> Strikers Induce Many Fire Bosses to Join Them in the Battle--Others Are to Come Out Tomorrow.

The situation in the anthracite region The situation in the anthracite region today can be almost entirely expressed in the one word—waiting. Both sides are keeping hawk-like eyes open and no move appears to be made without news of it reaching the opposition camp with almost the rapidity of direct telegraphic line. The mine workers are still devoting all their energies toward getting out the few old pumpmen, firemen and engineers who are still at work, and trying to get the fire bosses to join in the ing to get the fire bosses to join in the

The operators' claim, how-ever, is not given much credence, as they are appealing daily to the employment agencies in the large cities to send them more firemen and engineers. The strikers expect to see a great many pumpmen, firemen and engineers

quit work on Tuesday, when all who de ot join in the strike movement will have their names made public as unfair workmen. The effect of this publica-tion of names is likely to have the sweeping effect intended.

Yesterday in various districts meet-ings were held by local brotherhoods of railroad employes. Practically all of these gatherings passed resolutions of sympathy with the strikers, and in several cases the men agreed to protest against carrying soft coal into anthracite territory or moving supplies for the mine guards and non-union men sta-

tioned at the collieries.

President Mitchell had a long talk yesterday with Patrick Gilday, of the central Pennsylvania district, and settlcentral Pennsylvania district, and settied soveral local disputes. Gilday said
that the soft coal men will all contribute money to aid the anthracite miners
