

# Nerves that Die

For lack of nourishment are just as dead as though they were severed with a knife. In either case the base of supplies has been interfered with. Nerves that need nourishing make their wants known through headache, backache, loss of appetite, indigestion, fluttering of the heart, irritability, sleeplessness, and general weakness. Feed the hungry nerves, build them up and make them strong and vigorous, full of vim, vitality and power, with the great nerve food and tonic, Dr. Miles' Nervine.

"Although an old pensioner, I scarcely knew a sick day all my life till two years ago. I had La Grippe, it settled in my back and I was bedfast for four months. I was so nervous and restless that I could not sleep at all. A neighbor advised Dr. Miles' Nervine, and after taking the second dose I slept naturally. After that I grew better fast until I was well."  
W. O. MATHEWS, Springdale, Ark.

# Dr. Miles' Nervine

**Well Babies Are Good Babies**

**MOST LITTLE BABIES DIE, either from bowel troubles or from diseases which they contract because they are in a weak and feeble condition from bowel troubles.**

Mothers who are seeking the ideal and proper medicine to give their little ones for constipation, diarrhoea, colic and simple fever will find LAXAKOLA the great family remedy.

It is the best and most effective laxative for children. BEST because it is safe and made entirely of harmless ingredients. BEST because it is non-irritating and never gripes or causes pain or irritation. BEST because it is sure and never fails. BEST because "Children like it and ask for it."

It is a dangerous thing to give little babies violent remedies that rack and rend their little bodies. DON'T DO IT—give them LAXAKOLA.

A few drops can be given with safety to very young babies, and will often relieve colic by expelling the wind and gas that cause it, and it also will check simple fevers, break up colds and clear the coated tongue.

Great relief is experienced when administered to young children suffering from diarrhoea, accompanied with white or green evacuations, from the fact that LAXAKOLA neutralizes the acidity of the bowels and carries out the cause of fermentation, aids digestion, relieves restlessness, assists nature and induces sleep.

**LAXAKOLA FOR WOMEN.** It is a gentle and safe remedy to use during all conditions of health of the greatest value to women in delicate and delicate constitutions require a mild and efficient laxative and tonic, and is invaluable in soothing to relieve colic. It improves the complexion, brightens the eyes, sharpens the appetite, quickens the circulation, removes muddy and blotched condition of the skin and cures skin blemishes to a certain extent by removing the cause. ### The Uses of Muck.

We have found muck a valuable absorbent to use in the stables, hogyards and other places where we had need of an absorbent. If we placed it under cover when dry in the fall; also valuable to mix with manure from poultry houses, vaults and even to mix with fish when we were where we could get the bony or menhaden fish. Some have advised the use of lime to correct the effects of the acid in it, but we never tried it, preferring the seasoning of the sun and frost, which can be helped in its work by throwing the heap over in summer and perhaps in the late fall again. The muck which contains much sand is worth but little and will not repay trouble in getting it out and handling it.

### She Answered It.

An inspector was examining a class in religious knowledge and asked this question of a little girl, intending it for a catch: "What was the difference between Noah's ark and Joan of Arc?" He was not a little surprised when the child, answering, said, "The difference was that Noah's ark was made of wood, while Joan of Arc was made of Orleans."—Exchange.

### So Inconsiderate of Him.

Married Daughter—Oh, dear! I don't have a minute's peace when my husband is in the house. He is always calling me to help him do something or other.

### Mother—What does he want now?

### That Is Different.

Mrs. Crimmonbeak—I see by this paper that some statistician discovered that the average woman carries 40 to 60 miles of hair on her head.

### Mr. Crimmonbeak—And then she makes trouble if her husband happens to carry a couple of yards of it on his coat sleeve.
