A good Democrat was from west-ern Missouri to the Misssippi Valley Democrat to say:

ern Missouri to the Missippi Valley Democrat to say:

"We are having plentof rain, and if it keeps on I feel surger will have overproduction' this yea and all the products of the farm it be cheap and (as the Republicans say) nasty, and in need of protecth. What is that finance committee the senate going to recommend? Mional banks, I suppose. Don't you the that some of the people who havbeen so engulfed by that wave of psperity will see the error of their y and come over and help suppressive wave and its wavers? I think the tional banks are a greater curse, if ssible, to the people than the gold sidard. I believe the government shp should be our standard of a doll whether on gold, paper or silver. I the government be the bank of ite, and delegate that right to no in or corporation."

The propers that were heard to the proper to

THE NATIONA BANKS | know, he said; 'I don't propose to allow the American public to know anything about this campaign that will agitate or excite it. So long as I am in command here, the people of the United States will know only such facts as I deem advisable to allow to be known. Any man who writes any known. Any man who writes any-thing about this campaign contrary to my orders will be expelled from the Philippines. We are not going to have any public agitation about this cam-paign if I can prevent it." And General Otis has always claimed

from the beginning of this abomina-ble business, that he was acting strict-ly under orders from Washington, and he no doubt told the truth. The president of the United States has taken it upon him-self to declare and carry on an il-legal war—illegal by his own adminis-tration—against a people who were our legal war—illegal by his own adminis-tration—against a people who were our friends and ailies, and during this war he has issued orders and exercised au-thority that no ruler on earth would think of assuming to himself, except possibly the czar of Russia or the shah of Persia. And the president of the United States is a servant of the peo-ple! No wonder he courts secrecy re-garding his "benevolent assimilation" in the east. But what have the Amer-ican people to say about it?

TEE ISSUES OF 1900.

Democrats who favor the "second eclaration of independence," made at hicago in 1896, would like to know thy so many of our papers are occuwhy so many of our papers are occupying so much valuable space in their columns with the opinion of men who belong to the so-called goldbug Democracy. These same men—many of them, at least—were in the convention, and there tried to defeat the will of the people; but not being successful, afterward as ardently labored to that end in the campaign that followed, as well as at the polls. Why the opinions of these men shoud be constantly thrust upon the readers of our valuable papers as a reason for changing the platform on the question of bimetallism is a matter of no little concern.

This "second declaration of independence" was adopted over their protest, and nothing has occurred since to change the minds of those who favored its adoption. It was not the intention of the framers and supports of the Chicago platform that it should be set aside at the behest of its enemies, but, like the first declaration of independence, it was the intention that it should stand as the creed of the party that adopted it until the war was over, the victory won and the principles declared firmly imbedded in the laws of the land.

Any number of opinions from the goldbug Democracy, however well collated, in opposition to the Chicago platform, will not serve to change the mind of a single loyal Democrat. It is not empty victory that the true Democrat is seeking, but it is the establishment of correct principles of government for the benefit and enjoyment of the masses. True Democrats prefer to go down in honorable defeat rather than be parties to a meaningless victory. Great reforms are not usually accomplished in a single battle, and most certainly there was nothing in the outcome of "the first great battle" for independent bimetaillism to discourage any of its friends and supporters. Notwithstanding the opposition of the combined forces of the Republican party, the Middle of-the-Road Populist party and the Gold Democracy, aided by the money powers of this country and Europe, the principles of bimetallism came near succeeding.

Still we are told that this issuecannot win. If it cannot win, why not? This is conclusion of some of our papers is certainly not deduced from the results of "the first great battle." The impress of that great educational contest is manifesting itself in every section of the country, and it is a well-known fact that the friends of the independent bimetallism are more numerous today than ever before. It is only by suppressing the true sentiment of the masses and by giving undue prominence through the press to the opinions of its enemies that a victory for bimetallism can even be retarded. Despite the efforts of its enemies, the Chicago platform will continue to be the creed of the Democracy until its principles are victorious at the polls.

M. E. CLODEFELLER.

Crawfordsville, Ind.

Japanese linen is the fabric generally employed in this character of work. It is as fine as silk, and adapted to the most delicate patterns. Some of the designs are so elaborate and perfectly executed as to be scarcely distinguishable from the real Battenberg make.

All sorts of conventional patterns are reproduced from the rarest and most costly specimens, although work of this high standard is not so general in demand as the art embroideries, including doilies, centres, tray cloths and table covers.

Reward of a Willing Mother.

she had a large family at home to look after, and a small boy hardly two mother to break away, pick up a small baby, and establish herself alone in a distant town, merely to sit as a model for a son. Most women would have hesitated, as hoped-for prizes being at mortain quantities, particularly for boys still in their teens, and present is mother did not hesitate. Her son had a large family at home to look as the state of logic, paramount. But this mother did not hesitate. Her son had a saked her to come, and so proved a rare loyality. That was enough for the her At great inconvenience to bertself she went, though cheerfully, and the picture was painted. Now the papers announce that the young boy shainter has won the prize! This will send him for a two-years' course of study in Paris.

The tile British Museum is now pone on Sundays and holidays is due to the Queen, who interested heresto from the papers announce that the young boy aninter has won the prize! This will send him for a two-years' course of study in Paris.

FOR WOMEN.

Invested by the Queen.

Nurse Isabella Smith, of London, has been invested by Her Majesty with the Order of the Royal Red.

Cross at Windsor Castle. Miss Smith has served in the naval hospitals in England, and was for three years in the hospital at Malta. The coveted cross has been bestowed upon her for her courageous bearing when in charge of the nursing staff on the hospital stage which accompanied the Benin expedition. Miss Smith Benin expedition. Miss Smith is now at the Royal Naval Hospital, Haslar.

Tight Sievves Verus Gloves.

No allovances are made for gloves by the dressmakers. The newest sleeves cover the kunkles and are caught round the thumb just like oldworld mittens. With these sleeves at four-button glove is out of the question and we shall have to revert to the one-button glove of the sixties. At the wrist the new sleeves are so tight that even the shortest glove would be in the way, yet it is not at all the thing to wear long gloves ontiated the selection. The new at four-button glove is out of the question and the world in the way, yet it is not at all the thing to wear long gloves ontiated the selection of the problem is Hibernian, to say the least. Wear short sleeves and long gloves, rucked to the elbow.

A New Fashlon Idea.

The makers of fashions are trying to introduce a new idea, suggested doubtless by the prevailing mode of long tunies, loose in front. The new fashion is to induce one to ear the front long and supple without fitting closely. Whether the patrons of the "artists" who have evolved this idea will consent to adopt it remains to be seen. But it is certainly original.

Mexican Lace Industry.

The methods of manufacture in the popular Mexican drawn lace work are directly opposed to those of most lace makers. Instead of weaving the gossamer fabric from single threads stitches are picked out or a solid piece of the finest linen cloth, leaving the remainder in some artistic design.

The school has gone from at the fine of the designs are so elaborate and neglectics in
