

# TO YOUNG LADIES.

From the Treasurer of the Young People's Christian Temperance Association, Elizabeth Caine, Fond du Lac, Wis.

"DEAR MRS. PINKHAM:—I want to tell you and all the young ladies of the country, how grateful I am to you for all the benefits I have received from using Lydia E. Pinkham's Vegetable Compound. I suffered for

MISS ELIZABETH CAINE.

eight months from suppressed menstruation, and it effected my entire system until I became weak and debilitated, and at times felt that I had a hundred aches in as many places. I only used the Compound for a few weeks, but it wrought a change in me which I felt from the very beginning. I have been very regular since, have no pains, and find that my entire body is as if it were renewed. I gladly recommend Lydia E. Pinkham's Vegetable Compound to everybody."—Miss ELIZABETH CAINE, 69 W. Division St., Fond du Lac, Wis.—\$6000 forfeit if above testimonial is not genuine.

At such a time the greatest aid to nature is Lydia E. Pinkham's Vegetable Compound. It prepares the young system for the coming change, and is the surest reliance for woman's ills of every nature.

Mrs. Pinkham invites all young women who are ill to write her for free advice. Address Lynn, Mass.

Natives Keep Valuable Secret.

The Antaimoro, one of the oldest tribes of Madagascar, possess the secret of making, from the pulp of a native shrub, a very beautiful and enduring kind of paper, resembling parchment. Each family possesses a few sheets of this paper, on which its chronicles and traditions are recorded, and the same paper is used for transcribing the laws of Mohammedanism. The paper is said to have been invented in the middle of the ninth century by a Mohammedan shipwrecked on the coast, who desired to transcribe his torn and water-soaked copy of the Koran in an enduring form. The Antaimoro will only make the paper for sale when some pressing necessity arises.

The more you flatter some people the more they rise in their own estimation.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatment Dr. B. H. Kline, Ltd., 391 Arch St., Phila., Pa.

Over one-third of the manufactured goods which are made in France are the products of female labor.

Catarrh Cannot Be Cured.

With local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrhs. Send for testimonials, price, 75c. Hall's Family Pills are the best.

The largest order of merit in the world is the French Legion of Honor, which now has reached half a million members.

A Nasty Practice.

A nasty practice is what the Chicago Inter Ocean calls the pasting of repeated layers of wall paper, one upon another, thus covering up the filth and germs of disease that may be propagated in the very absorbent and decaying mass of flour paste, paper, animal glue, colors, etc.

They give opinions of eminent health officers and sanitarians, urging that such practice should be stopped by legal enactment, and also take occasion to say that these sanitarians recommend Albatross as a durable, pure and sanitary coating for walls.

The Inter Ocean says: "This is a very important question, and, as it costs nothing to avoid this danger, why take any chances?" How much of the alarming spread of smallpox and other diseases may be due to unsanitary wall coverings?

The planetoids, of which there are over 300 known, have all been discovered since January 1, 1801.

# Lost His Rheumatism

By the use of a bottle of St. Jacobs Oil.

SERGEANT JEREMIAH MAHER, of Ardcaith, Royal Irish Constabulary, says: "My friend, Mr. Thomas Hays has been ever since a sufferer from rheumatism in the back and joints for the last four years, during which time he has employed many different methods of treatment, but obtained no relief whatever, and for the last two years has been unable to walk without a stick, and sometimes two sticks, and was in great pain constantly. I induced him to procure a bottle of St. Jacobs Oil, which he applied with the most astonishing and marvelous effects. Before he had finished using the contents of the first bottle he could walk readily without the aid of a stick, and after a few applications from the second bottle he was free from pain. Hays has been ever since, and although fifty years of age and a farmer, he can walk and work without experiencing any pain or difficulty whatever."

WEEK'S CURATIVE COMPOUND, the great remedy which makes people well; it is made from the formula of an eminent London physician. Send to St. Jacobs Oil, Ltd., Baltimore, Md., for a free sample bottle.

# MYSTERIES OF THE MIND

SOME INEXPLICABLE PHENOMENA CONNECTED WITH THE BRAIN.

People of Great Age Remember More Clearly the Events of Their Youth Than They Do Those of Later Life—Strange Healing Powers.

There is no subject so important for all of us to study as the constitution of our minds writes Garrett P. Serviss, in the New York Journal. Some of the most remarkable and inexplicable phenomena of the mind relate to the power of memory.

A very curious side light is thrown upon this matter by a sentence at the close of a letter from the famous astronomer, Otto Struve, to Mr. W. J. Hussey, of the Lick Observatory, published in the latest number of the Proceedings of that celebrated institution. The letter was written in acknowledgment of the receipt of a copy of Mr. Hussey's volume of observation on the double stars originally discovered by Struve. At the close of the letter the venerable astronomer says:

"I must ask your pardon that in answering your letter I make use of my mother tongue—the German. Formerly it was very easy for me to write English and to speak it, but now it would be a severe task for a man standing in his eighty-third year."

This is in accord with the common experience that people of great age remember more clearly the events of their youth than those of later life. But it might be supposed that this tendency would not hold good with the requirements made by a mind of more than ordinary power like that of Struve, in its period of greatest activity.

It would be interesting to know whether it is a common experience with those who have in the course of their lives acquired the ability to write and talk with ease in some other language than their native speech.

Of course, disuse always weakens one's hold upon a language, and a person may, in that manner, even forget his mother tongue, but Struve says nothing of this, and ascribes his loss of command over English entirely to his advanced age, averring that a great effort would now be required to write a language which formerly he wrote with ease.

May not the tendency of the memory in the latest years of life to recur to youthful scenes and expressions furnish a sufficient explanation of the childshness of old age? All of the nobler faculties of the mind must, in a greater or less degree, be dependent for their exercise upon the material supplied by the memory.

A man without absolutely no memory though in full possession of his reasoning powers, would be unable to manifest any intellectual strength, and the general character of our mental operations must always be largely, if not mainly, governed by what memory presents to the mind. So, in extreme age, when the old pictures in memory's gallery that remain clear and distinct are those impressed in early youth, the entire frame of the mind becomes cast in a corresponding mold.

In some instances the vagaries of the memory may supply an explanation of apparently supernatural occurrences. We find a case of that kind in a story related by the celebrated Dr. John Abercrombie:

A lady suffering from an incurable disease was sent from London into the country, but, feeling death approach, she begged that her infant daughter be brought from the city to see her. The child was taken to her mother's bedside, there was an affecting scene of parting, and the two never met again.

As the child grew up she had no recollection whatever of her mother. When she had become a woman, one day, by mere accident, she entered the room where the parting had occurred and was at once strangely agitated. She said, by way of explanation: "I have a distinct impression of having been in this room before, and that a lady who lay in that corner, and seemed very ill, leaned over me and wept."

The singular persistence and the stimulating power of early memories are well illustrated by another story, told by Dr. Benjamin Rush, the famous physician who signed the Declaration of Independence:

In his youth he had been acquainted with a little girl, a farmer's daughter, and the two had often watched an eagle's nest in the top of a dead tree. Many years afterward he was called to attend his former playmate, now a married woman, when she was desperately ill at the lowest stage of typhus fever.

"Upon entering the room," he says, "I caught her eye and with a cheerful tone said only, 'The eagle's nest!' She seized my hand, without being able to speak, and I discovered strong emotions of pleasure in her countenance. From that time she began to recover and she is now living."

So there is a power of healing that resides in the mind and often it is through the abiding memories of childhood that its power is manifested.

**Farmer O'Neal's Lumber Teeth.**  
Farmer Policy O'Neal is using a set of false teeth he made himself out of a piece of seasoned apple tree root with no other tool than his pocketknife. The teeth are of perfect shape and regularity, and the plate, which is of the same piece of wood, fits his mouth as well as if fashioned by a plaster impression. He can crack corn with these teeth.—Philadelphia Record.

Each person in the civilized world consumes an average of eighty pounds of meat yearly.

# BREAD AND BUTTER STATE.

New Name Gained For Minnesota by Its Dairy Products and Flour.

Minnesota has heretofore been known as the Gopher State. Now it is beginning to be called the Bread and Butter State. The reason of the change becomes clear when it is said that last year its mills turned out 26,630,000 barrels of flour, and there were churned in the State 50,000,000 pounds of butter.

In the product of spring wheat Minnesota stands at the head of the States of the country and its flour mills are noted not only throughout the Northwest, but in foreign countries as well. The extensive development of its dairy interests is comparatively recent.

The combination of wheat and flour with milk and butter is more clearly marked in Minnesota than in any other State. New York and Illinois are important dairy States, but the value of the wheat crop in New York is less than one-third the value of its oat crop, and less than one-eighth the value of its hay crop, wheat being now one of the minor agricultural products of New York, once the chief wheat State.

Illinois raises a fair amount of wheat, but the corn crop, which is of very much more importance, yields in a year \$8 to every dollar received from the product of wheat.—Sun.

# WISE WORDS.

In misfortune even to smile is to offend.—Bacon.

Sweet mercy is nobility's true badge.—Shakespeare.

You may follow luck to ruin, but not to success.—Garfield.

An inflexible characteristic of meanness is cruelty.—Johnson.

What makes life dreary is the want of motive.—George Eliot.

The plea of ignorance will never take away our responsibilities.—Ruskin.

Pride is as loud a beggar as want, and a great deal more saucy.—Franklin.

Modesty seldom resides in a breast that is not enriched with nobler virtues.—Goldsmith.

To persevere in one's duty and be silent is the best answer to calumny.—George Washington.

Our grand business undoubtedly is not to see what lies dimly at a distance, but to do what lies clearly at hand.—Carlyle.

Patience and strength are what we need; an earnest use of what we have now; and all the time an earnest discontent until we come to what we ought to be.—Phillips Brooks.

Every day I see more how necessary it is to be consistent, uncompromising and gentle; for often, perhaps, when a word would not be borne, an act of forbearance or self-denial might be remembered in a cooler moment.—A. Hare.

# Where Science Beats Nature.

The eye and ear have long been regarded as marvels of mechanism, quite the most wonderful things in the world. But compared with the implements of the present-day laboratory, the sensitiveness of all human organs seems gross enough. A photographic plate, coupled with a telescope, will reveal the presence of millions of stars whose light does not affect the retina in the least. The microscope, too, with its revelations of the world of the infinitely small, tells us how crude, after all is this most delicate of the senses. Indeed, we may liken it to a piano where only a single octave towards the middle, sounds. From the ultra violet to the lowest reaches of the spectrum is a range of some nine octaves of light variations, of which, save for our new mechanical senses, we should never have been conscious of but one.

The ear hears little of what is going on around us. By means of a microphone the tread of a fly sounds like the tramp of cavalry. Our heat sense is very vague; we need a variation of at least one-fifth of a degree on a thermometer to realize any difference in temperature. Professor Langley's little bolometer will note the difference of a millionth of a degree. It is 200,000 times as sensitive as our skin.—Harper's Magazine.

# Seven Farthings Capital.

What is the smallest amount for which a company can legally be floated? In a lecture, delivered at the London Institution, G. F. Emory said it was seven farthings. As long as he had the necessary seven shareholders a promoter could make the shares one farthing each, and no legal question could be raised. Mr. Emory told some amusing stories of the wiles of the bogus promoter. One was about an astute gentleman who actually induced a London banker to subscribe \$2500 towards a mining property in Africa which was nothing more than a barren field. When the banker discovered the fraud he wrote an angry letter, demanding the return of his \$2500. The promoter replied through a lawyer to the effect that the banker's letter amounted to an attempt to obtain money by threats, and, as that was a punishable offense, he thought of taking proceedings at the Mansion House. That disposed of the banker.—London Chronicle.

# Health Slates.

"Antiseptic slates" are the things that the careful, germ-fearing mother buys for her children nowadays. They are made of some lightweight material, paper mache, perhaps, and there is no temptation to spit on this slate or even to use a sponge on it. A piece of cotton flannel is all that is necessary for an eraser.—New York Press.

# LARGER PENSION AT 103.

Hiram Cronk the Last Pensioner of War of 1812.

A bill is pending in the House to increase the pension of Hiram Cronk, of Oneida county, New York, who is said to be the sole survivor of the War of 1812, from \$12 to \$25 per month. Hiram Cronk is said to be 103 years old. There are now on the pension rolls 1,527 names of widows credited to soldiers of the War of 1812, but the most of these married men much older than themselves, and their heads bowed with age, have long since passed away. Personally Cronk took no part in the fighting, but he enlisted and was ready to meet the British. As his services were not required he was discharged. Next day he was in Watertown, and in the night was aroused by the sound of cannonading. A day later he learned that a British gunboat had passed and fired a few shots at the defenses of Sackett's Harbor. Cronk went home, but enlisted again on October 8, 1814. He served 40 days as a private, and assisted in building log barracks along the shore at Sackett's Harbor. He was honorably discharged November 16 following. Hiram Cronk married Polly Thornton at Western (now Westernville), Oneida county, March 21, 1825, and in the years that followed several children were born to them. He subsequently received from the Federal government two military bounty land warrants, one for 120 acres and one for 40 acres, but sold them. In 1871 he filed a pension claim, but it was rejected. It was reopened in 1878, and \$8 a month was allowed him. In 1886 his pension was increased to \$12 a month. Of late years he has been quite feeble, and has required a guardian. He lives on a little farm (mortgaged to almost its full value), and his daughter and son-in-law live with him. The daughter is 70 years old. Cronk still takes an interest in war matters and current politics. His eyesight and hearing are still fairly good.

# New Petroleum Motor.

A new invention is announced, which, if that is the case, it will be true, will revolutionize the petroleum motor. As is known, engines of the kind, in their present form, require the introduction into the cylinder of air, the latter producing with the petroleum vapor a mixture which is exploded by the electric spark. Carbonic acid gas is thrown off through the escape pipes. The new invention is a chemical process, still kept secret, by which, it is said, the escape of gas in question can be utilized precisely to feed the cylinder. A continuous series of chemical transformations, so to speak, is established. The twofold result of the process is that the engine, first, does not deprive the atmosphere of pure oxygen by appropriating the gas for its own consumption; and, secondly, does not further reduce the proportion of pure oxygen in the air around by throwing out carbonic acid gas. The invention is chiefly of importance for submarine navigation, and its author is said to be a naval engineer. Hitherto, submarine boats have necessarily been propelled by electric power. If the petroleum motor can be improved so that it does not impoverish the air around it will be applicable to vessels of the kind. This will be an obvious saving of weight and bulk in the engines of submarine boats. Apart from this consideration the new invention will obviously effect a considerable economy of weight in the petroleum motor itself, an advantage of importance for automobilism generally and in particular for aerial navigation.

# England's War Expenses.

The army estimates issued in England show a grand total for the year 1902-03 of \$301,550,000, which is intended to provide for 420,000 men, of which 219,700 men are for the ordinary army service and 200,300 for war services. The estimates, of which \$200,000,000 is required for war, show a decrease under this head of \$116,250,000 compared with 1901-02.

# Best For the Sowers.

No matter what ails you, headache to a canker, you will never get well until you buy Wills' Pinkettes. Pinkettes help nature, cure you without a gripe or pain, produce easy natural movements, cost you just 10 cents to start getting your health back. Cascarara Candy Cathartic, the genuine, put up in metal boxes, every tablet has C. C. C. stamped on it. Beware of imitations.

# Camels are the only animals that cannot swim.

Germany is to expend \$75,000 on military motor-cars.

# Piso's Care cannot be too highly spoken of as a cough cure.

The favorite air of the average girl is a millionaire.

# DAN GROSVENOR SAYS:

"Pe-ru-na is an Excellent Spring Catarrh Remedy—I am as Well as Ever."

HON. DAN A. GROSVENOR, OF THE FAMOUS OHIO FAMILY.  
Hon. Dan A. Grosvenor, Deputy Auditor for the War Department, in a letter written from Washington, D. C., says:

"Allow me to express my gratitude to you for the benefit derived from one bottle of Peruna. One week has brought wonderful changes and I am now as well as ever. Besides being one of the very best spring tonics it is an excellent catarrh remedy."  
---DAN A. GROSVENOR.

In a recent letter he says:  
"I consider Peruna really more meritorious than I did when I wrote you last. I receive numerous letters from acquaintances all over the Country asking me if my certificate is genuine. I invariably answer, yes."  
---Dan A. Grosvenor.

A Congressman's Letter.  
Hon. H. W. Ogden, Congressman from Louisiana, in a letter written at Washington, D. C., says the following of Peruna, the national catarrh remedy:

"I can conscientiously recommend your Peruna as a fine tonic and all around good medicine to those who are in need of a catarrh remedy. It has been commended to me by people who have used it, as a remedy particularly effective in the cure of catarrh. For those who need a good catarrh medicine, I know of nothing better."  
---H. W. Ogden.

Treat Catarrh in Spring.  
The spring is the time to treat catarrh. Cold, wet winter weather often retards a cure of catarrh. If a course

of Peruna is taken during the early spring months the cure will be prompt and permanent. There can be no failures if Peruna is taken intelligently during the favorable weather of spring. As a systemic catarrh remedy Peruna eradicates catarrh from the system wherever it may be located. It cures catarrh of the stomach or bowels with the same certainty as catarrh of the head.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

# Rest Your Eyes.

Strong eyes are said to give their possessor both pleasure and confidence, while weak eyes that feel and look hot and tired certainly give no delight to their owner nor to those who look back into them. It rests the eyes to shut them, if only for a minute at a time, in some convenient interval, and if it is any way possible to lie flat on the back for any length of time the gain to the eyes as well as to the whole body is immense.

# England's War Expenses.

The army estimates issued in England show a grand total for the year 1902-03 of \$301,550,000, which is intended to provide for 420,000 men, of which 219,700 men are for the ordinary army service and 200,300 for war services. The estimates, of which \$200,000,000 is required for war, show a decrease under this head of \$116,250,000 compared with 1901-02.

# One of the Buenos Ayres newspapers has a consultation room in which the poor can get medical aid and medicine free.

# \$3.00 W.L. DOUGLAS SHOES \$3.50

UNION MADE.

Sold by 64 Luggage Stores in American cities and the best retail shoe dealers everywhere. Caution! The genuine have W. L. Douglas's name and price stamped on the bottom.

1898 = 748,700 Pairs.  
1900 = 808,189 Pairs.  
1901 = 1,259,754 Pairs.  
1902 = 1,566,720 Pairs.

Business More Than Doubled in Four Years.

THE REASONS: W. L. Douglas makes and sells more men's \$3.00 and \$3.50 shoes than any other shoe manufacturer. W. L. Douglas's \$3.00 and \$3.50 shoes placed side by side with \$5.00 and \$6.00 shoes of other makes are found to be just as good. They will outwear two pairs of ordinary \$5.00 and \$6.00 shoes.

Made of the best leathers, including Patent Corona Kid, Corona Calf and National Kangaroo. Fast Color, Breaks and Aches, Black Heels, Good Fit, Durable, and Always Black Heels Good.
