MAY CHANGE COURT HOURS.

The advisability of changing the present rules of court was argued pro and con by several attorneys yesterday and the judges will render their decision on Saturday. Many of the attorneys want a continuous session of court from 10 to 3, but this does not appeal favorably to people who enjoy taking a wfeal at midday. By far the greater number of men who have business in court are those who want their dinners at noon, which privilege could not be granted them when holding continuous sessions.

Struck Rich Vein of Copper.

Mt. Carmel has been electrified over the discovery of a long-sought-for mineral deposit which means much to a large amount of capital interested in that town and vicinity. After prospecting for many years and expending thousands of dollars in the same, Prospector Elijah Straw, of Mt. Carmel, on Saturday discovered the outcropping of a rich vein of gray copper ore on a mountain located about ten miles north, in Roaring creek, Columbia county.

The vein is ten feet thick and lies between strata of red shale similar in formation to some of Colorado's most famous mines. The specimens of ore unearthed contained 50 per cent copper with about 7 per cent silver. The mountain on which the discovery was made is five miles in length, and from surface indications is literally loaded with the ore.

The bogus stamps have reached every part of the country, and millions of cigars have already been seized. Cigar dealers age bemoaning their loss, but there is no redress. Local traders do not yet know whether the stamps on their cigars are bogus or real.
