PEARLS OF THOUCHT.

The man who pardons easily courts injury

To see what is right and not to do it, is want of courage.

Affliction teaches a wicked man to pray; prosperity never.

The superior man has dignified easily a superior man has dignified easily without dignified ease. See what a man does, mark his n tive, examine in what he rests; he can a man conceal his character? When you know, a thing to have the superior of the super

can a man conceal his character? When you know a thing, to hold that you know it, and when you do no know a thing, to allow that you do not know it—this is knowledge. What is the good of being ready with the tongue? They who meet mens the procure themselves hatred. Teach more self-denial and make its practice pleasurable, and you create for the world a desting more sublime than ever issued from the brain of the wildest dreamer.

the wildest dreamer. A moral young man's characteris-tics are honesty of speech, respectabi-lity of carriage, industry of mind and consideration for others. With these a young man is as "model" as it is given for an earthly being to be.

given for an earthly being to be. The most vindictive people are those who have brought upon themselves the injury of which they complain. A drunkard who has exhausted the patience of his relatives during long years of indulgence, instead of re-membering their innumerable kind-nesses, turns upon them when they put him under restraint.

CATS IN COLD STORAGE.

Six Months in a Low Temperature Mad a Change in Their Appearance. a change in Their Appearatione Made a change in Their Appearatione. The effect of cold upon the capillary properties of certain animals was strikingly illustrated in New York some time ago. A warehouse man on Jane street was annoyed by the rav-ages of hordes of mice. He had little trouble in the main part of his build-ling where a couple of well-trained cats kept the place tolerably free from the pests, but in the cold-storage por-tion the mice held full sway. They nibbled into packages and boxes, and destroyed such quantifies of fruits that heroic measures were necessary. It seemed rather a crule experiment, but the nuisance became so unbear-able that he decided at last to install a cat in the cold-storage warehouse. Provision to a certain extent was wade for her confort, and she was left to her own devices and the mice. Tussy seemed to flourish, notwith-standing the cold, and in the course of about a week became the mother of a fine litter of six kittens. After a time three of the latter were removed, but the old cat and her remaining progeny were left in their arctic quarters. When allowed out it was acticed that she grew weak and list-less. She tottered about fin an alim-less way, as though all energy and in-terest in life were lost. As soon, how-ever, as she was returned to her cold quarters, she recovered her vigor ausual. The effect of cold up n the capillar

and became as bright and active as usual. A curious feature was soon observed in the kittens. They grew to an im-mense size, their coats became long and shaggy, and the fur much coarser than that of an ordinary cat; it had also a peculiar tendency to curl. The feelers, or whiskers, too, grew to nearly double length, so that when they were placed beside the members of their own immediate family the difference was so marked that they might have easily passed for an entirely different breed. The change took place within three months, giving a curious example of how suddenly and completely nature will adapt itself to the exigencies of climate with the young.-Washington Star.

A Four-footed Policer

Star. A Four-footed Policeman. Joe belonged to a firm in Leith; but he resolved to be a policeman. He was sent back several times to his owners, but returned so persistently to the force that finally he was allowed to join them. He had no ambition to rise in his profession. The sergeants treated him well, but he took little notice of them. He ordained to go on duty with constables only, and his particular beat was the east end of Princes street, with an occasional inspection of Rose street. He walked at a measured dignified pace, or ensconced himsolf at the base of an island lamppost opposite the Reg-ister House, watching and observant. Like Spot at Waverley. bustle and noise pleased him. His tail was run over by a lorry once, and when any of his bluecoated friends inquired about it he rose to show them the higured point. People in civilian dress he did not encourage to speak to him. Tram-way Inspectors or postmen he per-mitted to commend him, but the con-stables alowed no self-imposed work; for it was not only when the sun shone he acted as official watch-log. In foul or fair weather Joe was on sun log. A dyspeptic is never on good terms with himself. Something is always wrong. Get it right by chewing Beeman's Pepsin Gum.

sun shohe he acted as official watch-for. In foul or fair weather Joe was on duty superintending the regulation of traffic or parading his beat. He fared sumptuously, for the neighboring ho-tcle kept their scraps for him. He was given a collar and a coat, and for six years he was in the force; but walking along Princes streets in August, 1807, he fell dead at the heels of his biped comradeguardian of the peace. He is buried near to the scene of his con-stant though unpaid labor in St. An-drew Square Gardens, Joe, having placed himself under the eye of the law, could afford to wink at the tax collecter.—Chambers's Journal.

HER PRECIOUS LITTLE PURSE.

Not much gold did she disburse, Yet weli she spent each golden minute. She had a precious little purse And there was precious little in it. That was before she started out. She meant to shop; her means were amule

ample— When she got back that purse was stout, For it was stuffed with many a sam-ple. -Chicago Record.

HUMOROUS.

"Pa, why do they call it 'cold cash'?" "Because people have a habit of freez-ing to it. I guess." "My wife," boasted the happy young Benedict, "is an open book to me." "Mine, too," declared the old married man. "I can't shut her up."

Amicus-So you have another baby at your house. What is he like? Eminent Critic-Well, he is not very interesting, but he is mighty convinc-tion

ing. "Didn't the quiet in the country be-come monotonous to you?" "Quiet? We had to turn out about seven times every night and chase cows off the porch." "I wonder why they don't name one of the new ships the Mayflower?" "What for?" "Why, so that future generations can say their ancestors came over on 1t."

"What for?" "Why, so that future generations can say their ancestors came over on it." "Little Jim, how can you rush around and play so hard in hot weath-er?" "Aw, ma, 'taint hot at al; me an' Tommy Tibhs has bin a-playin' camp-out in a blizzard." The meanest man up to date is

an' Tommy Tihhs has bin a-playin' camp-out in a blizzard." The meanest man up to date is Sniftkins. He sold Jones a half in-terest in a cow, and then refused to divide the milk, maintainling that Jones owned the front end. Nodd-Are you going to take your servants with you camping out? Todd -If I can get them to. I want to get even with them for all the discom-forts they have caused me. She-Of course, you have heard of the theory that Bacon wrote Shakes-peare's play? Cholly-Aw-yes-aw-the idea is that Shakespear aw sa Ba-con's nom de plume, is it not? "Now," said the new reporter, handing in his copy, "what shall I write about?" "I think," said the editor, fiter glanching at the stuff, you had better right about face, march!"

you had better right about face, march." Miss Johnson-Did he take it hard when yo' refused him? Miss Jack-'son-Yo' bet he took it hard! He started a row an' I hit him wif a flatiron, a stove-lifter an' a "You've given up swimming, haven't you?" "Yes. I don't mean to cult-vate a talent that will put me in a position some time where the drown-ing fellow who can't swim will be sure to drag me under." "Pa, why do they formally notify a man that he is nominated for presid-ent?" "Well, mainly, I thiak, so that he can't get up after he fails to be elected in November and yow he wasn't in polifics at all." She (after discharging the new servant)-I wonder why they call the place where these girls come from an "intelligence office?" There doesn't see no b any there. He-There must be some there, for none ever comes out of it.

out of it. Stox-Do you believe in women hav-ing the same rights as men? Sluggs-Yes, I do. There was one stood in front of where I sat in a car today and tramped all over my feet, and if she'd been a man I would have hit her one, sure. "You tod, me to come and here."

ner one, sure. "You told me to come and begin work today." said the new boy. "Oh, yes," replied the druggist, "you may begin by catching files and putting them on these sheets of "Sure Catch Flypaper," we're displaying in the window."

Flypaper,' we're displaying in the window." "Well that's great." "What's great?" "Our Chinese laundryman has put his prices up on account of the war in China." "How's that?" "Why, he says he has to be paid for the time he waists telling people what he thinks of it." "The hostess is a lovely woman and she gave us a fine dinner. But why did she seem in such a nervous hurry? Really, it was the swiftest feed I ever sat down to." "Then you didn't know her before she married Bixby?" "No." "She used to be a waitress in a quick service dairy lunch."

service dairy lunch." Observing the manager of the drug department, the woman accosted him. in a spirit of badinage. "I have klepto-mania," s.L. said. "What would you advise me to take?" "The elevator, by all means." said the manager wit-tily. "And not something just as good?" exclaimed the woman affect-ing great surprise.

ing great surprise. Where Women Are Never Imprisoned. Austria is the one country in the world which never puts a woman in jurison. Instead of giving a female criminal so many months in jail she is sent, no matter how terrible is her record, to one or other of the convents devoted for the purpose and kept there during the time for which she is sen-tenced. The convent is not a mere pris-on in disguise, for its courtyard stands open all day long, the only bar to egrees being a nun who acts as portress, just as in other convents.

As in other convents. France's Fortresses. France has on the German frontier three first-class fortresses—Belfort, Verdun and Briancon; on the Belgian frontier, Lille, Dunkiark, Arras and Donaz; on the Italian, Lyon, Grenoble and Besancon, and on the Atlantic coast, Rochefort, Lorient and Brest.

SCIENCE NOTES.

The mean density of the sun is only about one-fourth that of the earth. This low density is one of the several reasons for believing that the san's mass is gaseous throughout.

As destroyers of many of our most pestiferous night-flying insects, like mosquitoes, the bat is almost our sole dependence, and, as he is known to hunt insects afoot as well as on the wing, he is also of some value for larvae that do not fly. So says one of the scientists, who also credits the bat with destroying codding moths.

with destroying codding mouns. According to M. Sigriste of the French Academy of Sciences, the only thoroughly scientific shutter for in-stantaneous photography consists of a slit moving rapidly across the sec-sitive plate. But to obtain good re-sults, the space between the plate and the shutter should not exceed one-tenth of a millimetre, and the edges of the slit must be sharp and caro-fully beveled to exclude reflection.

fully beveled to exclude reflection. A remarkable effect of the great hurricane of 1898 in the West India Islands was the complete disappear-ance from the island of St. Vincent of a species of humming-bird, which, previous to the storm, had been one of the commonest and tamest birds that inhabited the island. Other species of humming-birds, of a larger size, survived the tempest, and are yet to be seen in St. Vincent, but the little bronze-green birds with erected crests, which formerly attracted much ad-miration, are all gone.

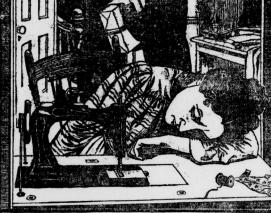

miration, are all gone. The brilliant "photosphere" of the sum is now held to be a shell of clouds, within the sun's gaseous mass, but at an altitude-or distance from the can-tre-such that the temperature is low enough for the partial condensation of those substances which are the most intractable to heat. This theory is well illustrated by steam issuing from the nozzle of a tea kettle. Steam is an invisible gas; but as soon as it becomes cooled below a certain point from contact with the outer air it condenses into a visible vapor, form-ing clouds. The droplets which form the solar clouds are probably mainly of carbon, although condensed to the liquid, or possibly the solid form, they are still hot enough to be intensely in-candescent.

Within a few years scientists have paid particular attention to the collec-tion of skulls which bear wounds, and especially the weapon, and in our museums and those of Europe many remarkable and interesting examples are known. In the French cavern of the Sordes, which may date back 50,000 years, more or less, a woman's skeleton was found, the skull of which had been beaten in with a flint weapon, a gap ing and terrible wound showing in the eright side. Some attempts have been made at surgery, as pieces of the broken bone had been removed and the wound had begun to heal when death ensued. In the Stone Age caves of France many interesting specimens have been found, pointing to the method of death by these crude but telling weapons. Within a few years scientists have

SOUARI NUTS IN CHICAGO.

Odd Products of British Guiana Finding Pavor in Our Fruit Markets. Souria or Su-war-row nuts from Brit-ish Guiana made their first appear-ance in the Chleago market during the last week and promise henceforth to become a regular contribution from South America to the commerce of the North America to the commerce of the North America to the commerce of the North America to the commerce of the Souri nut is very plentiful in parts of British Guiana, but so far as known is not found in any other country on the face of the earth. It is quite pal-atable, but the shell is of unusual thickness and strength, and for this reason the nuts have never been high-ly prized by the not over-industrious natives. In Chleago, however, the nut is finding considerable favor and the importations in this direction promise to reach fully as large pro-portions as those of any other tropical not the same as that of a cocoa-nut, but the exterior, instead of being hardy, is hard and warty and the nut is about the same as that of a cocoa-nut, but the esterior, instead of being hardy with a pair of scissors just above the contents, the upper sides re-maining pressed together just as they were when the scissors began cutting them, and you have the nearest ap-proach to the Souari nut. Fully two-thirds of its bulk is shell and consider-table power must be exerted to release the kernel. The latter, however, is a both the Garyocan nutferum, or tea family, and is also presumed by them to be indigenous to British Guiana. According to the butentut family, though it resembles its North American rel-tive in nothing except perhaps the const thaders and others familiar with it have known it for years as the South American butternut. This, too, is presumed to have been backuese of the standers and others familiar with it have known it for years as the source fueles in North America and s a corruption of the proper name. Coast traders and others familiar with it have known it for years as the sourd hearican butterenut. This, too, is presumed t Biblical Cus... I have alluded to the survey. Initia of the manners and custom... able times, says a correspondent of London newspaper. You have only stop at a well to realize the kind scene at which Rebecca figured. In correspondent conception of the word, it is not a with at all. Sometimes it is a pit in sand, about 15 feet deep. At the bit is tom of this is a hole as big as a with had basin, full of water, which has be lalded out with a mug or cocord shell. The basin keeps on replenisd itself from the springs except in of drouth. - The you, headach well until

A gorgeous costume flashed beneath the brilliant lights of a ball room. The queen of society is radiant to-night. The nervous hands of a weak woman have toiled day and night, the weary form and aching head have known no rest, for the dress must be finished in time.

To the dress may be interact in one. To that queen of society and her dressmaker we would say a word. One through hothouse culture, luxury and social excitement, and the other through the toil of necessity, may some day find their ailments a common cause.

Nervous prostration, excitability, fainting spells, dizzi-ness, sleeplessness, loss of appetite and strength, all indicate serious trouble, which has been promoted by an over-taxed

For the society queen and the dressmaker alike, there is nothing so reliable as Lydia E. Pinkham's Vegetable **Compound** to restore strength, vigor, and happiness.

Mrs. Lizzie Anderson, 49 Union St., Salem, N. J., writes :

Mrs. Lizzie Anderson, 49 Union St., Salem, N. J., Writzs: "DEAR MRS. PINKHAM:--I feel it is my duty to write and tell yor how grateful I am to you for what your medicine has done for me. At car time I suffered everything a woman could. I had inflammation of the ovaries, failing of the womb, and leucorrhees. At times could not hold a needle to sew. The first dose of your Vegetable Compound helped me so much that I kept on using it. I have now taken six bottles and am well and able to do my work. I also ride a wheel and feel no bad effects from it. I am thankful to the Giver of all good for giving you the wisdom of curing suffering women. I recommend your med-dicates."

Ayer's Pilla Ayer's Ague Cure Notes From the Paris Exposition. "The Singer Manufacturing Com-pany, of 149 Broadway, New York, show their usual American enterprise by having a very creditable exhibit located in Group XIII, Class 70, at the Paris International Exposition, where they show to great advantage the cel-ebrated Singer Sewing-Machine which is used in every country on the globe, both for family use and for manufac-turing purposes. The writer was highly pleased with this display and observed with much setisfaction that twas favorably commented upon by visitors generally. The Grand Prize was awarded by the International Jury to Singer Sew-ing-Machines for superior excellence in design, construction, efficiency and for remarkable development and adap-tion to every stitching process used in distinction of absolutely superior machines was awarded at Paris, and this distinction of absolutely superior fuerit confirms the previous action of the International Jury at the World's Columbian Exposition, in Chicago, where Singer Machines received fifty-four distinct awards, being more than were received by all other kinds of seving machines combibed. Should it be possible that any of elebrated Singer Machine, we would espectfully advise that they call at any of the Singer salesroons, which and be found in all cities and most towns in the United States."

Every year, on June 30 the pension-ers of the Civil War are counted. In June, 1898, the number on the lists was 993.714. Last year there were about 2.000 less, and this year also there are lewer than in 1898.
