Entered at the Postoflice at Freeland, Pa.

Make all money orders, checks, etc., payable to the Tribune Printing Company, Limited. FREELAND, SEPTEMBER 27, 1901.

A Wonderful Cure. Some charitable women were recent-y inspecting the wards of a Baltimore iospital when they chanced to see a door fellow, the expression of whose ace melted their hearts.

'My poor man," said one of the womsympathetically, "you seem to suf-

Sure, mum," he answered, "I have

fer agonies." "Sure, num," he answered, "I have in "stre, num," he answered, "I have the rheumatism." "Is there anything I could do for yon?" asked the kind hearted woman. "We4-I," slowly muttered the patient, "I would like to have my face shaved, but I haven't the coln." The women held a hasty consulta-tion, and one of them finally drew a crisp \$2 bill from her purse. Turning to the patient, she said, "There, take this, and may you soon get better." Her wish was evidently gratified, for the next day when she called at the hospital to see the good effects of a shave on the rheumatic patient she was told that shortly after she had left on the previous day he had shown such marked improvement that he said he was able to get up and hurrledly left the hospital before a barber had been summoned. It was evident that the \$2 bill had wrought the wonder.—Balti-more Sun.

An Arctic Bill of Fare. The Eskinos at home in their native frozen wilds do nat believe in cooking. Their meat, be it seal, fish, venison, trout, salmon, whale blubber or cod-fish, they devour in its natural raw state and with the same gusto with which the average small boy tackles a waterneion. As for bread and vege-tables, they have none. They set their seal oil lamps going, suspend a soap-stone dish filed with snow over it, and with the water thus obtained they mix an equal quantity of molasses procured from the Hudson Bay company. That they drink and are happy. That is the sum total of an arctic cuisine.

# A Flame Combination.

If a small quantity of chlorate of potash be powdered and mixed with an

potash be powdered and mixed with an equal quantity of powdered sugar, a candle may be lighted by means of the mixture without matches. Place a little of it in the depression around the wick of a candle that has been previously used and then touch the mixture with a glass rod the end of which has been dipped in oil of vit-riol. It will burst into flame, lighting the candle.

## An Elaborate Bank Note

An Elaborate Bank Note. The most elaborate bank note is the hundred ruble note of Russia, of the time of the Empress Catherine, which is a gorgeous piece of paper about 4 inches by 10. The note is barred from top to bottom with all the colors of the rainbow blended as when thrown through a prism. In the center in bold relief is a large, finely excented vi-gnette of the Empress Catherine I in black.—London Tit-Bits.

Testimony of the Nose. An eminent physician now proclaims that the ancient and general opinion that the nose is an index to charac-ter is a fallacy. And it may be pro-claimed with fully as much confidence that there is nothing which any emi-nent physician knows to be so that other eminent physicians do not know to be "ain't so."-Louisville Courier-Journal.

Dectined the Honor. "Perkins," said Colonel Hankthun-der, "you have named a new brand of whisky after me, have you not, suh?" "I have taken that Iberty, colonel," answered the distiller. "Well, suh," rejoined the colonel, "I shall have to ask you to call it some-thing else. I have tried it, suh."--Chiegeo Tribune.

ORDINANCE OF THE BOARD OF Health of the Borough of Freeland, Fa.,
