Why So Many Young Men Fail.
"One trouble with many young men who start out in business is they try to do too many things at once," says Hetty Green, "The Richest Woman in America," in the June *Ladies Home Journal*.
"The result is that they don't know as much as they ought to about any one thing, and they naturally fail. The result is that they don't know as much as they ought to about any one thing, and they naturally fail. The result is that they don't know as much as they ought to about any one thing, and they naturally fail. The you'r enter into their work with the right spirit. To got on and be appreciated a young man must do more than he's paid to do. When he does something that his employer has not thought of he shows that he is valuable. Men are always willing to pay good salaries to people who will think of another is nothing more than a mere tool. Men who can be relied upon are always in demand. The scarcest thing in the world today is a thoroughly reliable man.
