Fall River, Mass. Remember!

Hood's Sarsaparilla
 Is America's Greatest Medicine. \$1; six for \$5.
Hood's Pills cure biliousness, indigestion.

Try Allen's Foot-Ease.
 A powder to shake in the shoes. If you have smarting feet or tight shoes, try Allen's Foot-Ease. It cools the feet and makes walking easy. Cures swollen and swelling feet, blisters and callous spots. Relieves corns and bunions of pain and gives rest and comfort. Try it to-day. Sold by all druggists and shoe stores for 25c. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 50c a bottle.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. 50c trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 361 Arch St., Philadelphia, Pa.

After physicians had given me up, I was saved by Pisko's Cure.—RALPH ENRIQ, Williamsport, Pa., Nov. 23, 1931.

A Michigan pastor recently surprised his congregation with this announcement: "Remember our quarterly meeting next Sunday. The Lord will be with us during the morning service and the presiding elder in the evening."

No-To-Bac for Fifty Cents.
 Guaranteed tobacco habit cure, makes weak men strong, blood pure. 50c. \$1. All druggists.

Vacant Land in the United States.
 The report of the Secretary of the Interior shows that only a little more than one-half of the public domain of the United States is either reserved or appropriated. The area still remaining vacant amounts to 691,343,953 acres, without including Alaska, which is supposed to embrace nearly 400,000,000 acres more. The entire area of the United States is placed at 1,835,017,692 acres. Of this, 741,702,365 acres is now owned by individuals or by corporations or by states, or has passed out of the control of the general government. The amount reserved for schools, Indians, military and naval purposes, railroad grants, parks, forest reservations, etc., including all territory reserved from sale for any purpose whatsoever, amounts to 132,441,744 acres, so that, taking the reserve land and the vacant land together, only about one-half of the area of the United States has actually passed out of control of the government, and if Alaska is included, the unoccupied area is larger by 300,000,000 acres than that which is occupied.—San Francisco Argonaut.

THE DUTY OF MOTHERS.

Daughters Should be Carefully Guided in Early Womanhood.

What suffering frequently results from a mother's ignorance; or more frequently from a mother's neglect to properly instruct her daughter!

Tradition says "woman must suffer," and young women are so taught. There is a little truth and a great deal of exaggeration in this. If a young woman suffers severely she needs treatment and her mother should see that she gets it.

Many mothers hesitate to take their daughters to a physician for examination; but no mother need hesitate to write freely about her daughter or herself to Mrs. Pinkham and secure the most efficient advice without charge. Mrs. Pinkham's address is Lynn, Mass.

The following letter from Miss MARY F. JOHNSON, Centralia, Pa., shows what neglect will do, and tells how Mrs. Pinkham helped her:

"My health became so poor that I had to leave school. I was tired all the time, and had dreadful pains in my side and back. I was also troubled with irregularity of menses. I was very weak, and lost so much flesh that my friends became alarmed. My mother, who is a firm believer in your remedies from experience, thought perhaps they might benefit me, and wrote you for advice. I followed the advice you gave, and used Lydia E. Pinkham's Vegetable Compound and Liver Pills as you directed, and am now as well as I ever was. I have gained flesh and have a good color. I am completely cured of irregularity."

LIVING RENT FREE.

Philadelphia Man Who Went Broke Because He Did Not Pay.

A Philadelphia man has lived ten years in a house for which he paid no rent and no taxes. It belonged to the gas company, and he had paid rent regularly until the property of the company was transferred to the city. He says himself: "I don't remember how long it is since I stopped paying rent. It was when the gas office was on 7th street. I went there one day with my rent and offered it to Mr. White, who had charge of the gas company's real estate, but he refused to take it, and told me that it was to be paid at the city treasurer's office in the future. I took it up there and a young man there said he could not take it, as he could not find record of any such house. He told me that they would notify me when they were ready to take my money. I went back to Mr. White and he advised me to go home and wait until I heard from him. Well, I waited. Nobody came to collect money until recently, when the city discovered its title and sent a man to collect. The tenant got a day to consider and promptly skipped. But his experience with a free rent does not seem to be satisfactory. If we may trust to his wife. "Yes," says she, resentfully, "he thought it was a snap, and look where he is now—no money, no business, looking for a job, and a family to support. He wouldn't take my advice and move to where business was good, but he bugged his snap and stuck here in that stagnant neighborhood and spent money on repairs for the house and didn't make any money."—Philadelphia Record.

Misinformation in Australia.
 The following account of the proper way of reaching the Klondike is taken from an Australian newspaper: "The real starting point for the Klondike is Spokane. There the traveler takes a canoe, by which he voyages to Vancouver, B. C. At the latter point he takes a sailing vessel direct to Dawson City."

FIELDS OF ADVENTURE.

THRILLING INCIDENTS AND DARING DEEDS ON LAND AND SEA.

General McLeer at Bull Run—First Taste of War of the Commander of the Second Brigade of the New York State Guard—Struggle With a Mad Flagman.

One man lay in the rough, canvas-covered ambulance, relates the New York Sun. He was a private of the Fourteenth of Brooklyn, a slender, boyish fellow with a ragged red streak across his forehead and a blood-soaked spot on the breast of his blouse. There was a hole in the canvas side of the wagon, and the wounded soldier could see a queer weird panoramic movement of uniformed figures outside. The rattle of small arms and the heavier roar of artillery came to his ears. The dry smoke of battle drifted in under the roof of the vehicle and tortured his parched throat. It was the day of Bull Run.

The noise of the fighting sounded louder. A shell screamed over his head. Several bullets tore through the canvas walls beside him.

"This is getting warm," thought the private.

Then there was a thunder of hoofs on the turf and a troop of cavalrymen halted at the side of the wagon. The officer in command and several others whose uniforms showed them to be regulars lifted into the wagon and laid on the floor beside the private of the Fourteenth another wounded man.

"Major Tillinghast, of General McDowell's staff, is in that ambulance," said the commander of the troopers to the driver of the wagon. "Get him out of this inferno and answer for his safety to me."

The wagon began to jolt from side to side, and its two passengers knew it was in motion. Each step the horses took caused intense pain to the wounded. The man of the Fourteenth turned to look at his fellow in misery. The left arm of the officer had been torn away at the shoulder, and his white face was drawn and haggard. The ambulance was being drawn away at great speed. It was in the midst of the rout. Several times it had to be pulled suddenly to the roadside to clear the way for a detachment of regular cavalry dashing to the front to cover the retreat. The driver was hurling expletives and lashing his horse.

The private lost consciousness. When he opened his eyes again he could hear nothing. He thought his hearing must be gone and turned to look at Tillinghast. The Major was still conscious and the lines were deepening in his face. He slowly reached for the pistol in his holster and painfully lifted it. In an instant the private soldier grasped the significance of the movement—the agony was too much for Tillinghast and he was going to end it.

"For God's sake, man, don't do that!" exclaimed the soldier, grasping the wrist of the Major. The latter said nothing, but tried to free his hand. Then began a fight between the two wounded men, one struggling for death, the other trying to prevent a suicide. Neither man had strength enough to rise, and they fought for the possession of the pistol, lying on their sides. Presently the officer's hold on the weapon relaxed and he fell back with a groan. The private gathered his strength for a last effort and threw the revolver from him. Then everything danced in a red mist and unconsciousness followed.

When reason returned to the soldier it was evening. A tiny bird was sitting on the tailpiece of the wagon, singing. The private gazed at the figure beside him. It was still. He reached forward and touched the officer's face. It was cold. Then with a shiver he lifted himself and clambered out of the wagon. The horses and the driver were gone. The vehicle stood beside a clump of trees. The private staggered through the trees and made his way forward. How long he tramped he never knew, but he finally felt fainting into the arms of a Union picket. He was taken to a hospital, where he spent several months. What became of the deserted ambulance and its dead was never known, but the private who received his baptism of fire on the field of Bull Run recovered to fight again and he was wounded not once, but often. He still lives, although his body is scarred and seamed and one of his coat sleeves is empty. He is General James McLeer, the Brigadier in command of the Second Brigade of the National Guard, and he is as willing to-day to fight the Spaniard as he was in the days of his youth to battle on the Federal side. The other day he told for the first time this story of his first real taste of war.

Fought a Madman on Flying Train.

On top of the cars of a rapidly moving freight train a brakeman fought for his life with a madman who had become suddenly insane.

The brakeman saved his life by a hair's breadth. He was thrown from the train, and lay for a time stunned and sorely bruised across the adjoining tracks. When he recovered consciousness another freight train was thundering down upon him. He managed to crawl out of its way just as it swept by him, the wheels missing him by barely an inch.

Joseph Kessler, the brakeman, lives at Bordentown, N. J. Simpson Perrine, the madman, has his home in Dutch Neck. The freight train was running from Camden to Jersey City. It was nearing Rahway and rushing along at thirty miles an hour when Perrine's mad fit came upon him. He seized a coupling pin, and, without a word of warning, dashed at Kessler. Both men were then standing on top of the same car. So sudden was the attack that Kessler had no time to turn and run. He ducked his head, escap-

ing the blow that might have crushed his skull, and then seized the madman around the waist.

There ensued a fierce struggle. Kessler did not cry out. He knew there was faint hope of making himself heard, and he heeded all his breath for what it seemed to him was a wrestle for life. Each strove to maintain his footing and throw the other from the train.

Perrine's frenzy lent him strength. Kessler felt himself being overpowered. With a desperate effort he shook himself loose from the maniac's grasp, turned and ran toward the caboose, at the tail end of the train.

The madman followed him. It had now become a race for life. Over the cars they ran at full speed, leaping from one car to another.

When only one car separated him from the caboose Kessler stumbled. In a moment Perrine was upon him. Then he felt himself falling, and remembered no more until the noise of an approaching freight train sounded in his ears, and he crawled off the tracks just in time to escape being cut in two.

Somebody on the train saw him. It was stopped after it had passed him, and he was taken on board and told his story.

Meanwhile, on the other train, Perrine had entered the caboose and made a murderous assault on the conductor. The train's crew went to the latter's assistance. Perrine was overpowered and securely bound. He will be committed to an asylum. Kessler may be laid up for some time, but his injuries, it is said, are not serious.

The Bear Knew What Would Happen.

News came to a teamsters' camp near Nicasious Mountain, Maine, that there was a bear in the spruce. Next morning every man and dog started on the hunt. The dogs overtook the bear, but he sent them home in a hurry. He killed four and got away before the men came up, having taken the old tote road around the head of Nicasious Lake. More than half the hunters turned back here. Half of those who stayed struck across the ice on Nicasious Lake, which was knee deep under water, hoping to head the animal off on the further side, while the remainder followed on after the fleeing bear.

For half an hour they tramped the woods. Then, looking into the lake from a high hill, they saw the bear neck deep in water. Sometimes he walked upon ice and then, getting tired of walking, he swam for a half mile or so. Then every man made a dash for the lake, running on the submerged ice in the hope of overtaking the bear before he could get ashore. Though the bear saw what they were doing, he seemed to display no anxiety. Swimming or walking, as the whim took him, he kept on for the upper end of the lake. The men were gaining on him rapidly and were almost within easy shot when the ice gave way. It took the party more than an hour to get on shore and build a fire. As a good portion of their firearms was in the bottom of the lake and the bear had disappeared the party went back to work the next day, fully satisfied that the bear would never be caught. The party which had crossed the lake further down had grown tired of waiting, and moved up along the shore. It was getting dark when the leaders came out of a spruce belt and almost ran against a wet and bedraggled bear. The man fired and missed, and then all the men gave chase. The bear played with them until dark, and then swam out into the lake.

Encounter With a Rogue Elephant.

The following from Outing is the native tracker's version of the death of a dangerous rogue elephant:

"The people say we coming down, and because we were alone and came with haste they perceived that peril was at hand. Therefore, men ran in from their fields, and the inhabitants gathered themselves together to offer salutations. But Kummee's Sahib listened not, nor took notice of offerings. With a voice like a great wind he ordered them to fly, which they did with alacrity, many taking refuge in a stone tower.

"At this time I observed that the Lord Kummee had become very calm, and when people prayed for him on the tower, and called down blessings upon his head, he commanded them to be silent without vehemence, and seamed and one of his coat sleeves is empty. He is General James McLeer, the Brigadier in command of the Second Brigade of the National Guard, and he is as willing to-day to fight the Spaniard as he was in the days of his youth to battle on the Federal side. The other day he told for the first time this story of his first real taste of war.

AGRICULTURAL TOPICS.

Ornamental Plants From Seed.

The castor oil bean (ricinus) is one of the best of ornamental leaved plants which may be grown from seed and bloom the first year. They grow rapidly and make a fine hedge or screen if planted in open rich soil in a dry situation. As the young plants do not bear transplanting well the seed should be planted directly where the plant is to remain, in the open ground, when the weather becomes warm. The richer the soil the more rapid the growth of the plant and the more brilliant the color of foliage and stalk. According to variety the plants grow from six to eight feet high, and have foliage of shades of green, red and purple. Nicotiana affinis is also readily grown from seed. The plant grows to a height of three or four feet, its broad green leaves and blossoms of white being very attractive. The soil should be rich and well-drained. A packet of seeds of each variety, or rather class, costing ten cents for the best variety, will furnish a display equalling more costly palms and foliage plants.

Heredity in Stock Breeding.

The attention of the stock breeder who is striving for improvement in the character and quality of his stock must be directed to the study of the individual characteristics of his breeding animals, with a view to ascertaining not only their merits and defects, but the causes of such discernible individual characteristics, whether they are hereditary or acquired. Also he must apply himself to the study of the indications of invisible qualities, and to testing for such characteristics to learn if the invisible qualities are present as indicated or not. In producing high-class stock to be used for further purposes of improvement attention of the breeder must be directed to a study of ancestry to ascertain what latent qualities his stock is likely to possess—that the undesirable latent qualities may be overcome and the best may be brought into activity and usefulness.

A study of the formation of any breed brings us to the conclusion that the value of the breed is due to selection, the breeding of blood lines and feeding conditions. To maintain and strengthen the present degree of excellence it is necessary to bring to bear equal method and system. This can only be accomplished by working along with nature and building on strong foundations.—C. H. Elmendorf, in Nebraska Farmer.

Care of Young Pigs.

If young pigs have plenty of exercise and the right kind of food there is no danger of over-feeding. A small quantity of corn ground with wheat or rye and middings, and the whole mixed with milk, is a first-class food for young pigs. The common field varieties of peas are also an excellent food for pigs, young or old. Sow at the rate of two bushels per acre and cover four inches deep, sowing after the peas are planted three pecks of oats per acre, well harrowed in, to serve as a support for the peas.

The food for pigs of all ages when not being fattened should be that which has bulk. Middlings, milk, ground barley and swill for pigs, and for shoats and breeding stock, fed in addition to other roots, cooked and mixed with oat clover hay. For young pigs, ground oats with the hulls sifted out is an excellent food. Have part of the feeding pen so arranged that a portion of the grain food may be scattered over it broadcast to give the pigs exercise in feeding it. A run of liberal dimensions should be provided for young pigs if they are kept in confinement, in order to get the amount of growth from the feed given to be profitable, otherwise liberal feeding will only result in an excess of fat before the formation of the desired amount of bone and muscle.

Colic in Horses.

It is stated on good authority that twenty-five per cent. of the horses that die each year are victims of colic. During the spring the trouble is frequent among farm horses, although it is usually wild colic, but this may turn into the nervous colic so generally fatal unless prompt and intelligent treatment is given. The stomach of the horse is peculiarly susceptible to the changes of food that are frequently made in the spring, and that invariably causes an attack of indigestion more or less violent. Any change in food should be brought about gradually, and so also should radical changes in the work required of the animal. It stands to reason that a horse lightly fed for two or three months of winter with but little work to do is not in fit condition to put into the field for ten hours' work at heavy plowing. Give horses wholesome food regularly and according to the work done by them. Keep them from exposure to draughts of cold air, especially when very warm; give only pure water to drink, and they are practically insured against colic.

Should the colic attack the horse, the following treatment will give relief in most cases. An injection of clear water of the same temperature of the stable should first be given, followed by a pill made of five drams of powdered Barbadoes aloes, one dram mercuric chloride and enough linseed meal to make a stiff pill with the addition of a little water. Rub belly and flanks with coarse cloth or sackcloth if the animal is chilled. After this treatment the horse should not be worked or violently exercised for at least twenty-four hours. If the attack does not succumb to this treatment it is sufficiently severe and dangerous to need the immediate services of a skilled veterinarian.

A Fatality Avoided.

From the Democrat, Goshen, Ind.

When neuralgia is accompanied by a dull, heavy pain near the heart, frequently becoming intense, it generally terminates fatally. Mrs. Nancy Flynn, who lives near Goshen, Indiana, survived such an attack and her advice is worth heeding.

"In the fall of '92," she said, "I began to have trouble with my heart. There was a sharp pain in my breast which became rapidly worse. The doctor was puzzled and put me under the influence of opiates. These sharp attacks followed one another at intervals and I became weak and had a haggard look. I was constantly in pain, seldom slept and had no appetite.

"At the end of two years I was confined to my couch most of the time and the doctors agreed that my death was only a matter of a short time.

"One day I noticed in a newspaper an item about a woman having been cured of neuralgia of the heart by Dr. Williams' Pink Pills for Pale People and I concluded to try them.

"When I had finished one box I noticed an improvement in my condition, and when I had taken twelve boxes I was completely cured. 'Those pills have done for you what we could not do,' said one of my physicians, 'they have saved your life.'

"That was twenty years ago and my heart has not troubled me since. I believe I owe my life to Dr. Williams' Pink Pills for Pale People, and I take pleasure in telling others about them.

"Among the many forms of neuralgia are headache, nervousness, paralysis, apoplexy and locomotor ataxia. Some of these were considered incurable until Dr. Williams' Pink Pills for Pale People were formulated. To-day thousands testify to having been cured of such diseases by these pills. Doctors frequently prescribe them and all druggists sell them.

How Commanders Communicate by Wire from Ship to Ship.

Telephones may supersede the old system of flag signals as a means of communication between ships at sea. Successful experiments have been made by Commander B. G. O. Tupper of the British navy which seem to prove that the system is adapted for the purpose. Commander Tupper used a kite in his experiments, and this seems to be the only feasible means. The kite used was an ordinary one that differed but slightly from those used by American boys in the spring and fall, except that it had no tail. The kite was six feet long and three wide at its broadest part. Two lines were attached to the kite where the tail would ordinarily have been. One of these lines was retained on board of the Daring, the torpedo boat destroyer under Commander Tupper's command, from which the experiments were conducted. It was found that with the wind between the two lines it was easy to drop letters or even a hawser on another ship, and in this way to establish communication. When this experiment had proved successful Commander Tupper made use of a wire. The end of the wire which the kite bore away from the ship was dropped upon the deck of H. M. S. Dauntless, where it was secured by the electrician of the ship and attached to a telephone apparatus in waiting. The other end, which had re-

mained aboard the Daring, was also attached to a telephone, and as soon as the task had been completed the communication between the two ships was perfect. Secured by the two lines, the kite remained suspended for four hours, during which time communication between the two ships was uninterrupted. Commander Tupper has made a report of his experiments with the kite telephone and declares that it means that the present method of signaling with flags will become obsolete. If telephone wires can be employed, he sees no reason why telegraphic communication should not be made in a similar manner, and the ships of a fleet be placed in communication with each other.

Among contracts recently placed by the Government were several amounting to 250,000 hessian bags, to be used for fortification purposes.

Don't Tobacco Spit and Smoke Your Life Away.
 To get tobacco easily and forever, get the magic, full of life, nerve and vigor, take Nic-Hac, the wonder-worker, that makes weak men strong. All druggists, 50c or \$1. Cure guaranteed. Booklet and sample free. Address Sterling Remedy Co., Chicago or New York.

The number of asteroids known to astronomers is 423. Some of them have not been observed since their discovery and are practically lost.
