To Make Divorce Easy.

Lithuania, a province of Russia, has a strange custom, which is intended to protect the bride, should her marriage prove unhappy. Previous to the wedding ceremony the mother, in the presence of witnesses, severely boxes the bride's ears. As time goes by should the benedict prove faithless or unkind, his vrow can sue for a divorce on the plea that she was forced into the marriage by her mother against her will, and on that score the verdict of the judge will be in her favor.

Frederick Remington, the artist, who is just back from Havana, always used a small, folding pocket amera while in Cuba, designed by him and made especially for his use.

In hedge planting, where the prime object is a screen or border, and not for the exclusion of stock, one of the most beautiful trees that can be used is our common arbor vitee or white bedar. Its beauty, as such, largely depends on the skill exercised in

bedar. Its beauty, as such, largely depends on the skill exercised in pruning.

Mr. Gardner, of Osago, Iowa, a well-known authority on the growing of evergreens, offers the following suggestions on the shaping of confers:

"They can be made to grow in any required shape. Suppose the spruces or pines or arbor vitaes are two or three feet high, and you wish to grow them in symmetrical cone shape. When the new shoots have about obtained their full length, the latter part of June or early July, cut all the new growth back to one iach for even balance all round. Do not cut the leader. During the remainder of the season, buds will form on the stubs of new growth. Buds will also appear bursting through the bark on the one-year-old wood, and frequently from the two year old. But for the cutting back of the shoots these bads would forever remain dormant. If the trees are of considerable, say five to eight feet, and have never been pruned, then early in the spring cut off all branches that hang over a lower branche. Make the lower branches the longest, and each succeeding set as you go up should be shortened in.

fill up a space, for instance.—American Cultivator.

Successful Culture of Gooseberries.
Gooseberries do best on a clay soil which has been made rich by a liberal application of well-rotted manure. I find that few fertilizers surpass barnyard manure. I have also used as a mulch well-rotted straw, wood and coat ashes, leaves, vines and anything that could be gathered up. After selecting the location I prepare my land by plowing and pulverizing thoroughly. I then mark out rows six feet apart, using great care to have them perfectly straight. With two horses and a large plow I furrow out and set my plants six feet apart in the furrow. The plants can then be cultivated each way. To some this distance may seem great, but I find from experience that it is much the best, as there is plenty of room for cultivation and the application of fertilizers. The space between the bashes can be utilized for growing beans, cucumbers, muskmelons, dwarf tomatoes and the like, as the vines remain green a long time, thus affording shade and protes.

An Excellent Combination

DOCTOR TOO LATE.

New York Press: "Talkin' about rattlesnakes," said an Erie railroad brakeman, "did you ever hear how the mosquitoes saved a man's life up near Guif Summit last summer? Weil, while getting out railroad ties in a slashin' over back of the Summit, Abe Morehouse was bitten in the leg by a rattlesnake. A Susquehanna doctor was at once sent for and the leg was bandaged tightly above the wound. It was expected that Morehouse would die before the doctor could come up the pike on his bike. Just as soon as the leg was bared to put on the bandage it was attacked by a swarm of mosquitoes, and when the doctor arrived he found the man as lively as a ricket and in no need of a doctor, but the ground was covered with dead and dying mosquitoes. They had sucked the poison from the wound and saved Morehouse's life. The mosquitoes presented their bills and died. The doctor presented his bill and got his money. This was hard on the mosquitoes, but I presume Morehouse's life was worth savin'. There was Soi lorake on the Delaware division, from Susquehanna to Port Jervis. He had the ague awfully. Had it so bad that some of his teeth shook out, and he shook the buttons off his coat. A lot of his friends had sure cures for the ague, and each gave him the prescription. At last when he had 13 prescriptions, he took them all to a Port Jervis drug store and had them put up. He took them home and put them all into one jug. Then he shook the jug, mixed the 13 prescriptions horoughly, and took three doses. He never shook again until the hearse struck a stone."

The passion flower, which grows in the South American forests, can only be enjoyed where it grows, as it fades almost as soon as it is picked.

OTHERHOOD is woman's natural destiny.

Many women are denied the happiness of children through some derangement of the generative organs.

Actual barrenness is rare.

Among the many triumphs of Lydia E. Pinkham's Vegetable

Actual barrenness is rare.

Among the many triumphs of Lydia E. Pinkham's Vegetable Compound is the overcoming of cases of supposed barrenness. This great medicine is so well calculated to regulate every function of the generative organs that its efficiency is vouched for by multitudes of women.

MRS. ED. WOLFORD, of Lone Tree, Iowa, writes:

"DEAR MRS. PINKHAM—Before taking Lydia E. Pinkham's Vegetable Compound I had one child which lived only six hours. The doctor said it did not have the proper nourishment while I was carrying it. I did not feel at all well during pregnancy. In time I conceived again, and thought I would write to you for advice. Words cannot express the gratitude I feel towards you for the help that your medicine was to me during this time. I felt like a new person; did my work up to the last, and was sick only a short time. My baby weighed ten pounds. He is a fine boy, the joy of our home. He is now six weeks old and weighs sixteen pounds. Your medicine is certainly a boon in pregnancy."

MRS. FLORA COOPER, of Doyle, S. Dak., writes:

"DEAR MRS. PINKHAM—Ever since my last child I suffered with inflammation of the womb, pains in back, left side, abdomen and groins. My head ached all the time. I could not walk across the floor without suffering intense pain.

I kept getting worse, until two years ago I wrote to you for advice, and began taking Lydia E. Pinkham's Vegetable Compound.

I had not finished the first bottle before I felt better. I took four bottles, and have been strong and perfectly healthy ever since, and now have two of the nicest little girls."

## Any Girl Can Tell

A physician who makes the test and is honest about it can tell you that, in many cases, the number of red corpuscles in the blood is doubled after a course of treatment with Dr. Williams' Pink Pills for Pale People.

That this means good blood may not be entirely clear from the doctor's statement, but any girl who has tried the pills can tell you that it means red lips, bright eyes, good appetite, absence of headache, and that it transforms the pale and sallow girl into a maiden who glows with the beauty which perfect health alone can give.

Mother's whose daughters grow debilitated as they pass from girlhood into womanhood should not neglect the pill best adapted for this particular ill.
