The Fall

is sudden changes, its hot days and nights, dampness and decaying tion, is peculiarly trying to the A good Fall Medicine is as imit and beneficial as Spring Medicine. Sarsaparilla keeps the blood pure, off malaria, creates a good appetite, refreshing sleep; and maintains the tone through this trying season.

Hood's Sarsaparilla

Hood's Pills cure all liver ills. 25 cents

I use Piso's Cure for Consumption both in my family and practice.—Dr. G. W. PATTER-son, Inkster, Mich., Nov. 5, 1894.

A record price for old silver was es-tablished in London recently by the sale of an Elizabethan seal top silver spoon, weighing an ounce and a half, for \$150—that is, for \$100 per ounce.

The Fields of Sport

From the fields of sport we go to bed and get up full of pains and aches. The next night, by the use of St. Jacobs Oil, we are soothed to sleep and get up cured.

An investigation of the statement published in the German newspapers hat 3s cases of trichinosis which had occurred in Saxony were due to the ise of American pork has shown that all the cases in question were due to one trichinosis Saxon hog.

Dr. Seth Arnold's Cough Killer is a won-gerful medicine for Weak Lungs.—IDA ARROWS. Deer Grove, Ill., March 21, 1898

The falling of a leaf is brought about by the formation of a thin layer of vegetable tisue at the point where the leaf stem joins the branch of the tree. After the leaf ceases to make starch and sugar for the tree, the tisue begins to grow, and actually cuts the leaf. The falling of ripe fruit is dependent upon the same process.

pendent upon the same process.

Coughs of an Engine.

The cough, or puff, of a railway engine is due to the abrupt emission of waste steam up the chimney. When moving slowly the cough can of course be heard following each other quite distinctly, but when speed is put on the puffs come cut one after the other much more rapidly, and when eighteen coughs a second are produced they can not be separately distinguished by the ear. A locomotive running at the rate of nearly seventy miles an hour gives out twenty puffs of steam every second that is, ten for each of its two cylinders.

His Sentiments.

Little Willie—Pa, what is that saying about its being "better to have loved and lost—" Mr. Henpeck (feelingly)—It is better to have loved and lost than never to have lost at all,—

MRS. LUCY GOODWIN

DEAR MRS. PINKHAM:—I wish you to publish what Lydia E. Pinkham's Vegetable Compound, Sanative Wash and Liver Pills have done for me.

I suffcred for four years with womb trouble. My doctor said I had falling of the womb. I also suffered with nervous prostration, faint, all-gone feelings, palpitation of the heart, bearing-down sensation and painful menstruation. I could not stand but a few minutes at a time.

When I commenced taking your med.

beine I could not sit up hair a day, but before I had used haif a bottle I was up and helped about my work.

I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and used one package of Sanative Wash, and am cured of all my troubles. I feel like a new woman. I can do all kinds of housework and feel stronger than I ever did in my life. I now weigh 131½ pounds. Before using your medicine! pounds. Before using your medicine for weak woman that ever was, and my advice to all who are suffering from any female trouble is to try it at ones and be well. Your medicine has proven a blessing to me, and I cannot praise it enough.—Mrs. Lucy Goodpury,

NO-TO-BAC Sold and guaranteed by all drug

ACRICULTURAL TOPICS

others, and this is worthy of notice in locating.

Many persons are situated in the midst of excellent bee pasturage, where bees would prove extremely profitable if they would adopt them. There are hundreds of acres of alfalfa clover in many parts of the West that no bees have ever seen. Tons of honey might be the result if enough bees were in reach of it to secure the nectar, which of course is a total loss otherwise. Not only this, but the presence of bees to pollenize the blossoms of all seed plauts, and also all fruit bearing trees and shrabs, would well pay all expenses of the same, even if they did not store a pound of honey. There is not a scientific fruit grower or seedsman of the present time who understands this, but is profiting by the experiment.—Farm, Field and Fireside.

this, but is profiting by the experiment.—Farm, Field and Fireside.

Fall Pruning.

While the general practice is to do the main pruning of trees in the spring, much of the work can be done to the best advantage in the early fall, when it is possible to see just where the tree is making the growth that is valueless. This fall pruning is especially valuable for young trees, which must be directed in the form and shape desired at an early age. It is not meant that any heavy pruning should be done in the fall, but mainly a pinching back of the young sprouts as they grow, removing the buds on others and gradually shaping the tree and regulating the supply of the fruit on those that come into bearing for the first time. The growth of the young tree should first be upward, then outward, and the removal or shortening of any lateral branches that show a tendency to shoot out beyond all the others will prevent sapping of the tree's vitality. Several branches of about equal size and length will form a well balanced and healthy tree, and any additional growth is but a drain.

Line Not a Fertilizer.

growth is but a drain.

Lime Not a Fertilizer.

Considerable lime is used on farm lands, and usually to great advantage, but the general opinion is that it may be used freely in pluce of fertilizers. This is a mistake, for, strictly speaking, lime has no value as a fertilizer. Its use is purely and simply to set loose and make available for plant food fertility already in the soil. Its value will be most noticeable on heavy, rather moist lands, usually rich in nitrogen, but which requires a loosening power to make it available as plant food, and lime does this work better than anything that can be applied. Lime neutralizes the free acids and sweetens the soil. It hastens the decomposition of organic matter so largesweetens the soil. It hastens the de-composition of organic matter so large-ly found in the soils described, and makes it available as plant food, be-sides readering such soils more porous and open. On the other hand, if used in too large quantities continuously, or to the exclusion of fertilizers or man-ures, it soon robs the soil of its fertil-ity and becomes a detriment rather than a help.

ures, it soon robs the soil of its fertility and becomes a detriment rather than a help.

How to Pasteurize Milk Easily.

Milk may be easily pasteurized by using the same apparatus employed in cooling and aerating, except that instead of running cold water through the machine use steam. The milk will become hot. The temperature can be controlled by regulating the amount of steam let into the aerator. The temperature of the milk will be about 150 degrees when it reaches the trough, but by the time it has fallen into the can, it is cooled to 140 degrees. This is practically the pasteuring temperature, but if the tubercle bacilli are to be destroyed, the can to receive the milk should be hot and sterilized, and the cream can be protected by an inverted funnel, and it may be that a plate of glass should be placed in front of and near the ridges of the cooler. Milk should stand in the can about twenty minutes, when it should be turned back into the aerator, and cooled in the ordinary way. The New Jersey experiment station finds this method very efficacious, and particularly applicable to small dairy farms where a regular pasteurizing apparatus is not at hand.—Orango Judd Farmer.

Common Sense Datying.

farms where a regular pasteurizing apparatus is not at hand,—Orango Judd Farmer.

Common Sense Datrying.

The basis of profitable dairying is a herd of high-grade cows. Beyond this there is nothing but proper treatment and feeding for the cows and wise handling of the butter. Dairy cows should be stabled at night and on cold and stormy days, with plenty of bedding for warmth and cleanliness. A feed of ten pounds of clover hay and ten pounds of shredded cornstalks, with what unshredded stalks they will eat clean from the rack, is enough food for the average cow per day. A daily feed of grain consisting of five pounds of wheat bran and five pounds of corn and cob meal ground fine, will bring good results. The quantity of food is not arbitrary, as some cows will require more and some less. Water twice a day. With the milk use a separator, a tester and scales, and dispose of, as unprofitable, every cow that does not come up to the standard under these tests. Raise the heifer calfs to increase the herd. Pack the butter product carefully and have it of a quality that will command attention in the market. Mark it so that those who buy may know where it comes from and they will soon get in the habit of asking for it. Then the dairy will be found a most profitable part of the farm.—Atlanta Journal.

In the United States, in speaking

In the United States, in speaking of rivers, the word "river," succeeds the name of the stream, i. e., Mississippi River, Hudson River, etc., while in Europe it precedes as, River Thames, River Rhine, River Seine.

THE SOLDIER'S TENT.

thee!" But he answered: "I have my sword."

Then the rustling Wind drew softly near, Breathed round him with whispers light; "I am the sighs of thy mother dear, The sighs of thy mother am I, dost hear?" But he answered: "I have the fight."

Then Night sank down from the dark'ning sky Round the siceper, and murmured: "Rest!"

"Rest!"
the sweetheart's veil on thy face doth lie."
the answered: "No need of it have I,
For the banner doth cover me best."

The River came rolling clear and wide, By the tent, with its silver flood; Aud said: "I am water, the cleansing tide, More blessed than aught in the world be-

side."
But he answered: "I have my blood."

Then Sleep drew near to his tent, and low She whispered with soothing breath; "I am Sleep, the healer of ev'ry woe. The dearest treasure of man below." But the soldier replied: "I have death!" —Carmen Sylva, in Frank Leslie's Popular Monthly.

HUMOR OF THE DAY.

Harvey—"George said he kissed you. Did he?" Flora (ambiguously)—"Not much."—Boston Transcript.

Professor of Chemistry—"II anything should go wrong in this experiment we and the laboratory with us might be blown sky-high. Step un closer, gentlemen, so that you may be better able to follow."—Stockholms Dagblad.

"My brain is on fire," tragically exclaimed Mrs. Bobkins, as she threw herself down upon the sofa. "Why don't you blow it out?" absent-mindedly replied Bobkins, deeply absorbed in the evening newspaper. And then he dodged a flying hair-brush.

Riding in an omnibus up Regent street last evening I heard an old lady annoying the other passengers by her remarks. The conductor remonstrated with her, saying, "Ma'am, remember you are in a public vehicle, and behave as such,"—London Spectator.

Little Eddie—"Your nose looks just the same as it always did." Mr. Bparkleigh—"Of course, Why shouldn't it?" Little Eddie—"I heard mamma say, when Mr. Willikins came to see sister May, night before last, that your nose was out of joint."—Chicago News.

Hardtack, Postage Prepaid.

Hardtack, Postage Prepaid.

Miss Birdie Daly, of Wichita, has received through the mails a piece of hardtack from her brother with the troops at Santiago. There was no covering over-the hardfack. A postage stamp was stuck on one corner and the address was written across it in ink. People who have had ironbound Christmas boxes smashed up in the mail may now begin to realize the hardness of Uncle Sam's bread,—Kansas City Journal.

Land of Theatres.

There are more theatres in proportion to its population in Eurly than sleewhere in the world.

Kiondikers Turn Yellow.

A letter has been received from William Henderson of Denver, who went to Dawson City early in the rush. The letter is under date of July 9. The writer states that he has been mining on Dominion creek, where he has a very promising claim, and had come to Dawson for his supplies. At Dawson Mr. Henderson met Frank Haug, another Denverite, who had just got in after being "snowed up" for nearly a year. He also met Stanley Peace of this city and others. All the business in the way of transportation in that part of the Klondike is done by dogs, and Mr. Henderson states that they are considered very valuable. He witnessed a sale of two for \$1,000, but fared better himself, getting three for \$100 aplees. "There are more dogs in Dawson," he writes, "for the size of the place than in any city in the world. "This is a hard community," he says, "for health, Hundreds of people seem all broken down. By looking at a man you can teil whether he has been here long or not. Those who have been turn yellow."

Mr. Henderson expects to return to Denver next summer.—Denver Times.

Mr. Henderson expects to return to Denver next summer.—Denver Times.

Must Love Men.

Every relation to mankind, of hate or scorn or neglect, is full of vexation and torment. There is nothing to do with men but to love them; to contemplate their virtues with admiration, their faults with pity and forgiveness. Task all the ingenuity of your mind to devise some other thing, but you can never find it. To hate your adversary will not help you; to kill him will not help you; nothing within the compass of the universe can help you but to love him. But let that love flow out upon all around you, and what could harm you? How many a knot of mystery and misunderstanding would be united by one word spoken in simple and confiding truth of heart! How many a solitary place would be made glad if love were there, and how many a dark dwelling would be filled with light!
