Like Finding Money.

The use of the Endless Chain Starch Book in the purchase of "Red Cross" and "Hubingers Best" starch, makes it just like finding money. Why, for only 5e you are enabled to get one large 10e package of "Red Cross" starch, one large 10e package of "Hubinger's Best" starch, with the premiums, two Shakespare panels, printed in twelve beautiful colors, or one Twenteth Century Girl Calendar, embosed in gold. Ask your grocer for this starch and obtain the beautiful Christmas presents free

gold. Ask your grocer for this starch and obtain the beautiful Christmas presents free Ingenuity of the Tahlians. The Tahlians are said to be the people most serviceable to the traveler. They seen, in fact, to command at all times the principal conveniences of life. Haif an hour of daylight is sufficient for building a house of the stems and leaves of the fehl banana, and fire is produced by rubbing sticks. If the running water is deeply sunk among stones, by working in banana leaves they bring it to the surface. The chase of cels, which in those dripping mountains become almost amphibious, offers another instance of their ingenuity. They tear off with their teeth the fibrous bark of "puran" (Hibiscus tillaceus) and a moment after apply it to noosing small fish. If one is sent for fruit he will usually make a basket on the way by plaiting the segments of a cocoanut leaf. A mat will be manufactured with almost equal case. Clothing is always at hand, and a banana leaf serves for an umbrella. Tumblers and bottles are supplied by single joints of the bamboo, and casks or buckets by the long stems, and whether you ask for a hatchet, knife, spoon, toothbrush, or washbasin, the guides will never be found at a loss.—San Francisco Chronia.

How Mrs. Pinkham

(LETTER TO MES. PINKHAM NO. 12,733]

"I am very grateful to you for your kindness and the interest you have taken in me, and truly believe your medicines and advice are worth more to a woman than all the doctors in the world. For years I had female troubles and did nothing for them. Of course I became no better and finally broke down entirely. My troubles began with inflammation and hemorrhages from the kidneys, then inflammation, congestion and falling of the womb and inflammation of ovaries.

"I underwent local treatment every day for some time; then after nearly two months the doctor gave me permission to go back to work. I went back, but in less than a week was compelled to give up and go to bed. On breaking down the second time, I decided to let doctors and their medicine alone and try your remedies. Before the first bottle was gone I felt the effects of it. Three bottles of Lydid E. Pinkham's Vegetable Compound and a package of her Sanative Wash did me more good than all the doctors' treatments and medicine.

"The first remark that greets me now is 'How much better you look!' and you may be sure I never hesitate to tell the cause of my health."—Mrs. E. J. GOODEN, ACKLEY, IA.

NEWS AND NOTES FOR WOMEN.

ing it in such a way as to suit that most troublesome of all fashions."

Fearless Women of Arizona.

Arizona is full of progressive women. There are women ranchers, vaqueros, bank cashiers, stable keepers and butchers. The latest acquisition to the list is Miss Sarah M. Burks, twenty-five years old. She carries the United States mail over the star route from St. Johns to Jimtown, making the trip twice a week. The distance is fifty-two miles. The road is said to be desolate. What streams there are are poisoned with alkali, and the dreariness of the country is shown by the fact that no vegetation can grow there, and only the Indians are ever seen along the trail. Miss Burks makes her trips alone, as a rule, and fears not, for she is a fatalist, and says that death will not come until its appointed hour. She is a crack shot, and always goes armed. She rode over the perilous route first in 1898, when her lather, who was then mail carrier, was ill.

Inther, who was then mail carrier, was ill.

The Newest Broches.

Quite a noteworthy increase in size is manifest in some lines of handsome brocches which are smuch larger than the prevailing average round brooch. These are in twists and coils of gold or enamel with a jewel in the center. Other broches are not only larger but assume the oval shape of the old-fashioned brooch. Onyx matrix forms the large central stone of these, and is surrounded with brilliants. The return to old, picturesque and distinctively feminine styles in dress makes itself felt not only in the character of the jewelry now worn, but also in the amount of it. The sweeping skirts, ornate bodices and throat garnitures call for corresponding elaboration in precious ornaments and a goodly show of gold and gems has become not only permissible, but a recognized and absolutely necessary feature of a fashionable toilette. The cachet of correct style in dress is far from the woman who lacks the taste to employ in an appropriate and pleasing manner the many and beautiful devices of the jewelers of to-day.

*Philosophy of Dress.

"Did you ever notice." said a wom.

to employ in an appropriate and pleasing manner the many and beautiful devices of the jewelers of to-day.

* Philosophy of Dress.

"Did you ever notice," said a woman, "how one is foreordained to wear a certain style of dress, whether she likes it on not? Now, if there's anything I like to wear it's a hat thattips down well over my eyes, and I know I look well in that sort of headgear; but let me pick myself out such a shape, and every friend I have is up in arms because it doesn't seem just my style, and so they keep me wearing the same rather meek hat that ever looks like first cousin to its predecessor of the season before. One's character depends more than you would think on the style of clothing she wears. It's really the clothing she wears. It's really the clothing she wears. It's really the clothing she rease and grace are concerned, for never was the woman born who could be at ease and appear at her best when she knew that her gown was ill-fitting and unbecoming. But my theory is that the dress makes tho woman. You see, most of us have our particular styles thrust upon us, and before we have arrived at years of independent thought we have gradually become adapted to them. Bythe time we do begin to choose our own raiment we are already in the possession of a style to which we belong all our lives. Sometimes I think," and here the woman sighed, "that I could be very dashing and brave if only I were to wear those hats that follow the line of the nose. If you do not believe my theory, just notice some time the difference between your real inward feelings when you wear a red gown and when you wear a sombre gray. I should think it might make a difference with soldiers, too. The English were wise, in my opinion, to clothe the army in red. Blue is all right, for one might absorb the steady virtues of that color, but I should feel hopeless if I had to fight in a gray uniform."—New York Sun.

Training For Housewives.

Training For Housewives.

ing. There is altogether too little attention paid to teaching women good methods of doing honsework. The misery and ill health of many a workingman and his family arise from the housewife's ignorance of culinary and

misery and ill health of many a workingman and his family arise from the housewife's ignorance of culinary and domestic matters.

Properly to prepare food, to care for clothing, to keep rooms clean and to see that sinks and waste pipes are in sanitary condition require knowledge, just as does any other work. Yet too often these tasks are undertaken by a woman who knows absolutely nothing about them. Naturally she wastes much and spoils more. Her home is badly kept and her food improperly cooked, the health of the family suffers, ill-temper, the inevitable accompaniment of dyspepsia, is ever present, and the whole moral tone of the home becomes low.

Knowledge on the part of the wife changes all this. She soon learns that the most expensive foods are not necessarily the best.

Indeed, a simple diet quite within reach of even meagre means, when well cooked and carefully served, furnishes all that can be desired. It pleases the palate and nourishes the body.

The physical condition directly and strongly affects the moral nature. This has been frequently and clearly domonstrated. Therefore, in teaching the wives of the poor properly and intelligently to care for their homes and their husbands and families, the Household Economic Association is not only increasing the happiness of many individuals, but raising the moral tone of whole communities.—New York Journal.

The Law of Compensation.

From the Argonaut: Richard Cumberland, the playwright, was extremely jealous of his young rival, Richard Sheridan. It is related that he took his children to see one of the first performances of "The School for Scandal," and when they screamed with delight their irritable father pinched them, saying: "What are you laughing at? You should not laugh, my angels; there is nothing to laugh at," adding in an undertone: "Keep still, you little dunces." When this was reported to Sheridan, he said: "It was ungrateful in Cumberland to be displeased with his children for laughing at my comedy, for when I went to see his tragedy I laughed from beginning to end."

Trout in a Molasses Barrel.

cetopus of it."—Chicago Tribune.

Trout in a Molasses Earrel.

One of the queerest experiences in catching trout that any man ever had in Maine was had at Moosehead Lake recently by an Attleboro sportsman named Williams. He was standing on the apron of the dam at Wilson's fishing in the quick water below and had met with fair success. Near the shore, on the right hand, in a little eddy, he noticed a barrel lying on its side in several feet of water. He wondered what it was there for, and was so curious that he left his fishing and went down to examine. He found that it was an old molasses barrel, and it was lying so that he could see the bunghole. Of course the barrel was full of water and the man had no idea there was a fish inside of it, but just for curiosity he dropped his hook through the hole, and no sooner had it landed there than the water was beiling, and the fisherman knew he had a trout on the other end. He played him until the fish was tired and when he came to land him he could not get him through the hole. He secured a saw and sawed a piece out of the top of the barrel near the head. The fish came out. It weighed three pounds and was one of the handsomest squarctails caught in that section this year. One of the guides said that the trout must have gone into the barrel when small and had lived on bugs and worms which had taken up their abode on the inside. —Maine Sportsman.

OUALITY AND NEWS.

ONE OF THE IMPORTANT FUNCTIONS OF HIGH-CLASS NEWSPAPERS.

In presenting interesting phases of scientific and economic problems, high-class newspapers frequently give information of as great value in their advertising columns as in those devoted to the publication of the principal events of the day, and when the fame of a product is extended beyond its natural limits into foreign lands, and at Bertain and her Colories and the pricipal sea-ports and cities of Europe, Asia and Africa, it becomes a pleasant duty to note the fact and to tell of the points of excellence on which so great raucess is based. We refer to the now world-famed laxative remedy, Syrup of Figs, the product of the California Fig Syrup Company. The merits of this well-known excellent laxative were medical journals and newspapers of the United States; and is one of the distinct achievements of the press, It is now well known that Syrup of Figs is an ethical proprietary remedy, approved by the most seminent physicians wereywhere, because it is simple and effective, yet pleasant to the taste and acceptable to the system, and not only prompt in its bearfield effects, it is frequently referred to as the remedy of the healthy, because it is used by people who enjoy good health and who live well and feel well and are well informed on all subjects generally, including inxatives. In order to get its beneficial effects, it is necessary to get the genuine Syrup of Figs, which is manufactured by the California Fig Syrup Co. only.
