

"In Union There is Strength."

True strength consists in the union, the harmonious working together, of every part of the human organism. This strength can never be obtained if the blood is impure. Hood's Sarsaparilla is the standard prescription for purifying the blood.

Hood's Sarsaparilla
Never Disappoints

A. M. Priest, Druggist, Shelbyville, Ind., says: "Hood's Sarsaparilla cures the best of skin diseases. Can get plenty of testimonials as well as cures every one who takes it." Druggists sell it 75c.

We think Piso's Cure for Consumption is the only medicine for Coughs.—JENNIFER PINKHAM, Springfield, Ills., Oct. 1, 1894.

In the last three years the United States has sold abroad \$1,300,000,000 more than it has bought.

Beauty Is Blood Deep.
Clean blood means a clean skin. No beauty without it. Cascarets, Candy Cathartic, clean your blood and keep it clean, by stirring up the lazy liver and driving all impurities from the body. Begin to-day to banish pimples, boils, blotches, blackheads, and that sickly bilious complexion by taking Cascarets.—Bottle for ten cents. All druggists, satisfaction guaranteed, 10c, 25c, 50c.

Wages in the locomotive department of the English and Welsh railway lines increased 5.2 per cent during the last half year, and the cost of coal was augmented by 18 per cent.

The Baltimore and Ohio Railroad, at the request of numerous business organizations of Baltimore and Philadelphia, has arranged for a ten days stop-over at each of those cities under the usual procedure of the passenger depositing the ticket with the ticket ten days stop-overs at Washington, Baltimore and Philadelphia.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

European Signs.
Notes from a letter just received from an observing American who noticed these signs on a trip from Liverpool to Naples. In Liverpool a sign reading: "Shaving, 1d.; shaving, with clean water, 2d." In the Anglo-American bar, at the Grand Hotel, in Rome, the popular American drink thus masquerade on a sign: "Handsomer Cooler, 1 lire." Travelers on a train from Paris to Rome were informed by placards that "Travelers may not put their heads and hands from the window in case of accident." To what straits a nation with no W in its language is reduced is shown by theatrical posters on the walls and fences about Naples which stare one in the face, reading: "Teatro Mercadante, Etc., Etc., Etc., Amletto, 5 atti, etc., etc., G. Shakspere." Shades of the departed William!—New York Times.

Sea Water for Street Sprinkling.
The Merchants' Association of San Francisco, says the Popular Science Monthly, has been trying the experiment of sprinkling a street with sea water, and finds that such water binds the dirt together between the paving stones, so that when it is dry no loose dust is formed to be raised by the wind; that sea water does not dry so quickly as fresh water, so that it has been claimed when salt water has been used one load of it is equal to three loads of fresh water. The salt water which is deposited on the street absorbs moisture from the air during the night, whereby the street is thoroughly moist during the early morning and has the appearance of having been freshly sprinkled.

BACKACHE is a symptom. Something makes the backache and that something requires attention or the backache can never be permanently stopped. "I suffered for years with a long list of troubles," writes Mrs. C. KLENK, of Wells, Minn. (Box 151), to Mrs. Pinkham, "and I want to thank you for my complete recovery. Lydia E. Pinkham's Vegetable Compound is a wonderful medicine for women. "I had severe female complaints causing terrible backache and nervous prostration; was dizzy most of the time, had headache and such a tired feeling. I now have taken seven bottles of your Compound and have also used the Sanative Wash and feel like a new woman. I must say I never had anything help me so well. I have better health than I ever had in my life. I sleep well at night, and can work all day without feeling tired. I give Lydia E. Pinkham's Vegetable Compound all the credit, for I know it has cured me of all my troubles. I would not do without your remedies for anything." Mrs. E. FURTON, of Meade, Mich., writes: "Two years ago I was troubled with constant backache and headache and was very nervous. I resolved to try your medicine and took two bottles of Lydia E. Pinkham's Vegetable Compound, and on taking the third a tumor was expelled. I was a little frightened and sent for the doctor; and he said that it was fortunate for me that it came away. I got quite well after that and have your Compound alone to thank for my recovery." Multitudes of women suffer constantly with backache. Other grateful multitudes have been relieved of it by Mrs. Pinkham's advice and medicine.

frightened and sent for the doctor; and he said that it was fortunate for me that it came away. I got quite well after that and have your Compound alone to thank for my recovery." Allen's Foot-Ease makes new or tight shoes easy. At all druggists and shoe stores, 25 cts. Sample mailed FREE. Adr. S. Allen S. Olmstead, LeRoy, N. Y.

Late advices from the Niger says the deserters from the French regiments are constantly arriving at Ilo. They allege as their reason for leaving the service that they got no pay.

Educate Your Bowels With Cascarets. Candy Cathartic, cure constipation forever. 10c, 25c. If C. C. C. fail, druggists refund money.

The Wisconsin Legislature has forbidden the use of living rooms for manufacturing purposes.

No-To-Bac for Fifty Cents. Guaranteed tobacco habit cure, makes weak men strong, blood pure. 50c, \$1. All druggists.

THE "GUIDES" OF INDIA.

A Famous and Splendid Corps—The Regimental Spirit.
Before 1895 our frontier post was Mardan—"Mardan, where the Guides are." Here, ever since its foundation, that famous and splendid corps has been quartered in the intervals of campaigns which have consistently added to the luster of its record, says G. W. Stevens in the London Mail. The only corps in India, except the Gurkha battalion, which has permanent quarters, the Guides have made Mardan less of a station than a regimental home. Here are its family heirlooms—the mess-walls covered with heads of buffalo and ibex, antelope and mountain sheep, with banners taken from the enemy, and queer Greco-Buddhist statuary excavated out of the neighboring hills. Here is the regimental cemetery—full now and overflowing into a new one—and an arch and little garden tardily created by government to the memory of the handful of the corps who died at post round Cavagnari in Kabul. Also the little swimming bath in the officers' garden, the fort with sentries of many types—here a Sikh, there an Afridi, a Gurkha, a Rajput, a Dogra—for "God's Own" is composed of the pick of all the fighting races of India. In enormous long white trousers Sepoys and Sowars walk placidly about their home and the home of their fathers; for the fighting native puts down his young son for the Guides as you might at home for the Travelers. You come across a native officer of forty-two years' service—straight away to before the mutiny—a smiling, little old gentleman, whose dyed beard only just matches the mahogany of his skin. He regrets, politely, that the Guides were not able to appear at Omdurman, and remarks, as an incentive to my future efforts, that he himself saw a war correspondent killed at Landakal. Every officer or man you meet has the air of a gentleman taking his ease in his own house. Mardan is the concrete epitome of the spirit that makes a regiment—the only satisfactory translation I ever met of the words esprit de corps.

Solidified Spirits for Fuel.
A new idea in candles has been evolved by a German chemical manufacturer. It is simply a mass of solidified spirits pressed into cylindrical form and distributed in round tin boxes. The solid spirits burn readily and need no wick to make them applicable for heating or cooking purposes. The flame can be extinguished like that of a chandelier lamp, after which the little surface spirits, which became liquefied by the heat of the flame, resume their hard and waxy consistency in a few minutes.

How the Moon Climbs Mount Hood.
From the point of view of most Portlanders the moon was launched the other evening on its journey to the zenith squarely from the peak of Mount Hood. The glow of the setting sun had hardly faded from the big mountain when his substitute peeked his nose over the north slope and sat for a second on the shoulder half way up to the summit, like the earth on the shoulder of Atlas. Then it journeyed diagonally by the slope till it reached the peak, dipping a little, so that the rugged outlines of the mountain stood out sharply against the deep-red sphere. The moon left the summit like a vast balloon, making a little something all the while. It seemed to hang suspended a few minutes before going further, but soon gathered headway and journeyed forth into the sky. The picture is one which is not often seen, but which is worth crossing a continent to witness.—Morning Oregonian.

The Paradise Fish.
The paradise fish, perhaps the most beautiful of all fishes, is a member of the macropus family. The length is about ten centimetres, and the back is brown, changing to greenish gray on the belly, but marked with changeable yellowish green and blue and red cross-lines. The fins are large in proportion to the body, but are less in females. They are natives of China, where they are usually kept as ornamental creatures; but little is known about them in a wild state. They are peculiarly adapted for being household pets, as they live in very little water, and can be kept out of the water for twenty minutes at a time without injury. They feed on crawfish, insect larvae, worms, mussels, flies, and so on. Their nest consists of a congeries of small air bubbles, in which they deposit the sperm.

Where Death Rate Varies.
While Lowell has a lower death rate than any other English town of over 200,000 inhabitants, it varies very much in the different districts, being as low as 13.3 in Hempstead as high as 27.8 in Limehouse.

Artificial flowers are first mentioned in the fourteenth century, in Italy.

GAMBLING STRATAGEMS.
CLEVER DEVICES TO ENABLE GAMBLERS TO ROB THEIR VICTIMS.

One of These Social Highwaymen Fleeced Guests by Means of a Specially-Constructed Card-Box—Ingenious Contrivance of a European Dressmaker.
Considering that gambling is only a polite form of thieving, it is not very remarkable that confirmed gamblers should stoop to fraud as a means of enhancing their chances of winning; but it is remarkable that other gamblers should be so blind to the devices invented by more ingenious fellows. It is not often that a gambler is sufficiently enterprising and mean to have a card-room specially constructed to facilitate his fleecing his victims and visitors; but to even this length went a man now deceased, who, despite his vast private fortune, systematically preyed upon the pockets of his wealthy acquaintances. The room was constructed so small that only sufficient space was allowed for a square table and the chairs of four players, the object of this being to prevent onlookers or anyone standing behind the particular chair which the host always took. The room was magnificently decorated, and hidden in the deeply-carved black oak paneling were two spy-holes, from which a person on the other side of the wall could see every card of the person sitting opposite the host. When cards were being played a confederate of the host was always watching unseen from these holes, having his finger upon an electric button. This button communicated with a larger button hidden under the carpet just in front of the host's chair, and by this means the confederate was able to communicate with his master what cards were in the hand of his tete-a-tete player. Sitting down in his chair, the arch-sunder put his toe on the invisible button under the table and received the news. It was the confederate's duty to first wire what was strongest suit in "hand" before him. Thus, with one push the button informed the arch-thief that his tete-a-tete's strongest suit was hearts, and so on. When it had been communicated how the suits stood in strength, it was the confederate's duty to wire what the cards were starting with the highest in the highest suit, and going to the lowest in the lowest. So quickly could this scheme be worked that very often the host knew his tete-a-tete's cards before the latter had properly arranged his "hand."

After the strength of the suits had been communicated in this way, the host felt twelve rapid taps on the sole of his shoe, and he knew this meant the queen of hearts. A short pause, and then ten rapid taps told him the next highest card was the ten of hearts. And so on. It is said that, thanks to this ingenious scheme, which was never discovered during the inventor's life, many wealthy persons were brought to the verge of ruin, while their host entertained them in regal style.

How the Moon Climbs Mount Hood.
From the point of view of most Portlanders the moon was launched the other evening on its journey to the zenith squarely from the peak of Mount Hood. The glow of the setting sun had hardly faded from the big mountain when his substitute peeked his nose over the north slope and sat for a second on the shoulder half way up to the summit, like the earth on the shoulder of Atlas. Then it journeyed diagonally by the slope till it reached the peak, dipping a little, so that the rugged outlines of the mountain stood out sharply against the deep-red sphere. The moon left the summit like a vast balloon, making a little something all the while. It seemed to hang suspended a few minutes before going further, but soon gathered headway and journeyed forth into the sky. The picture is one which is not often seen, but which is worth crossing a continent to witness.—Morning Oregonian.

The Paradise Fish.
The paradise fish, perhaps the most beautiful of all fishes, is a member of the macropus family. Artificial flowers are first mentioned in the fourteenth century, in Italy.

HOUSEHOLD MATTERS.
A Closet For Children's Dresses.
An impromptu closet for the children's dresses may be made by putting up a three-cornered shelf about six feet from the floor in one corner of the room. Cover the shelf with figured denim, which is a yard wide and costs about twenty-five cents a yard, and hang curtains of the same from it. Have two strips of wood fastened inside with a number of double hooks screwed into them and you will have a most useful wardrobe. Two other strips with hooks may be nailed below the first, three feet from the floor, if desired.—Ladies' Home Journal.

A Good Rule With Linoleum.
Linoleum should never be touched with either soap or a scrubbing brush. Have it well wiped over with a soft flannel cloth and warm water, drying it carefully with another clean cloth. Skim milk is also a very good thing to wash it with, as it gives it the gloss you wish for. The great rule is to wash linoleum as seldom as possible unless you use skim or sour milk for the purpose, and every now and then polish it with linseed oil or occasionally with beeswax and turpentine furniture polish. Keep in this way it will both look nicer and wear infinitely better, for scrubbing wears it out and too much water rots it.

The Proper Care of Cutlery.
Before putting away knives rub well with a bit of newspaper. Lay knife on a piece of paper, fold its edge over the knife, then another knife, laying them hand to blade, with paper over each. Put each half dozen in separate paper. Then wrap in chamois or flannel, and put into a dry place. They will never rust. To remove rust from knives and forks, wrap article in a cloth soaked in kerosene twenty-four hours, then scour them with a bath brick. Next rub with whiting, then with sweet oil, finally wash in hot soap suds; dry well. Deep spots of red rust on cutlery can be eradicated by rubbing with salt and vinegar. To clean knives use bath brick or well powdered ashes. Use a large cork to rub the moistened powder on, then another cork to dry-dust the article. Wipe with paper, as a cloth would leave dampness or streaks. Twice a week spread cutlery on a tray in the sun for an hour. Never let cutlery lie in water, and never throw it into hot water, as it spoils the handles. Hold by handles while you wash the blades. Never use table cutlery in cooking. Emery powder will remove ordinary stains from ivory knife handles.—New York Journal.

How to Clean Glassware.
The water cannot be too hot for your glasses, and no matter how frail they are they will not break in the coldest weather provide you manage rightly. Heat expands, cold contracts; and the unequal expansion of the inner and outer surfaces of your glass will cause a fracture. Thus, if you pour a hot liquid into a cold glass the inner surface expands more rapidly than the outer; while if you set a cold glass into hot water the reverse takes place—breaking the vessel in either case. Therefore, dip your glasses into the water sideways, and roll them around as you do so with a quick twist of the hand, so that the expansion is equal. Merely observe this simple law of physics and you may wash your glasses with safety in the hottest water. Glasses cannot be clean unless washed in clean, hot water; moreover, they should be wiped as soon as they are taken out of the water, using a clean dry towel. If allowed to stand and drain the water will dry on them in cloudy streaks. Glasses which have been used only for water need no soap; it is only necessary to rinse them in hot water. The superstition that glass washed in hot water becomes brittle probably originated in the fact that if it is allowed to stand in draft, directly after being taken out of the water, the sudden contraction of its outer surface breaks the glass. In the same manner a pitcher, which has held ice lemonade on a hot day, has been known to crack from top to bottom immediately after being suddenly emptied.—American Queen.

Royal Dinner Parties.
The Queen's dinner hour is nine o'clock, but royal dinners are served with commendable rapidity, so, in spite of the lateness of the hour, the banquet is over by ten. Her Majesty precedes her family and guests into the dining room, and again heads the procession on leaving the room. This, by the way, is the arrangement in all royal households. Even when the Duke and Duchess of Fife give a dinner in their Portman Square establishment, the Duchess of Fife goes in to dinner alone and before (instead of after) all her guests.

The Huge Trees of California.
The writer on first visiting timber yards in Northern Europe, could not get rid of the impression that the round timber was all culls or waste. A raftload of logs in the Gotha River in Sweden was thought to consist of telegraph poles. It happened to be a collection of small timber even for there, and a visit to the Pacific Coast of North America, soon after, still further emphasized the enormous difference in the timber resources of the two countries. Soon after arriving in San Francisco there was encountered in the street a squared beam of fir more than 100 feet in length, being hauled to a factory in course of erection. Following this beam to its destination—a woolen factory then being built—it was a matter of astonishment to find all the longitudinal beams, or "strangers," of the same length. This astonishment was increased when the contractor said: "We never bother about dimensions, and just order what we want." A section eight feet in diameter, cut from a redwood tree, completed a new impression of American forest timber.—The Engineering Magazine.

Labor in Madagascar.
In Madagascar there has been a marked rise in wages since the Franco-Malagasy War, blacksmiths receiving one dollar and forty-five cents a day, although carpenters receive only from nineteen to forty-eight cents a day. Native creole carpenters receive a little more, the average ranging from twenty-eight to seventy-seven cents a day. Native dressmakers and seamstresses can be hired from two dollars and forty-one cents to four dollars and eighty-three cents a month, although creole dressmakers and seamstresses receive from five dollars and seventy-nine cents to fourteen dollars and forty-eight cents a month.

Notwithstanding these comparatively high wages in Madagascar, prices, on the whole, are very low, and of course living is fairly cheap. Beef and mutton can be bought in the interior from one to four cents a pound, although beef at Tamatave costs from ten to eighteen cents a pound.—Youth's Companion.

There was nothing Napoleon was so fond of as boiled mutton with onion sauce, and he frequently indulged his taste to such an extent as to make himself ill.

Don't Tobacco Spit and Snake Your Life Away.
To quit tobacco easily and forever, be magnetic, full of life, nerve and vigor, take No-To-Bac, the wonder-worker, that makes weak men strong. All druggists, 50c or \$1. Cure guaranteed. Booklet and sample free. Address: Sterling Remedy Co., Chicago or New York.

The Samuel J. Tilden residence at Grammercy Park was sold the other day for \$180,000, which was \$220,000 less than its cost.

To Cure Constipation Forever.
Take Cascarets Candy Cathartic. 10c or 25c. If C. C. C. fail to cure, druggists refund money.

The capital of Herzegovina has a man named Gjugja, who is 109 years old, and boasts of 135 descendants.

Fits permanently cured. No pills or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. DR. R. H. KLINE, Ltd., 631 Arch St., Philadelphia.

CONSTITIATION

"I have gone 14 days at a time without a movement of the bowels, not being able to move them except by using hot water injections. Chronic constipation for seven years placed me in this terrible condition; during that time I did everything I heard of but never found any relief; such was my case until I began using CASCARETS. I now have from one to three passages a day, and if I was rich I would give \$1000 for each movement; it is such a relief."
—AYLMER L. HUNT,
1033 Russell St., Detroit, Mich.

Some persons say they are never influenced by an advertisement. It is not expected that any one will buy Ivory Soap solely because it is suggested by an advertisement, but if you have never used Ivory Soap, you may be induced to ask some friend about it; should you find—as you probably will—that she is enthusiastic in its praise, then you may try it. Millions of people use Ivory Soap; they use it because they like it. You too will like it. There is a difference in soaps.

COPYRIGHT 1898 BY THE PROCTOR & GAMBLE CO., CINCINNATI

LARGEST KITCHEN IN WORLD.
Built by George IV at Windsor Castle in 1828.

The last of the works of the much-maligned George IV, to be mentioned here is the enlarged and improved royal kitchen (at Windsor castle). It stands—perhaps the largest single kitchen in the world—on ground where royal kitchens have stood from time immemorial. George IV, it was who in 1828 gave it its lofty roof and top-light ventilators, its splendid clock let into the stone walls, and its generally medieval appearance. At the other end of the kitchen is fixed an immense and venerable smokestack, whose origin is lost in the mists of antiquity. One of these annually has the honor of roasting her majesty's baron of beef. The hot-plate table in the center of the kitchen measures no less than 14 feet by nine feet. The batterie de cuisine, in its brilliant array of glittering copper, is large enough to cheer the hearts of a small army of gourmands; and to show its office is no sinecure, one may mention that it has to make an annual visit to the manufacturer for restoration and repair. Lady Bloomfield says of this kitchen in 1842: "The fire was more like Nebuchadnezzar's burning fiery furnace than anything else I can think of now; and though there is no company at Windsor, there were at least 15 or 20 large joints of meat roasting. Charles Murray (comptroller of the household) told me that last year they fed at dinner 113,000 people."
—Pall Mall Magazine.

FARQUHAR RAKE SEPARATOR
Largest draught; most durable, perfect in operation and cheapest.
Farquhar Vibrator Separator
greatest capacity; wastes no grain, cleans ready for market. Specially adapted for merchant threshing and large crops. Thrashes rice, flax and millet. Received medals and awards at three world's fairs.
Farquhar Celebrated Ajax Engine
Received medal and highest award at World's Columbian Exposition. Farquhar's threshing engines are the most perfect in use. Have extra, foot brakes and two injectors. Are very strong and durable and are made as light as is consistent with safety. There is no record of a Farquhar boiler ever exploding.
Farquhar Variable Friction Feed Saw Mill.
Most accurate set works made. Quick re-feeding head blocks and lightning gub back.
Engines, Boilers, Saw Mills and Agricultural Implements Generally.
