Hospital For Sick Wheat Great Cereal Infirmary at Port Ar-thur on Lake Superior - Wom-derful Cures Effected. SODOOOCOOOCOOOCOOOCOOCOCOCOCOCOCO The Intert this

The latest thing in the hospital line is an infimmry for sick wheat, where various allments of the kernel are treated and in many cases a perfect cure is effected.

various ailments of the kernel are treated and in many cases a perfect gure is effected. * There is an immense annual loss re-sulting from wet or diseased wheat. The loss from loose snut alone is at least \$18,000,000 a year. The Depart-ment of Agriculture has disseminated a great deal of information among the farmers in regard to the diseases of wheat and the means for bringing about a cure, but not much benefit has resulted from the information. In the large wheat sections of Manitoba and the Northwest the same conditions prevail, and it was with the object of reducing the loss to a minimum that the wheat hospital has been estab-lished at Pert Arthur, at the north-west end of Lake Superior. Here an elaborate system is in use for restor-ing diseased wheat to a healthy state. The building is in the form of a large elevator, very similar to the common grain elevators of the United States and Canada. It is suported out in the lake upon crib work, so that vessels may come alongside and carry the cured wheat directly to the East of foreign ports. About 2,000,000 bushels of wheat are treated in the hospital every year. Where the disease of the wheat is

every year. Where the disease of the wheat is of a very virulent type, it is impossi-ble to improve it in health. Discases known as "stinking smut" or "bunt"

are beyond all help. In the advances

pital, it comes out in a normal contra-tion and ready for the market as first class wheat. Scouring is the treatment given for Suit. The dirity, wheat is passed through rapidly revolving machines of metal and the dirt is removed by fric-tion. In one stage of the treatment the wheat is thrown from the top of the elevator to the bottom floor, and the erosion is such that in a few months pine planks, two and a half inclues in thickness, will be completely worn out. As a great amount of dust is thrown off from the smutty wheat in this treatment, the employes in the hospitals are compelled to wear face masks. These are made of hard white

ers. It is said that wheat passing through this treatment is better for milling pur-poses than the normal wheat, from the fact that a part of the coat, which has to be removed in milling, is removed by the treatment. There is none of it used in the flour mills of this coun-try, however, most of it being shipped to Europe and Eastern Canada.

Discovery of Extraordinary Plant. What is probably the most What is probably the most extra-ordinary plant ever discovered has now been found by E. A. Suverkrop, of Philadelphia, who, during trips to South America, has for some years SEP DET

been contributing to the collection of his friend, Professor N.E. Brown, of the Herbariun, Kew Gardens, Lon-don. The amazing plant which Mr. Suverkrop has now found is an orchid

Suverkrop has now found is an orchid that takes a drink whenever it feels thirsty by letting down a tube into the water, the tube, when not in use, being colled up on top of the plant. "One hot afternoon," says Mr. Su-verkrop, "I sat down under some brush wood at the side of a lagoon on the Rio de la Plata. Near at hand was a forest of dead short trees, which had actually been choked to death by or-chids and climbing cacit. In front of me, and stretching over the water of the lagoon and about a foot above it, was a branch of one of these dead trees. Here and there clusters of com-on 'planta del apre' grew on it, and a mon 'planta del ayre' grew on it, and a network of green cacti twined around

"Among the orchids I noted one dif-"Among the orchids I noted one dif-ferent from the rest, the leaves, sharp lancehead shaped, growing all round the root and radiating from it. From the centre or axis of the plant hung a long stender stem about one-eighth of an inch thick by one-fourth inch wide, the lower end of which was in the water to a depth of about four inches. "I at once wont over the oxamine my

water to a depth of about four inches. "I at once went over to examine my discovery. Imagine my surprise when I touched the plant to see this centre stem gradually contract and convul-sively roll itself up in a spiral like a roll of tape. "But more surprising yet was the ob-ject and construction of this stem. I found on close examination and dissec-tion that it was a long siender flat tube, the walls about 1-82 of an inch thiek, cellular in construction, open at the outer end and connected at the in-ner end to the roots by a series of hair like tubes.

ner end to the roots by a series of hair like tubes. "By subsequent observation I found that when the plant was in want of water this tube would gradualfy un-wind till if dipped into the water. Then it would slowly coil round and wind up, carrying with it the amount of water that that part of the tube which had been immersed contained, until when the final coil was taken the water was dumped, as it were, direct Into the roots of the plant. The coil re-mained in this position until the plant required more water. Should the plant, however, be touched while the tube is extended, the orchid acts like the sensitive plant (mimesa) and the coiling action is much more rapid. "I found many of these plants, all directly over the water or over where the water had been. In the latter case it was almost pliftul to see how this rube would work its way over the ground in search of the water that was not."

Little Known About Morocco

Little Known Abent Moroeco. Nobody knows what the population of Moroeco is. Estimates place it all the way from 2,500,000 to 3,400,000, says a correspondent of the New York Press. A large part of the country is totally unexplored. The French lately have gone in behind Moroeco and ex-tended the boundaries of Algiers, so as to take in the Tuat region, a chain of fertile oases through which run the caravan rotes. The Sultan has expos-tulated and is still expostulating, but with no effect so far as can be seen. Moroeco is sometimes called the "slek man of the West," but those best in formed believe that it is a pretty lively slek man. sick man.

England Fears Timber Famine If it were not for the foreign sup-plies England receives a timber fam-ine would have overtaken the country long ago, becauss the home-grown sup-ply has not been able to meet a time of the demand for long enough, and that only of inferior kinds of timber, says a British agricultural journal. If the foreign supply of fir alone was to fall off sensibly now the whole building trade of the country would come to a partial standstill and the wagon com-panies would be next to idle.

30000000000

this SOME STARTLING FACTS ABOUT THE VICE OF INTEMPERANCE.

The Worst Drink of All is Absinthe-1t Will Produce the Same Evils as Al-cohol and in Addition Will Kill Man's Conscience. It is a great folly which induces man to-day to be indifferent to the healthy drinks tention to manufacturing alcoholie drinks. It has though to find alcohol a source of joy, a source of vigor. He has only found int unhappiness, ruin, decreptitude and linkes. It is not enough for man to loss his reason through alcohol. He wanted still further to do something to satisfy his orst mainters. He nurst have a soverieue have results, but would also deprive him of his conscience. She havented absinthe. Working people in the great towns, women of the pople, the idle peasantry, are duped by this dreadful liquor. They are monot twey are town and the source of the people, the idle peasantry, are duped by this dreadful liquor. They are immerstive greats each an appetite is a dark hour. When the source of the people of the idle peasantry, are duped by this dreadful liquor. They are immerstive, and the source of absinthe. Working people is a source of the people of the idle peasantry, are duped by this dreadful liquor. They are immerst the can no longer work. He is a dark hour. When the source of which is filled by advanta? See, there, a man whome body is a people of the idle peasantry is fore allow the is covered with perspiration, he waves a triphtened look. He has had a mo-mentary unconscionses and a sudden dis-tinger of absinthe. The source of which a student data dar-monent the sea to children. He has fallen from a scaffolding. A sudden under forewer his wife and children. He has fallen from a scaffolding. A sudden under of insensible mersons. A man if absinthe drinking. Be below in the court where there are a minet of insensible mersons. A man if are instance? The people are ter-fined to see an unhappy man heating he are all distorted. He is an endleptic, and the heat has inder the did through absinthe drinking. Be below in the court where there are a merson of insensible mersons. A man is incr

Are Xon Using Allen's Foot-Ease ? It is the only cure for Swellen, Smaring, Tired, Aching, Hot. Sweating Feet, Corns and Dunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoce, Cures while you walk. At all Druggiets and Shoc Stores, 25°, Sample scort FriEE. Address, Allen S. Olmsted, LeBoy, N. Y. We pay in the neighborhood of \$50, 000,000 a year in taxes on sugar.

Headaches! Headaches! There is no excuse for a headaches; in Garfield Realache Powders cure them quick-ly and aurely, and make one feel well; they never harm. Try them. By the game laws of New Hampshire no ndividual is allowed to kill more than ifteen partridges in one day.

"Just What We Thought." "Just What We Thought." An exchange devoted to the liquor busi-ness quotes a prohibition paper as saying: "We are oposed to the free and unlimited coinage of drunkards," and adds: "So are yee. And so is every decent, self-respecting liquor dealer." As every liquor dealer gives his whole takes and energy to the mak-gives his whole takes and energy to the mak-lis not a "decent, self-respecting" man among them. Well, that is just what we thought.—Pittsburg Christian Advocate.

Very Significant. The London Daily Mail, in a recent arti-cle on the beer poisoning at Manchester, relating to a party of workman in Not-from the Manchester district, says: "The only man who escaped was a total ab-stainer."

In every package of LION COFFEE you will find a fully illustrated and descriptive list. No housekeeper, in fact, no woman, man, boy or girl will fail to find in the list some article which will contribute to their happiness, comfort and convenience, and which they may have by simply cutting out a certain number of Lion Heads from the wrappers of our one pound sealed packages (which is the only form in which the secolent coffice is sold). WOOLSON SPICE CO., TOLEDO, OHIO.

Piles Cured While You Sleep

You are costive, and nature is under a constant strain to relieve the condition. This causes a rush of blood to the rectum, and before You are costive, and nature is under a constant strain to relieve the condition. This causes a fush of occur to the restant and cause long congested lumps appear, itching, painful, bleeding. Then you have piles. There are many kinds and many cures, but piles are cot cura-ble unless you assist nature in removing the cause. CASCARETS make effort easy, regulate and soften the stools, relieving the tension, and giving nature a chance to use her healing power. Piles, hemorrholds, fistula, and other rectal troubles yield to the treatment, and Cascarets quickly and surely remove them forever. Don't be persuaded to experiment with anything else!
