

Hindu Sword Marriages.

At the last general monthly meeting of the Anthropological Society of Bombay a paper prepared by Mr. Sarat Chunder Mitter of Berar was read by Mr. Jivanji Jamshedji Modi, showing how many different roles a sword plays in Hindu manners and customs. There are often warlike tribes among whom oaths taken over a sword are binding—while taken otherwise they are not. A similar sentiment prevails among some predatory classes of Europe, where oaths taken over their weapons of offense—a dagger, a poniard, a rapier—are considered binding. The idea with these classes seems to be that perjury committed after taking oaths over their weapons recoils, that they die by the weapon against which they perjure themselves. In Berar, in India, women who are about to lead an irregular life marry a sword. This marriage in name, as an emblem of conjugal life, serves as a ray of consolation to them in the midst of their evil doings. In certain parts of India when a Hindu is about to marry a third wife—which marriage is considered an ill omen—he marries a tree, for obviating the ill omen, before he marries the third lady. In Kathiawar there is still the custom for Rajput princes who are much married to marry in person only the first wife and to marry other wives by means of a sword. They send over their sword to the bride's people; the bride is married to it with all the required pomp and splendor, the only difference being that the prince's sword becomes a substitute for him—the bridegroom. The legality of this marriage to a sword is indisputable. The bride married to it enters the Rajput zenana as a legally married wife.

New War on Ragtime.

Chicago musicians of the higher class—those who have engagements with the Thomas Orchestra, theater orchestras and concert companies—are discussing a plan of forming a new organization and seceding from the Chicago Federation of Musicians. The reason is the feeling that inferior musicians who play for dances and for money, rather than art's sake, make up the body of the federation. The others want some distinction between the men who play ragtime and think it is music and those who are called upon to interpret the difficult compositions of Wagner, Verdi, Mascagni and Gounod. There are 2,000 union musicians in Chicago, and of these 400 or 500 are said to be in sympathy with the movement.

Enjoined From Baptism.

Flora Bender, of Frederick, Md., was enjoined from being baptized. The preacher was willing, but as in her case baptism would mean immersion in a neighboring creek, her parents objected. Miss Flora insisted, though warned that she was not strong enough to stand such a ordeal. Then her parents got out an injunction restraining her until the water shall be of a more congenial temperature.

What Morgan Made in 1901.

Two well informed Wall street, New York, men were discussing J. Pierpont Morgan. Said one: "I have had a long talk with a member of his firm, and while he let fall no secrets, yet from what I could gather, Mr. Morgan made last year about \$42,000,000." The other agreed that the estimate was practically correct from what he could learn.

There are 5,198,000 Hebrews in Russia, according to the latest census returns.

Ice one and one-half inches thick will support a man; 18 inches thick a railway train.

St. Jacobs Oil

ALL words familiar throughout the civilized world, words that stand for all that is pure and effective in medicine.

No power on earth has been able to bar its progress, because it did its appointed work.

In every clime and with every people it has worked wonders in alleviating pain.

Its cures of Rheumatism have approached the miraculous.

Its intrinsic value is the secret of success—of its world-wide popularity and of its wonderful sale—of its constant growth.

Its virtues are stamped on the hearts of the once crippled and tortured everywhere—never to be effaced while life lasts.

Such in brief is ST. JACOBS OIL, the pain killing marvel of the century.

IT ACTS LIKE MAGIC!

CONQUERS PAIN.

CLOVER

Largest growers of Clover, Timothy and Grasses. Our northern grown Clover, for vigor, frost and drought resisting properties, has justly become famous. SUPERIOR CLOVER, lb. \$5.00; 100 lbs. \$5.00. The Grasses Prime Clover, lb. \$5.00; 100 lbs. \$5.00.

Samples Clover, Timothy and Grasses and great Catalog mailed you for 6c postage.

A COUNTRY BOY'S SPORT.

HIS LIFE IS IDEAL FROM A HEALTH POINT OF VIEW.

The Lines Between Some Kinds of Work and Many Forms of Recreation Can Hardly Be Drawn—The Circus is Apparently a Bright Particular Feature.

Nobody realizes more fully than we farmers that "all work and no play makes Jack a dull boy." While most of the work done on the farm by boys is regarded by them as play, and there is even a scramble among them for some kinds of it, there are special times for a great variety of special recreations which run the year round. The lines between some kinds of work and many forms of recreation can hardly be drawn. There is very little sport more enjoyable to the average boy than working on the roads, when he has much amusement in dodging the eye of the supervisor; in helping the neighbors to plant corn or thresh, in apple parings, in stirring of apple butter in the big copper kettle, in corn husking on the barn floor, which often winds up with an old-fashioned country dance.

The fun in special recreations begins early in the spring. With the melting of the last snows the boys are off for suckers and trout. Just over the hills from a dozen farms near me in one way is a fine run for suckers, and by the other in the slopes of the mountain are to be found the best of trout streams. When it is too wet to plow or plant oats or corn, the boys dig worms, get out the fishing lines, cut holes along the bottoms and are off for the stream at break of day. The finest angler in all our township is now 65 years of age, but is still as spry on a trout stream as a boy of 12. One day last summer he caught 120 large trout in a half day's fishing. He is an old man who does not take at least one day off with his boys for trout. They have no fancy tackle or baskets, but they almost always come home with splendid strings of trout. They have many laughs at the city dude who follows them up the stream with his costly tackle and comes down without a trout. When he asks a country boy for the best stream he is often sent up the wrong branch, but he usually can buy enough trout from his successful competitor to make a good showing when he returns to town.

Then there comes the circus, once or twice a year, and it is common for us farmers to promise the boys that if they work well all the week they shall go to the circus. This amusement has standing through the country generally. Our old minister, who preached in our valley for 60 years, refused once to attend a meeting of the Blairsville Presbytery when it met in his town lest he would thereby countenance heresy, but he attended every circus that came to the village. The boys pick up all kinds of innocent tricks from the clown, and it is very common that next day after a boy has been at a circus to see him standing on the horse which he rides in the cultivator, and the father, who holds the handles, enjoying it all.

Going to town is always a treat, and especially going for the mail, which gives the golden opportunity of the week for store-box gossip. On this account the rural mail system is not regarded with favor in some quarters, as it takes away the stock excuse which the farmer can give his wife for a trip to the village. But it is likely to be a good while before the United States interferes with our necessary trips to the blacksmith and shoemaker.

The wife usually claims the trip to town when it comes to taking in the eggs and butter. She is expected to provide out of his produce the groceries for the family and an occasional plug of tobacco for the head of the house.

An amusement likely to occur at any time is the old-fashioned serenade. We had one last summer. The young couple took a trip to the county seat and the night they returned the boys came from all quarters, with horns, bells and a "Crawford county fiddle," which is made of a store box, across which a resined pole is drawn. A city boy criticized the noise, but it strikes most of us farmers that it is not so bad as some of the machines they run with a crank in the city. One of our neighbors tells me that our serenade is as good as the music he heard in a Chinese theatre in Portland, when he was out on a land excursion last spring.

Sports of the fall, work and play combined, begin before the almanac indicates the end of summer. Picking apples, making cider, boiling apple butter, husking corn, gathering the pumpkins and similar work made an unending round of enjoyment for the young people. Halloween opens the season for parties. Sleight parties are common all winter and we drive six or eight miles frequently to pass the evening. There is always the big supper of chicken and waffles, and we eat apples and crack shellbarks after the games of the evening are ended. The winter sports are now on in my neighborhood and the jingle of the sleighbell has already been heard, as we have had snow over a foot deep, and almost every neighbor has a sleigh. Our parties often wind up with the "Virginia reel," for which I have sometimes played the fiddle. Several of the boys in our region play the fiddle well. School is the standing enjoyment for our children. Their dinner baskets are filled with Rambo apples, doughnuts, pumpkin pie and bread and butter. The mile or two home they play all the way, kicking the dinner basket for a football or

playing "tag." Sometimes there is the variety of punching out a rabbit from a hollow log, when a girl is expected to catch him in her apron as he comes out. Plenty of recesses are given at school, when the children play "black-man," "prisoners' base," "town ball," and "over ball." When there is enough snow to make a track the popular enjoyment is to make a train by 10 of 12 children sitting down, one behind the other, each clasping the one in front, and the whole drawn by two strong boys, who often delight in throwing the whole train into a snow-drift.

It would take a whole chapter to tell of the spelling school and the singing school and the debating society and even of the church, all of which are recreations to the farmer and his family.

For months hunting is a great enjoyment. The farmer has the first chance at the wild turkeys, ruffed grouse, squirrels and rabbits. And no city man ever comes in sight of his success. A few winters ago I shot three wild turkeys at one shot. While the city men who came to our parts last fall went home saying that there was no game, I got all the gray squirrels I wanted. My limit was two a day, which I usually got in half an hour, and this I kept up for many days. There is nothing more enjoyable than to see a dozen neighbor boys start across the fields, distributed like a squad of soldiers, gathering in everything before them.

The greatest treat we had last fall in our neighborhood was "taking a bee tree." A neighbor had followed the lead of the bees from a buckwheat field when in bloom, keeping the trail for miles, until at length he located the bees in a dead chestnut tree in a mountain ravine. The tree was marked, and as soon as the weather was cool we went one night by moonlight and cut the tree. With smoking rags we smothered the bees and took the honey. For 11 feet the tree was packed with honey, with an average thickness of six inches, much of it candied. We got 120 pounds of honey and after filling three wooden buckets we made bark baskets in which to carry the rest of the comb. We are now living on buckwheat cakes and honey, with juicy, fresh pork, chicken, turkey and game for variety. The beauty of all these country recreations is that no coupon tickets are necessary, but admission is absolutely free—except to the circus.

QUAINT AND CURIOUS.

Edgar A. Poe, the brilliant American writer, discovered inexpressible satisfaction in wandering through graveyards. And the same is said to be true of witty and genial Oliver Wendell Holmes.

A Boston woman will agitate for a law prohibiting the boiling or roasting of chestnuts, on the ground that it involves painful death of worms "whose right to life, liberty and the pursuit of happiness is no less than that of the most highly dowered man."

In the 20 odd palaces of the German emperor some 3500 servants are employed, about 2000 of these being women. A huge income is, of course, required for keeping up establishments on this scale, and the emperor's total expenditure is estimated at some \$25,000 a day.

One of the most curious plants in the world is the toothbrush plant, a species of creeper which grows in Jamaica. By cutting a piece of the stem and fraying the ends the natives make a toothbrush, and a dentifrice to use with it is prepared by pulverizing the dead stems.

The British recruiting system is an illustration of the red tape that obtains in the war office rules. The recruit's name has to be entered some 62 times, the signatures of superior officers are given 23 times in each particular case, and a bulky document has been got ready by the time each man is ripe to take the oath.

Another bird, believed to have become extinct, is the California condor, twice as large as the condor of the Andes. Its length was five feet, weight 25 pounds and spread of wings 12 feet. An egg of the bird is worth \$2000 to collectors, but none has been found for 17 years. Eggs of the golden eagle sell in San Francisco for \$32 each.

One of the strangest phases of western life is seen in the little town of Lincoln Centre, Kan., where a whole family, consisting of the father, mother and 10 children, go to school. The older members of the family attend Lincoln college. The father and the son look after the farm, while the mother and daughters do sewing and washing.

Did She Take the Hint?

A distinguished cavalry leader was once at a dinner party to which he had been invited as the guest of honor. Beside him was a loquacious widow, with hair of raven black, who rudely interrupted the conversation by asking the warrior why it was that his beard was still black, while his hair was turning gray.

With great politeness the old soldier turned toward her.

"I fear I cannot give you a satisfactory answer," said he, "unless, possibly, the reason is that I have used my brain a little more than I have my jaw."

Tit-Bits.

It is estimated that the electric organ of a lively electric fish would give a discharge of 200 volts.

PEARLS OF THOUGHT.

He who flatters you is your enemy.—Carlan.

Self-trust is the essence of heroism.—Emerson.

Lying is a certain mark of cowardice.—Southey.

We cannot always oblige, but we can always speak obligingly.—Voltaire.

He who loses his conscience has nothing left worth keeping.—Izaak Walton.

Monuments are the grappling-irons that bind one generation to another.—Joubert.

Next to the slanderer we detest the bearer of the slander to our ears.—M. H. Catherwood.

The passionate are like men standing on their heads; they see all things the wrong way.—Plato.

Misrepresent nothing. No permanent success was ever built upon a foundation of fraud.—Insurance Press.

MARCONI'S DEBT.

Names of Workers in Science to Whom He Owes Much.

At the annual dinner of the Engineers, where he was guest, Signor Marconi, among other things, said:

"I desire to say in this presence that I have built very greatly on the work of my predecessors, and I wish to mention Maxwell, Lord Kelvin, Prof. Henry, Prof. Hertz, Prof. A. G. Bell."

This is downright disingenuous. Signor Marconi is not ignorant of the history of wireless telegraphy; of it he might say, "All of which I saw, and a part of which I was." The names of the men who, far more than himself, have made his recent triumph possible, are known to him, all. Why, then, are the real workers, to whom he is indebted, passed in silence, and others, to whom he owes little—in one case nothing—set in large view?

The existence of electric waves was predicted by Maxwell in 1861. They were actually discovered by Hertz in 1887. But neither Maxwell nor Hertz ever dreamed of utilizing these new oscillations to transmit signals. That idea came first in view with the discovery of the delicate coherer by Prof. Branly of Paris. Yet even he failed to catch sight of its tremendous possibilities.

It was Prof. Lodge of Liverpool who appears to have been the first, and it was he who rigged up the little tapper, or de-coherer, which makes it easy to spell out words on a tape, just as with an ordinary Morse instrument. Prof. Bose, the Hindu savant, also contributed his share. Perhaps he was the first to actually send a signal. The form of the sender or oscillator, which Signor Marconi uses was devised by his countryman, Prof. Right. The idea of "tuning" two instruments to work in unison, so that they will respond to no others, of which Marconi makes much, is, again, due to Prof. Lodge, who gave it its name, "syntony." Why are all of these names left out? Is the young man unwilling to divide his honors? And what, pray, has Prof. Henry, who died before the Hertz waves were known, to do with the case? Or Lord Kelvin, who has contributed practically nothing to the subject? And if Prof. Bell is to be mentioned, because he invented the telephone, why not Morse, who devised the key which Marconi employs to send his signals?—Harper's Weekly.

Right of "Trial by Battle."

The Dymoke claim in England to the king's championship reminds one of the antiquity of the office, which was established by the conqueror after the battle of Hastings, when the dignity was conferred on Robert de Marmion, Lord of Fontenay. But the championship is closely interwoven with the trial by combat.

How many Britons are aware that trial by combat formed an essential part of British jurisprudence until the beginning of the reign of George IV., or how it ended? At that time, there being a charge of murder against a certain Abraham Thornton, the gentleman was advised by his counsel to claim his right of "trial by battle." Accordingly, when brought before the court of king's bench he flung down his gage.

A solemn argument was afterward held on the case, when the judges were unanimous that he was entitled to waive his battle. The nearest male relative of the deceased, a lad of 16, being manifestly unable to meet Thornton in combat, declined any further proceedings. The public feeling was so much outraged that the attorney general of the day immediately introduced a bill for abolishing the right of appeal in all criminal cases; a bill which, however, did not pass without opposition.

Men for General Housework.

In West Philadelphia, the other day four men answered an advertisement calling for a man to do general housework.

Of the four men who made application for the place, one was a Chinaman, one a colored man, who had been porter in a club, one a retired sailor and the other a widower.

The man who advertised would not tell which of the men he engaged, but he was not loath to express his preference for a man to do the work rather than a woman. With his wife and daughter he had lived in Japan and in China, where they depend entirely on men servants. Five years ago they brought a Japanese servant with them from abroad, but when he had saved enough to live in comfort at home he went back.

Women tried in his place did not give satisfaction to the family, and so advertisement was made for a general housework man.

A Petrified Forest.

Describing his journey in the forbidden desert in the hinterland of Tripoli Mr. Dodson, who has recently returned to England, said that one of the most notable things on the journey to Murzuk was the great petrified forest which his party passed through. For 10 hours we traveled across an era of petrified trees, varying in circumference from 7 feet to a few inches. Every branch of this forest was, of course, lying prone, and this, together with the presence of marine shells, showed that this part of the Great Sahara had at one time been submerged."

Following the example of Lepsic, several other German universities are refusing to admit Russian girls who have only the certificates of Russian high schools.

Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Circulars sent free. F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

Hall's Family Pills are the best.

Baltimore has no fewer than 80,000 colored inhabitants and Louisville fewer than 40,000. St. Louis has 35,000.

Mother Gray's Sweet Powders for Children Successfully used by Mother Gray, nurse in the Children's Home, in New York, Cure Croup, Croup, Whooping Cough, Teething Disorders, move and regulate the Bowels and Destroy Worms. Over 30,000 testimonials. At all druggists, 25c. Sample mailed FREE. Address Allen S. Olmstead, LeRoy, N. Y.

Wireless telegraph stations are now being erected by the Japanese authorities on the Korean coast.

Best For the Bowels.

No matter what ails you, headache to a cancer, you will never get well until your bowels are put right. Castors help nature, cure you without a gripe or pain, produce easy natural movements, cost you just 10 cents to start getting your health back. CASTORS CAN Cleanse the system, put up in metal boxes, every tablet has C. C. C. stamped on it. Beware of imitations.

Thirty to forty miles an hour is the rate for railroad trains in Russia; in Siberia, fifteen to twenty.

There are about 900,000 more women than men in the German empire.

PUTNAM'S FADELESS DYE produces the fastest and brightest colors of any known dye stuff. Sold by all druggists.

The gauchos of Argentina live entirely on roast beef, scarcely ever tasting vegetables or flour dishes.

FIT'S permanently cures. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Tonic. Catarrhs help nature, cure Dr. B. H. KLINE, Ltd., 891 Arch St., Phila., Pa.

You can't hope to keep your friends if you lose your temper.

Piso's Cure is the best medicine ever used for all affections of throat and lungs.—Wm. O. Emsley, Vanburton, Ind., Feb. 10, 1900.

Each year 1,605,000 persons succumb to consumption.

MRS. J. E. O'DONNELL

Was Sick Eight Years with Female Trouble and Finally Cured by Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I have never in my life found a testimonial before, but you have done so much for me that I feel called upon to give you this unsolicited acknowledgment of the wonderful curative value of Lydia E. Pinkham's Vegetable Compound. For eight years I had female trouble, falling of the womb and other complications. During that time I was more or less of an invalid and not much good for anything, until one day I found a book in my hall telling of the cures you could perform. I became interested, I bought a bottle of Lydia E. Pinkham's Vegetable Compound and was helped; I continued its use and in seven months was cured, and since that time I have had perfect health. Thanks, dear Mrs. Pinkham, again for the health I now enjoy."—MRS. JENNIE O'DONNELL, 275 East 31st St., Chicago, Ill. —\$5000 forfeit if above named not genuine.

Women suffering from any form of female ills can be cured by Lydia E. Pinkham's Vegetable Compound. That's sure.

Mrs. Pinkham advises sick women free. Address, Lynn, Mass.

GREGORY'S SEEDS Relied upon by the best millers in the world for 40 years for their cleanest and purest flour. Catalog Free. A. J. H. GREGORY & SONS, Rockford, Ill.

Self-Threading Sewing Machine Needle! Send free and we will send you sample package assorted needles, free name of machine. Arrow brand, National Automatic Needle Co., 150 Nassau St., N. Y. City

DROPSY NEW DISCOVERY; gives relief and cures. Free name of medicine and 10 days' treatment. Bro. Dr. H. H. GREEN'S SONS, 222, Atlanta, Ga.

Gold Medal at Buffalo Exposition. **McILHENRY'S TABASCO** Inflicted with weak eyes, use **Thompson's Eye Water**

Colds

"I had a terrible cold and could hardly breathe. I then tried Ayer's Cherry Pectoral, and it gave me immediate relief."
W. C. LAYTON, Sidel, Ill.

How will your cough be tonight? Worse, probably. For it's first a cold, then a cough, then bronchitis or pneumonia, and at last consumption. Coughs always tend downward. Stop this downward tendency by taking Ayer's Cherry Pectoral.

Three sizes: 25c., 50c., \$1. All druggists.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows. Leave it with him. We are willing to prove it. J. C. AYER CO., Lowell, Mass.

WHAT IS A SLICKER?
IF IT BEARS THIS TRADE MARK

SALZER'S SEEDS

Seedless Barley is probably the most valuable of all cereals, being rich in nutriment and easy to digest. It is especially valuable for the aged, the infirm, and the invalid.

20th Century Oats. The oat harvest, producing from 20 to 30 bushels per acre, is the most valuable of all cereals. Salzer's Oats are a staple food for the horse, the cow, and the pig. They are also a most valuable food for the human race.

Three Eared Corn. This is a new and valuable variety of corn, which yields more than any other variety. It is especially valuable for the stock raiser, and for the human race.

Marvel Wheat. This is a new and valuable variety of wheat, which yields more than any other variety. It is especially valuable for the human race.

Spelts. The greatest benefit of spelt is a grain that is easy to digest and is especially valuable for the aged, the infirm, and the invalid.

Victoria Rape Seed. This is a new and valuable variety of seed, which yields more than any other variety. It is especially valuable for the stock raiser, and for the human race.

Bromus Induratus. This is a new and valuable variety of seed, which yields more than any other variety. It is especially valuable for the stock raiser, and for the human race.

We wish you to try our 3 grain sets, each set containing one of each of the above named seeds. Send us \$1.00 for each set. We will send you the seeds and the catalogue for each set.

SALZER'S MAGIC CRUSHED SHELLS. Best in the world. \$1.00 per 200 lb. bag. \$2.75 for 500 lbs. \$5.00 for 1,000 lbs.

John A. Salzer Seed & Grain Co., La Crosse, Wis.

Capsicum Vaseline

Put up in Collapsible Tubes.

A Substitute for and Superior to Mustard or any other plaster, and will not blister the most delicate skin. The pain allaying and curative qualities of this art is well known. It will stop the tooth-ache at once, and relieve headache and neuralgia.

We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach and all rheumatic, neuralgic and neuritic complaints.

A trial will prove what we claim for it, and it will be found to be invaluable in the household. Many people say "It is the best of all your preparations." Price, 15 cents. A trial bottle, or other deal, sent by mailing this amount to us in postage stamp. We will send you a tube by mail.

No article should be accepted by the public unless the name carries our label, as otherwise it is not genuine.

CHEESEBROUGH MANUFACTURING CO.,
17 State Street, New York City.
