The Smallest Island in the World.
Rockall is, perhaps, the smallest island in the world. It is situated in the Atlantic over 300 miles west of Scotland, and is a mere rock about 60 feet high and 225 feet round, arising from a reef of sand. The rock is basalt and granite, very magnetic. It is haunted by sea-birds, and the mackerel of the surrounding seas are very fine. Of course, it was never inhabited, and is very seldom visited, owing to the difficulty of landing on it.

What the Fool Said.

It was where the motor cars pass in a certain city. An old gentleman alighted, and the conductor told him to look out for the other car. The passenger did not understand him, and turning around, asked: "What did you say?" Just then the motor struck him and knocked him without serious damage toward the curb on the opposite side from which he wanted to go. As he got up, he was heard to mutter.
