

Make It a Point

To Get the Best Every Time, When You Buy Medicine.

Health is too valuable to be trifled with. Do not experiment. Get Hood's Sarsaparilla and you will have the best medicine money can buy—the medicine that cures when all others fail. You have every reason to expect it will do for you what it has done for others.

Hood's Sarsaparilla
Is America's Greatest Medicine. Price \$1.
Hood's Pills are the favorite cathartic.

Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by a local application of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a running sound or imperfect hearing, and when it is so directly closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed for ever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

J. C. Gray & Co., Toledo, O.
Sold by Druggists.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kilne's Great Nerve Restorer. 83 cent bottles, and 1.00 for three. Dr. H. K. Kilne, Ltd., 101 Arch St., Philadelphia.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

After six years' suffering I was cured by Pills of the Cure—MARTY THOMSON, 394 Ohio Ave., Allegheny, Pa., March 19, 1894.

A London department store has a real estate department.

Don't Tobacco Spit and Smoke Your Life Away.
To quit tobacco easily and forever, be magnetic, full of life, nerve and vigor, take No-To-Bac, the wonder-worker, that makes weak men strong. All druggists, 50c or \$1. Cure guaranteed. Booklet and sample free. Address: Sterling Remedy Co., Chicago or New York.

Harrison M. Seal, of Whitcomb, Ind., probably holds the voting record of that State. He voted for Jackson in 1828 and for each Democratic Presidential candidate since then.

Apt to Affect the Nerves.
Cold weather is just as apt to affect the nerves as any other part of the body, and neuralgia sets in. St. Jacobs Oil is just as certain to cure it as it cures all the general pains and aches of the body.

The Rev. Dr. Withrow, the venerable pastor of the Park Street Church, Boston, which is commonly known as "Brimstone Corner," lives up to the old traditions of the church. "I do not see," he says, "how a man can be a Christian who rejects the doctrine of eternal punishment."

Knocks Coughs and Colds.
Dr. Arnold's Cough Killer Cures Coughs and Colds. Prevents Consumption. All druggists, 50c.

The last sister of the eminent painter Joseph van Lerins, died a few weeks ago at Antwerp, aged 87. She left to the city all the paintings and sketches of her brother remaining in her possession, besides the sum of \$30,000, the interest of which is to be devoted to two annual prizes.

To Cure Constipation Forever.
Take Cascarets Candy Cathartic, 10c or 50c. If C. C. C. fail to cure, druggists refund money.

A Use for Liquefied Air.

It is reported that a new use has been found for liquefied air, the possibilities of which have been matters of discussion among scientific men for some time. According to the Mining Reporter, a discovery was made recently by which it is now practical to use liquefied air in underground work, such as mining, driving tunnels and sinking shafts. It is said that under proper conditions the liberation of air from the liquid can be effective in generating power with which to run drills under ground, pumps, hoists, etc., while cool air can also be supplied in the deepest mines. The liquid air can also be used in freezing soft ground, making tunnels, cutting less hazardous and tedious. If there is any reliability in this reported discovery, and its success can be practically demonstrated, it will make a new departure in the lines of work named, and once again make the genius of science the soul of industrial progress.

THE DUTY OF MOTHERS.

Daughters Should be Carefully Guided in Early Womanhood.

What suffering frequently results from a mother's ignorance; or more frequently from a mother's neglect to properly instruct her daughter!

Tradition says "woman must suffer," and young women are so taught. There is a little truth and a great deal of exaggeration in this. If a young woman suffers severely she needs treatment and her mother should see that she gets it.

Many mothers hesitate to take their daughters to a physician for examination; but no mother need hesitate to write freely about her daughter or herself to Mrs. Pinkham and secure the most efficient advice without charge. Mrs. Pinkham's address is Lynn, Mass.

The following letter from Miss MARRIE F. JOHNSON, Centralia, Pa., shows what neglect will do, and tells how Mrs. Pinkham helped her:

"My health became so poor that I had to leave school. I was tired all the time, and had dreadful pains in my side and back. I was also troubled with irregularity of menses. I was very weak, and lost so much flesh that my friends became alarmed. My mother, who is a firm believer in your remedies from experience, thought perhaps they might benefit me, and wrote you for advice. I followed the advice you gave, and used Lydia E. Pinkham's Vegetable Compound and Liver Pills as you directed, and am now as well as I ever was. I have gained flesh and have a good color. I am completely cured of irregularity."

NEWS AND NOTES FOR WOMEN.

Newest Night Robe.
The very newest French night robe is of albatross, has angel sleeves and no collar. Its only trimming is a narrow binding of colored satin ribbon around neck, sleeves, etc., and rows of delicate feather-stitching around the neck and down the plait in front on either side of the buttonholes. These pretty robes are in white and pale colors. The sleeves are a remarkable feature, being wider than the sleeves of Japanese kimonos and hanging perfectly loose, to the elbow or to waist, as one prefers.

The Art of Harmonizing Colors.
This it would seem few people recognized and now that yellow is the mode we shall find many wearing it who should most carefully avoid it, for it is singularly unbecoming to those it does not suit, developing the worst shadows in the face. Nevertheless yellow tulle bows, lisse jabots, yellow artificial flowers and yellow trimmings to hats and toques are flooding the market. No one can all their life through be faithful to any particular shade; green is in later life becoming to those who could not wear it in their youth, while pinks and light blues, so suitable to a young face, are anything but advisable as the years go on. Peach is a faithful color that can be worn in middle life almost as well as by a girl in her teens. Older women are apt to fall back upon black with a far too faithful persistence; it always wants softening towards the face, and the introduction of a bright color renders it most becoming. For the moment black would seem to be the groundwork for nearly all colors in material and millinery.

Sorrow and Beauty.
Observation has disproved for me the theory that only the women devoid of emotion and feeling can retain a youthful appearance in maturity. I personally know three women who have passed through heart-tragedies and cyclones of emotion, and who yet wear the satin of youth upon their cheeks, albeit their birthdays have long ceased to be among the year's festivals for them. They said, like another before them, "My youth and my happiness are gone, why should I throw my beauty after them?" And they straightway began to battle with time and grief. There was scientific massage for the encroaching lines about the mouth and eyes; there were carefully prepared baths for the complexion and varying "food tonic" for the wasted pores; there were outdoor exercises unlimited, resting and sleep-producing. Strong, great emotions, such as love and sorrow (and they walk ever hand in hand), may ravage beauty for a season, but they intensify it eventually if the exterior is well cared for. —Woman's Home Companion.

Brave Nurses at Montauk.
Miss Annie Wheeler pays the following charming tribute to the nurses who were associated with her at Montauk Point:
"Too much praise cannot be given to the trained nurses at Montauk. They made just as gallant soldiers in the service of our country as those who fought on the battlefield. They are all women who have their living to make, and by hard work have achieved a position which commands for them \$25 a week and a comfortable living."
"In the hospital they were getting a dollar a day, which was almost giving their time, and there was hardly one among the whole of them who would not have gladly volunteered her services free had it been necessary."
"I saw not one instance of carelessness or callousness or time-serving, but all the nurses were conscientiously devoted to their duty, and considered no hard work or fatigue or loss of rest worthy of the slightest consideration if they could by any possibility further the interest or comfort of those who were sick and suffering. Their conscientious devotion to duty was all the more beautiful in that they could look forward to no promotion, or shoulder-straps, or public recognition, or honorable mention, or any glory except that beautiful light which shines in one's heart from a knowledge of duty well done and honors well deserved." —Harper's Bazar.

The Country Woman's Life.
"If we want the lives of our girls and women on the farms to mean more, their lives must, first of all, be made easier," writes Edward Bok in the Ladies' Home Journal. "There is too much mental work being done on our farms by wives and daughters which ought to be done by hired help. If the women on our farms would form among themselves 'Leisure Guilds,' and devise ways and means to have some of their work done for them, and not do it all themselves, the initial step would be taken toward the emancipation and a freedom from isolation of thousands of women. See, for example, what can be done in a town for the improvement of everybody in it, and start, if you will, with a public library. There is a public gallery of prints of the best paintings; of good photographs—a gallery made as the nucleus for an amateur photograph club, with summer jaunts and an exhibition in the winter. There is a collection to be made for such a gallery of specimens of all the rocks, and plants, and flowers, and insects of the place—the finest material for pleasant winter evening studies and classes in natural history. There is the organization of a band for music in the summer evenings on the green, with refreshments served by girls to raise money for some other object; a concert or lecture in the fall, perhaps.

There are reading classes and dramatic clubs to be formed for the winter. There is a woman's club for the study of current events and books; a farmer's club for the men for the discussion of agricultural science and economics; a sewing club for the girls; a manual-training club for the boys; a debating society for the boys; a branch of the Chautauque Circle; a King's Daughters' Circle for some specific neighborhood need or purpose; an art exhibition of the pictures from the magazines; a singing-school for the concert during the winter; a neighborhood guild for girls; a guild for men and women for the betterment of good roads and the planting of hedges by the side of them; a dinner club for young men, where each member gives one dinner to the club during the season at his house."

Gossip.
American women spend \$80,000,000 a year on cosmetics.

The State Federation of Women's Clubs of Michigan held a three days' convention at Manistee.

Mme. de Toro, a wealthy Chilean widow, now past seventy, owns and manages a large estate of over 11,000 acres, and worth more than a million dollars.

Dona Mannela Rosas de Terrero, only daughter of General Rosas, who was dictator of Buenos Ayres from 1835 to 1852, died recently in London at the age of eighty-one years.

The recent Lafayette centennial recalls the fact that Mrs. M. E. Manser, of Newport, Ky., is the only survivor of 200 girls who scattered flowers before the Frenchman when he visited Cincinnati in 1825.

One of the most interesting of European princesses is Princess Mary of Bavaria. She is lineally descended from Henrietta Maria, eighth child of Charles I., while Queen Victoria only claims descent from a daughter of James I.

There is one Indian woman who is a practising lawyer in the United States. She is Miss Laura Sykims, a half-blood Shawnee woman. She graduated from the law department of the Carlisle (Penn.) Indian School, and then went to Oklahoma City, where she has been admitted to the bar, and is said to be very popular. She is twenty-eight years old.

Lady Laura Ridding, who was a speaker at the recent English Church Congress, is the daughter of the late Lord Selbourne, and the wife of Bishop Ridding, of Southwell. She is well known in Nottingham, where she started the Women's League. The League now numbers some fifty branches and two thousand members, and consists of miners' wives, women factory workers and working women generally.

Fashion's Fancies.
Dressy coat suits are made of colored poplins and have lace revers.

Simple hats for street wear are in various Alpine shapes, and some have low, square crowns.

A costume of taffeta has the entire skirt, waist and sleeves in tuks about half an inch deep and the same distance apart.

Velvet or cloth appliques upon cloth are the idols of the season, and it is rumored that flounces upon the skirts and capes are to go.

A striking gown which brings out the popular chaille and the polka dot effect has big chaille dots on a gown of a pretty pattern of coarse, white net.

If you want to have the latest thing, get a garnet cloth skirt, a black coat, and a red velvet toque in a rich, soft shade, a little lighter than the skirt.

Pretty trimmings for edging bows and flounces are made of thin, narrow lute-string ribbon gathered in the middle. They are especially effective on chiffon frills.

The season's skirts, as a rule, will be elaborately trimmed. Satin and velvet ribbons will be largely used in ornamenting, and shaped flounces will remain in favor.

Favorite ornaments for presentation to bridesmaids by the groom are pearl brooches, curb chain bracelets set with pearls, blue enamel bow brooches with pearl drops, diamond and emerald initial pendants, etc.

Chenille plays a very conspicuous part in both hat and dress trimmings this season. It is threaded into lace and mixed with embroidery in silver and gold threads on velvet and silk, and chenille fringes with satin covered drops at the end of each strand are revived again.

Striped moires are in fashion again and make very effective and serviceable waists, especially those in medium and dark colors, while for evening wear the striped moires in delicate tints combine beautifully with lace, passementerie, embroidery or other appropriate garniture.

A Curious Custom Among Savages.
Between the mountains of India and Persia is a powerful tribe, among whom an extraordinary custom prevails. Women's rights apparently have received full recognition, for the ladies of the tribe can choose their own husbands. All a single woman has to do when she wishes to change her state is to send a servant to pin a handkerchief to the hat of the man whom her fancy lights, and he is obliged to marry her, unless he can show he is too poor to purchase her at the price her father requires.

A Queer Monument to a Son.
An eccentric Kansan had erected a novel monument to the memory of his roving son. It is an old-fashioned traveling bag, modeled in marble, and mounted on a sandstone base. The satchel bears the name of the dead boy and the words: "Here is where he stopped last."

Catch Cold Easily?

Are you frequently hoarse? Do you have that annoying tickling in your throat? Would you feel relieved if you could raise something? Does your cough annoy you at night, and do you raise more mucus in the morning? Then you should always keep on hand a bottle of

Ayer's Cherry Pectoral

If you have a weak throat you cannot be too careful. You cannot begin treatment too early. Each cold makes you more liable to another, and the last one is always harder to cure than the one before it.

Dr. Ayer's Cherry Pectoral Plaster protects the lungs from colds.

Help at Hand.
If you have any complaint whatever and desire the best medical advice you can possibly obtain, write the doctor freely. You will receive a prompt reply.
Address, DR. J. C. AYER, Lowell, Mass.

Use and Cost of Lard Plaster.
Lard plaster is sold very cheaply in places where the rock suitable for grinding it from is abundant. It is there, too, that it appears to do most good, probably in part because the gypsum rock has always enough holes through it to make good drainage. There is no use putting plaster on land that is most of the year full of water. Its best effect is always found on light and dry soils, for one of the properties of plaster is to attract moisture, which such soil usually needs. We have known plaster sold at the mills as low as \$2 per ton in winter when most of the rock grinding is done. Ten or fifteen miles away and in summer, when farmers want to use it for crops, the price would jump up to \$4.50 and \$5 per ton. So those who used much plaster generally went with sleighs during a run of good sleighing, when they would sometimes draw two tons or more on a load. A half bushel of plaster weighs pretty near 100 pounds, so that a good deal can be put in an ordinary sleigh box, and drawn by a smart team when the sleighing was at its best. —American Cultivator.

Feeding Cattle For Market.
All who are interested have doubtless noticed the fact that the market now furnishes only the small or medium sized animals. The heavy steer and the fat hog are rarely seen. The market demands the small animals, for consumers have learned that the flesh is more tender and juicy than in large animals. Heifer beef is taking the place of steer beef, for the former, equally well fattened at the same age, is of much better quality.

It is a fact worthy of record that the producer fought for a long time against this demand for young market stock, especially in beef. The demand had to be met or no sale, so he swallowed his choler and has now discovered the astounding fact that he can make a pound of meat cheaper and of better quality on the young animal than the older one, and that when the animal gets beyond a certain weight feeding cannot be continued profitably. Thus it is certain that the pre-conceived ideas are being daily upset and often times, as in this case, forced changes are made contrary to out better judgment only to find later that had they taken place sooner we would have been money in pocket.

Keeping Eggs For Winter.
I have tried many different methods of packing eggs, but have found that keeping them in brine is more satisfactory than any method of dry packing that I have had any experience with. Lusc jars in which to keep the brine, although legs or any water-tight vessels will answer the purpose. The recipe for making the brine is as follows: To three gallons of water, half a pint of water-slacked lime, of the consistency of thick cream, and one pint of common salt. Stir until both lime and salt are dissolved; then drop the eggs carefully to prevent cracking, as a cracked egg will soon spoil. The eggs must sink gently, not rapidly, and must almost float, but if they float on the top the brine is too strong and more water can be added. Eggs must be entirely fresh and each day's supply deposited in the brine as soon as gathered. If these directions are followed eggs will be fresh in appearance and quality after being in the brine a year. Of course, a fresh-laid egg is preferable for table use or cake going to any packed egg, but there are many ways of using eggs in which a packed egg answers equally as well, and there is a time in the life of a hen, when moulting, that she does not seem to have the interest of the housewife at heart, but is looking after her own comfort. Eggs then become scarce and high and a store of packed ones from which to draw is very acceptable. —Rural World.

AGRICULTURAL TOPICS

Pruning Currants.

The main object of pruning currant bushes is to properly develop every portion of the plant. To obtain this, it is necessary to cut out occasionally the old wood and shorten the most vigorous of the young growth. One-half dozen large vigorous shoots will give more and larger fruit than twice that number of weak and immature ones.

Value of Concentrating Manure.

Concentrating the manure on a small area may appear as a waste, but results have always been in favor of so doing. The Massachusetts Board of Agriculture calls attention to the fact that the keeper of a lively stable applied the manure from fifteen horses on an acre and a half of land for several years and harvested two and three crops of hay each year, the aggregate being seven and a half tons each season, or more than three times as much as the land would have produced without such treatment.

Milk and Meat For Poultry.

The impression is more or less general that milk, either pure or skimmed, will take the place of meat in the poultry ration. While no one will question the value of milk as a poultry food it should be remembered that it contains but ten per cent. of solids after it is skimmed, as against eighty-nine per cent. of solids in meat, of which four per cent. is mineral matter absolutely essential to egg production. In the consumption of milk in place of meat the fowl is compelled to drink too much water contained therein in order to obtain the required solids. When milk is fed in connection with meat we have a combination making a most profitable feeding. The milk may be either whole or skimmed, but it should at no time be fed when very sour, as it then decomposes. A very small amount of cooked fat meat is not objectionable, but the best is lean meat with the bone, the latter run through a bone cutter.

Use and Cost of Lard Plaster.

Lard plaster is sold very cheaply in places where the rock suitable for grinding it from is abundant. It is there, too, that it appears to do most good, probably in part because the gypsum rock has always enough holes through it to make good drainage. More Equipment for Baltimore & Ohio.
The improvements that have been made on the Baltimore & Ohio Railroad during the past two years have rendered it possible to operate cars of a heavier capacity than have been in use in the past and the Receivers have just ordered from the Schoen Pressed Steel Company of Pittsburgh 1,000 steel coal cars of a capacity of 100,000 lbs. each. These cars will be used for the Seaboard trade and are expected to be in service during the early part of 1899.

In addition to these cars, the Receivers have also ordered from the Pittsburgh Locomotive Works 50 more of the Consolidated locomotives with 22x28 inch cylinders.

His Sarcasm.
Farmer Grout (sourly)—Them city relatives of our'n 'per to believe my name! 'Mystery.' Mrs. Grout—Fah! what makes you git off sech a foolish say'n' as that, Lyman? Farmer Grout—It ain't foolish—it's sarcastic! I judge they do by the way they seem to think I love company.—Harper's Bazar.

AN AFFAIR OF THE NATION

It has been said of Americans that they are "a nation of dyspeptics" and it is true that few are entirely free from disorders of the digestive tract, Indigestion, Dyspepsia, Stomach and Bowel trouble, or Constipation. The treatment of these diseases with cathartic medicines too often aggravates the trouble.

THE LOGICAL TREATMENT
is the use of a remedy that will build up the system, thereby enabling the various organs to act as Nature intended they should. Such a remedy is found in Dr. Williams' Pink Pills for Pale People. Here is the proof.

In Detroit there are few soldiers more popular and efficient than Max R. Davies, first sergeant of Co. B. His home is at 416 Third Avenue. For four years he was a bookkeeper with the wholesale drug house of Farrand, Williams & Clark, and he says: "I have charged up many thousand orders for Dr. Williams' Pink Pills for Pale People, but never knew their worth until I used them for the cure of chronic dyspepsia. For two years I suffered and doctored for that aggravating trouble but could only be helped temporarily.

"I think dyspepsia is one of the most stubborn of ailments, and there is scarcely a clerk or office man but what is more or less a victim. Some days I could eat anything, while at other times I would be starving. Those distressing pains would force me to quit work. I have tried many treatments and remedies but they would help only for a time. A friend induced me to try Dr. Williams' Pink Pills for Pale People, and after taking a few doses I found much relief and after using several boxes I was cured. I know these pills will cure dyspepsia of its worst form and I am pleased to recommend them."—Detroit (Mich.) Journal.

The genuine package always bears the
