

Catarrh

In the head, with its ringing noises in the ears, buzzing, snapping sounds, severe headaches and disagreeable discharges, is permanently cured by Hood's Sarsaparilla. Do not daily with local applications. Take Hood's Sarsaparilla and make a thorough and complete cure by eradicating from the blood the scrofulous taints that cause catarrh.

Hood's Sarsaparilla Is America's Greatest Medicine. \$1; six for \$5. Hood's Pills cure all Liver Ills. 25 cents.

Letteries originated in ancient Rome.

No-To-Bac for Fifty Cents. Guaranteed tobacco habit cure, makes weak men strong, blood pure. 50c. All druggists.

The Paris Petit Journal declares that it is in a position to assert that up to the present moment no less a sum than \$7,000,000 francs has been expended upon the Dreyfus agitation, a great deal of which, it affirms, has been supplied by England.

Have used Dr. Seth Arnold's Cough Killer for Whooping Cough with good results. D.C. KEMP, 1075 No. Carey St., Baltimore, Md., July 14, 1898.

Hookey's Friend, Lord de la Warr.

Lord de la Warr, whose name has become well known through the Hookey scandals, is not yet thirty years old, yet he has had a varied and in some respects remarkable career. At first he tried the inviting but difficult game of diplomacy, and failed. Then he went out as a commissioner on pearl fishing for a well-known jeweler. Then he tried telegraphy. But he has been signally successful in nothing. In person Lord de la Warr is tall, thin, with a small, light mustache and slightly bent shoulders. When a boy he used to play with the dukes of Clarence and York. Hide-and-seek was their favorite amusement. The Wales boys also wanted to win, and being bigger and older they occasionally found it convenient to use a little healthy coercion. And once the dukes of York soundly thrashed Lord de la Warr because he would not let him win. From present appearances it looks as though Hookey were also thrashing Lord de la Warr for not letting him win.

Just What He Said. Jones—It's six months since I lent you that ten, and you said you only needed it for a short time." Smith—Well, that's all right. It lasted only half an hour.—New York World.

STRONG STATEMENTS.

Three Women Relieved of Malarial Troubles by Mrs. Pinkham.

From Mrs. A. W. SMITH, 50 Summer St., Haddford, Me.:

"For several years I suffered with various diseases peculiar to my sex. Was troubled with a burning sensation across the small of my back, that all-gone feeling, was despondent, fretful and discouraged; the least exertion tired me. I tried several doctors but received little benefit. At last I decided to give your Lydia E. Pinkham's Vegetable Compound a trial. The effect of the first bottle was magical. Those symptoms of weakness that I was afflicted with, vanished like vapor before the sun. I cannot speak too highly of your valuable remedy. It is truly a boon to woman."

From Mrs. MELISSA PHILLIPS, Lexington, Ind., to Mrs. Pinkham:

"Before I began taking your medicine I had suffered for two years with that tired feeling, headache, backache, no appetite, and a run-down condition of the system. I could not walk across the room. I have taken four bottles of the Vegetable Compound, one box of Liver Pills and used one package of Sanative Wash, and now feel like a new woman, and am able to do my work."

From Mrs. MOLLIE E. HERREL, Powell Station, Tenn.:

"For three years I suffered with such a weakness of the back, I could not perform my household duties. I also had falling of the womb, terrible bearing-down pains and headache. I have taken two bottles of Lydia E. Pinkham's Vegetable Compound and feel like a new woman. I recommend your medicine to every woman I know."

MITCHELLA COMPOUND

Makes CHILDREN'S teeth sure and easy. Mrs. NORA FAIR, Kent, Pa., writes:—I wish all suffering women knew of your wonderful medicine. I had been in very delicate health, but I began to gain strength as soon as I used MITCHELLA. Did all my work up to day baby was born; had a very easy birth; baby weighed six lbs. at weeks old. The Dr. said he never saw anyone get along so well and be so strong after birth. Advice Free. DR. J. H. DYE MED. INST., Buffalo, N. Y.

NEW YORK FASHIONS

THE LATEST DESIGNS FOR WINTER COSTUMES

New York City (Special).—The most radical change this season in all the array of fashionable garments has been made in the contour and general style of capes. The most approved models, like the golf cape shown in the large engraving, are longer than any we have worn for years, and the shawl shapes and other effects are wholly new, and in most instances very odd and striking. One model is formed like an open-fronted circular of three-quarter length, the lower dip of the cape in the back coming well over the length of the dress. To the entire edge of this cape is added a circular flounce, very wide at the back and graduating up to merely two or three inches as it nears the throat. Another somewhat shorter style, but entirely covering the lowest curve of the hips, is very much cut away on the front, revealing nearly all of the dress front of the bodice of the gown made en suite. The entire edge of this cape is cut in deep scallops which are bordered with either silk gimp or a line of narrow fur, and beneath these scalloped edges is set a gathered ruffle, which is likewise graduated in width.

This ruffle is made sometimes of silk the color of the cape, or of material matching the cape. A feature of very many of the capes, coats, overskirts, redingotes and fancy jackets this season is the curved effect given to the fronts. Some of the models in coats arch directly toward the hips, like a man's very English outwary. No wardrobe is wholly complete without a wrap that can be slipped

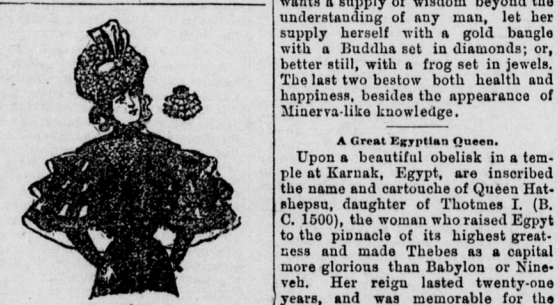

and off with ease. The novel cape shown in the accompanying small illustration serves every need, while at the same time it is chic in the extreme, representing as it does the latest Parisian style. The model in it is satinated cloth in soft mode, with yoke and bands of applique edged with velvet ribbon, but bengaline and all heavy silks, as well as lace, are equally appropriate.

The foundation is circular and extends to the edge of the third ruffle. The yoke is faced on, and the two upper ruffles are stitched into place as indicated, but the third and last is seamed to the edge. All three are circular in shape and they, as well as the foundation cape, are lined with silk. The pointed revers are set separate and attached to the fronts and are both faced with white mousseline de soie, which was purchased shirred ready for use. At the neck is a standing collar, within which is a double frill of mousseline, which is also white. To make this waist for a lady of medium size five and a half yards of material twenty-two inches wide will be required.

Smart Frocks for Girls. Many smart frocks for little girls are braided in straight and zigzag lines around the skirt above the hem. The majority of the bodices end at the waist in a band, and jacket bodices usually are held in place by a belt. Yokes are frequently elaborately braided and supplemented by capelike trimmings on the shoulders, uniting in the epaulette, with a point falling on the fore part of the arm.

Girls' Blouse Reever. The combination of reffer collar and blouse jacket shown in the illustration is both novel and stylish. As here given, the material is covert cloth

lined with braid, and the garment is designed for general wear with any gown, but all suiting materials, as well as cloth of various sorts, can be treated in a similar manner.

Remove Their Hats in Church. The Rev. Charles F. Goss, pastor of a Presbyterian church in Cincinnati, Ohio, has succeeded in getting some of the women of his congregation to remove their hats and sit with bare heads during the service.

For Dressy Occasions. All-over lace gowns in cream and oeru over white satin are worn for dressy occasions, and sleeveless coats of Irish guipure are one of the pretty accessories of evening dress.

Damask Silks Revived. The beautiful damask silks of a generation ago have been revived.

LITERARY NOTES.

George W. Cable, who has just ended a somewhat lengthy visit to England, where he was very cordially received, promises to write a book of his impressions of England. Turn about is fair play.

The demolition of Funnell's Inn, Holborn, is now almost complete. The last portion of the birthplace of Pickwick to fall under the destroyer's hand will be the gateway, which still stands forlorn amid the ruin-leading nowhere.

Surprise has been expressed that the Ashburnham first folio Shakespeare brought only \$2,925 at a recent sale. It was supposed that not less than \$4,000 would be realized from it. The reason given is that after it was catalogued, two or three small blemishes were discovered, which were thought to detract from its value.

Mr. Swinburne left Oxford without taking a degree and takes pride in avowing his illiteracy. Notwithstanding this fact, he is a master of Greek and French. He grows more eccentric in his waxing years, now approaching three score and ten, lives near London, but is almost never seen in society, and is particularly fond of children.

Mr. Third Flat—Great Scott! Who is that thumping the piano? Mrs. Third Flat—Thumping, indeed! Perhaps you'd be surprised to hear that Gladys is practicing how to read music. Mr. Third Flat—Can't she learn without reading aloud?—New York World.

His Prophecy. Gerald—If you don't marry me I shall go to the dogs. Geraldine—You won't have to go far. There's one waiting for you at the gate.—New York World.

Co-operation in England. Distributive co-operation in England now embraces more than 1,800 societies, with a capital of \$100,000,000 and a trade of close up to \$350,000,000 annually.

Creeping Consumption

Do not think for a single moment that consumption will ever strike you a sudden blow. It does not come that way. It creeps its way along. First, you think it is a little cold; nothing but a little hacking cough; then a little loss in weight; then a harder cough; then the fever and the night sweats. The suddenness comes when you have a hemorrhage. Better stop the disease while it is yet creeping. You can do it with

Ayer's Cherry Pectoral

You first notice that you cough less. The pressure on the chest is lifted. That feeling of suffocation is removed. A cure is hastened by placing one of

Dr. Ayer's Cherry Pectoral Plaster over the Chest.

A Book Free. It is on the Diseases of the Throat and Lungs. Write us Freely. If you have any complaint whatever and desire the best medical advice you can possibly receive, write the doctor freely. You will receive a prompt reply. DR. J. C. AYER, Lowell, Mass.

BAD BLOOD

"CASCARETS do all claimed for them and are a truly wonderful medicine. I have often wished for a medicine pleasant to take and at last have found it in Cascarets. Since taking them, my blood has been purified and my complexion has improved wonderfully and I feel much better in every way." Mrs. SALLIE E. BELLAS, Luttrell, Tenn.

CURE FOR COLD FEET.

Simple Means for Avoiding a Common Winter Affliction.

Before many more days shall have elapsed not a few Chicago women will be suffering from a complaint which makes the shortest journey out of doors a terror and thus aggravates the trouble when going abroad becomes unavoidable. Cold feet are not uncommon even in warm weather, but the suffering at such times is mild, while in the fall and winter it is little less than torture. A doctor who was consulted on the subject has this to say: "Physical disorders of the most unexpected nature are traceable to this complaint. It can be safely said that a large proportion of lung diseases are due to cold feet. The blood repelled from the extremities goes to the lungs and congests them. Asthma arises from the same cause, and brain and eye troubles can sometimes be traced to habitually cold feet. I don't say that women are wholly to blame for this affliction, because that is not true. The cause is often traced back to childhood, when thin stockings and shoes too small for growing feet prevented a proper circulation of the blood. And some perhaps wore garters which had to be tight to do their duty, and when they reached womanhood the mischief had been fully done. They were then obliged to suffer on, if they knew enough, to mitigate their suffering by such sensible remedies as rubbing and warm bathing, with a proper regard for the covering of the feet. Wear woolen, cotton or silk stockings, according to your comfort. If the feet are prone to be dry as well as cold they should be soaked in hot water for ten minutes every night, thoroughly dried and rubbed with a small quantity of sweet oil, bestowing special attention upon the toes. Nothing that can keep the feet comfortable should be considered a trouble, as, aside from the fact of their affecting the physical condition, their relation to the nerves must be considered. Trouble with the feet means a nerve-wearing strain. The following has sometimes proved a simple cure for cold feet: Stand erect and gradually lift yourself to the tips of the toes, coming to the natural position in the same easy manner. Repeat this exercise several times each day and the circulation of the blood must be improved. Diet has something to do with the degree of improvement, and afflicted women are advised to shun much salted meats, pies and rich puddings."

Proper Way. "Abner," asked the wife of the editor of the Plunkville Bugle, looking up from her latest "take," "don't you think it is a sin for you to write those Washington dispatches right here in the office?" "No, I don't," stoutly responded the editor. "I have always been taught that the way to get a thing done right is to do it yourself."—Ex.

To Cure A Cold in One Day. Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 50c.

Among the cities in the United States San Francisco has the least and Philadelphia has the greatest debt. The debt of San Francisco is \$13,917,011, and of Philadelphia \$56,872,735 22. In the bonded debt per capita, Boston is the highest with \$97 38, while San Francisco is the lowest, being 38 cents.

To Cure Constipation Forever. Take Cascarets Candy Cathartic. 10c. 25c. If C. C. C. fail to cure, druggists refund money.

Of horned cattle only the buffalo is a native of America.

Beware of Ointments for Catarrh That Contain Mercury. as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you may possibly derive from them. Hall's Catarrh Cure is manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken internally and is made in Toledo, Ohio, by F. J. Cheney & Co., Testimonials free. Sold by druggists; price 75c. per bottle. Hall's Family Pills are the best.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Piso's Cure for Consumption relieves the most obstinate coughs.—Rev. D. BECHMULLER, Lexington, Mo., February 24, 1894.

INEBRIETY AMONG ANIMALS. Monkeys, Apes, Rats, Birds and Insects Show a Liking for Intoxicants. It is a curious fact that there are toppers innumerable in the animal kingdom. Biped and quadruped alike are fond of alcoholic drinks, and although some display aversion when first tasting liquor, they soon acquire a craving for it. Chickens and ducks, after having once tasted brandy, become absolute slaves to the drink. They refuse to eat, grow thin, and exhibit symptoms of dejection when unable to obtain their favorite tipples. Monkeys and apes are passionately fond of spirituous liquors. Of these, Buffon's wine-bibbing chimpanzee was a shining example, and Brehm, the German zoologist, owned several mandrills that drank wine regularly and did not disdain brandy. Herbivorous animals frequently become intoxicated, innocently enough, through eating decayed fruit. In orchards, oxen and cows, after eating overripe apples, have been seen to display all the symptoms of drunkenness. They stagger, their eyes lose expression and they grow sleepy. It seems that animals are susceptible to alcoholism in proportion to the development of their intelligence. Elephants are fond of wine and rum, and rats gnaw the staves of wine casks to get at the contents. Cats, however, rarely exhibit a fondness for intoxicants. Among birds the parrot takes first place as an habitual toper. Insects have many opportunities to become intoxicated, and it is the most active that most frequently avail themselves of the chance. There is an aromatic, intoxicating fluid in linden blossoms for which bees show an especial fondness. Instances have been observed where swarms of bees regaled themselves with the poisonous linden nectar until they exhibited all the signs of intoxication. Hundreds fell helplessly to the roadside, to be trampled under foot.—New York Herald.

Clans are said to have arisen in Scotland in the reign of King Malcolm, about 1008.

Educate Your Bowels With Cascarets. Candy Cathartic, cure constipation forever. 10c, 25c. If C. C. C. fail, druggists refund money.

Bayonets were invented at Bayonne in France, and to that fact the name is due.

Fits permanently cured. Notice or nervousness after first day's use of Dr. King's Great Nerve Restorer. \$2. Trial bottle and treatise free. DR. R. H. KLING, Ltd., 101 Arch St., Phila., Pa.

In 1775 the heaviest cannon used were 13-pounders.

INEBRIETY AMONG ANIMALS. Monkeys, Apes, Rats, Birds and Insects Show a Liking for Intoxicants. It is a curious fact that there are toppers innumerable in the animal kingdom. Biped and quadruped alike are fond of alcoholic drinks, and although some display aversion when first tasting liquor, they soon acquire a craving for it. Chickens and ducks, after having once tasted brandy, become absolute slaves to the drink. They refuse to eat, grow thin, and exhibit symptoms of dejection when unable to obtain their favorite tipples. Monkeys and apes are passionately fond of spirituous liquors. Of these, Buffon's wine-bibbing chimpanzee was a shining example, and Brehm, the German zoologist, owned several mandrills that drank wine regularly and did not disdain brandy. Herbivorous animals frequently become intoxicated, innocently enough, through eating decayed fruit. In orchards, oxen and cows, after eating overripe apples, have been seen to display all the symptoms of drunkenness. They stagger, their eyes lose expression and they grow sleepy. It seems that animals are susceptible to alcoholism in proportion to the development of their intelligence. Elephants are fond of wine and rum, and rats gnaw the staves of wine casks to get at the contents. Cats, however, rarely exhibit a fondness for intoxicants. Among birds the parrot takes first place as an habitual toper. Insects have many opportunities to become intoxicated, and it is the most active that most frequently avail themselves of the chance. There is an aromatic, intoxicating fluid in linden blossoms for which bees show an especial fondness. Instances have been observed where swarms of bees regaled themselves with the poisonous linden nectar until they exhibited all the signs of intoxication. Hundreds fell helplessly to the roadside, to be trampled under foot.—New York Herald.

HERE THIS IS IT.
