And he answered humbly: "Dat's so, little mistiss; dat's so."

m'di pan."
"Oh, go away, you worthless nigger."
Mrs. Custis exclaimed, putting down her handkerchlef, and he jumped extravagantly just for the delight of hearing of pure thin silver.
"But, George," Mrs. Custis resumed, with renewed dignity, "it is true that your master and I are seriously thicking of seeking public assistance." Her delient ot check fushed at the admission; but, seeing his look of childish horror, she proceeded irmly:
"As simple as our living expenses are, we cannot longer meet them, and we must ask for help."
The three up her little figure and proudly left the room, but she stumbled on the threshold, and the negro, with intuitive devotion, knew that her eyes were blinded with tears.
He stared with a dropped jaw at the open door through which she had gone. Then, with a volatile grin, he jumped to his feet and, performing a skillful cog dance, selzed his disreputable hat and blis wife had drifted to the great city of New York. They came from fore to be near their daughter, who had married a clever young artist. It did not take the parents long to discover that their son-in-law had difficulty is supporting his little family, so they, protesting grandly that they had an amupie income, moved to a cheap little fat on the could buily something from theose forlorn old people.
Mes. Custis opened the door and look ed hew runt ant is proces of a few narrow rooms began an existence the disolentiz.
"Does yo' hab any wuk fo' a po' culture to their pride.
"Does yo' hab any wuk fo' a po' culture and the front disolenting."
"No; I don't want any niggers to work for mer's she blazed out. "Get off my front steps." She was preparing to sim the front door when he jerked off his filtig and danced for equiption fatters, ind shouth hat was the beginning of a strang shouter, low comedian and natural singer and dancer, and these poor, in a year. When he reached wor with a difference and the set off and the strend on the se

so dense about the performer that it ook a tail man to peep over the heat George paused in his dancing, took off his hat and, singing in a musical role, "coon, coon, coon," went around pollectman sauntered up. Finding the titraction was a live negro and not a lead horse, he virtuously redistributed he coins to the amused crowd, and George took a free ride to the polle fatto. By the time he was hustled before the desk his most reckless look har for a strikingly exemplified in the cost to the amused crowd, and feetiled over his hardened face. The magistrate, who was looking bored, noused slightly when the officer ex-plained that the negro was indulging a disorderly dance. "Why were you dancing?" he asked, with a yawn. "Cause I wuz," was the sulky re-ort. "George," said the magistrate several

with a yawn. "'Cause I wuz," was the sulky re-

ly, "I had hoped you had stopped your evil living. It has been nearly a year since you were arrested." A subtle change passed over the home-by features FOR THE HOUSEWIFE

<text><text><text><text><text><text><text><text>

An Effective Lamp Shade. One of the showlest of the new lamp or candelabra shades (as it may be had in several sizes to fit either) is shown here. It is composed of cut glass beads in a latticework effect, finished

THE GLASS BEAD SHADE.

THE OLASS DEAD SHADE. with a pretty little scalloped edge at the top and the pendent fringe so fash-ionable just now at the bottom. These come in several colors to match differ-ent color schemes, and their scintilla-tions are extremely showy and decora-tive, besides being very novel.

And he answered humbly: "Dat's so, little mistles; dat's so." Central's Vindication. They had quarreled overnight, but she had no sconer reached the studio where she was preparing to threaten the laurels of the old masters than she was called to the reconciliatory tele-phone. The conversation began guard-edly with the customary: "is this Mins E.? Oh, good morning. This is Mr. F." But in a few seconds these per-functory words gave place to others. "Helen," he declared, "I was a beast." And she replied contritely: "You must not call yourself names. I was horrid. I was a perfect little cat, Dick, and"-But Mr. F. could not stand her self reproachings. He told her that he could not and that he would not bear to hear her slander the dearest, most generous, most noble woman in the world. "Hush, hush.-sh, Dick," she entreat-ed. "We're forgetting that a telephone is not so awfully secret. Suppose Cen-tral slould hear?" Whereupon a strident voice took up the tale. "Central" it is neered. "Cen-tral listening! I like that! Central's got something else to do but listen to the lovemaking of a pair of idiots. I can teil you that I've got other fish to try besides paying attention to the like of that truck."-New York Heraid.

tive, besides being very novel. Drinking Water. The water ought never to be taken with one's meals and as little as possi-between meals. One never knows what is being taken into the stomach in water filled with chipped ice. It is safer to fill bottles with water and al-low them to stand beside ice to chill until required. Tests have been made which show that one gill of ice water, which means an average tumblerful, poured hastily down the throat reduces the tempera-ture of the stomach from 100 degrees to 70 degrees, and it takes more than half an hour to recover the heat it has lost. Cold water slowly sipped will not be followed by such a result, cooling the system pleasantly in hot weather with-out chiling the glands of the stomach so that digestion cannot take place.— Detroit Free Press.. try besides paying attention to the like of that truck!"—New York Herald. Who invented the Steam Engine? The Marquis of Worcester, while im-prisoned in the Tower of London in 1656, invented and constructed a per-fect steam engine and had it publicly exhibited the same year at Yauxhall in successful operation. Thirty-four years inter, in 1690, Dennis Papin add-ed the piston to the marquis' discovery. In 1698 Captain Savary devised and built asteam engine different in many details from those made by Worcester and Papin, and in 1705 Newcomb, Caw-ley and Savary constructed their cele-brated atmospheric engine, which was complete in every detail. The above array of historical facts notwithstanding. James Watt, who was not born until sixty years after these great men had given the steam engine to the world, enjoys the distinc-tion of being the veritable inventor, originator and author of the most use-ful contrivance of the present day. Fulton, who lived and worked in the early part of the century, is given the credit of being the man who demon-strated that steam could be applied to avigniton; this, too, in face of the well known historical fact that De Gary propelled a vessel by steam in the harbor of Barcelona in 1543. Greatness Not Free From Shame.

Hoarhound Candy. Put a teaspoonful of dried hoarhound leaves in a cup and pour over them half a cupful of bolling water; cover and let it steep until cold; strain and pour it over a pound of granulated sugar and a tablespoonful of vinegar; boll with-out stirring, and if any scum rises to the top remove it. Test the candy in cold water; when brittle, remove from the fire and pour into a buttered pan. Mark into squares before it is cold or break into irregular pieces.

To Keep Off Ants and Rosches. It is sometimes diffeuit to keep rai-sins, figs and dates away from the in-quisitive little ants and roaches, but this is easily accomplished by putting them in paper bags that have been well brushed over with strong borax water and dried before the fruit is put in. The little pests do not like the borax and will not gnaw through the sack when thus prepared.

Thus prepared. Shiny Pastry. That bright yellow, shiny surface that gives such a rich look to the pastry of delicatessen shops is obtained by brushing it over with the yolk of an egg beaten with two tablespoonfuls of milk about ten minutes before it is tak-en out of the oven. This glazing proc-cess is a great improvement to the ap-pearance of a chicken pie.

For Pipes and Taps. Glycerin is very slow to freeze, and if a little is put on taps in frosty weath-er and exposed pipes are covered with pieces of old carpet or sacking the wa-ter is not likely to freeze.

commemoration.—London Chronicle. A Man of Nerve. A Man of Nerve. General Zurilnden, whose name will recall the stormy times of 1808 when be was military governor of Paris, has been retired from the French army, having reached the age limit. He was the hero of an escape from prison dur-ing the war of 1870, which showed him a man of great coolness and resource. He was an artillery officer when the war began, and, being taken prisoner by the Frussians, he was on his refus-al to give his parole imprisoned in the Slesian fortress of Glogan, on the Odder. One dark night he got out on the ampart, slipped past the sentinel and made straight for the station, where he encountered the governor of Slesia and his staff about to depart for Berlin. Zurilnden put on a bold front and asked in perfect German (he is an Alstalan) for a ticket to Berlin. Thence he got to Bale via Frankfurt and arrived in France in time for the operations on the Loire.

operations on the Loire. Persis and Greece. Ibraham Khan Dovletï, who has re-cently been appointed Persian ambas-sador at Athens, is said to be the first ambassador sent from Persia to Greece since Darius sent heralds in 491 B. C., to demand earth and water from the Greeks as symbols of submission to him. The Athenians made arrange-ments to welcome the Persian this time with imposing ceremonies, as they do not intend to kill him, as their ances-tors did the messenger of Darius. Al-though Persia has had no minister in Greece for more than twenty centuries, it has been represented in Athens by a consul in recent years.

now ringing on the golden streets." Aucient Football. Thilp Stubbes wrote in 1583 in his book on "The Anatomic of Abuses." "For as concerning football I pro-test unto you it may rather be called a freendly kinde of facht than a play of recreation; a bloody and murthering practice than a felowity sporte of pas-tyme. For dooth not every one lye in waight for his Adverserie, seeking to overthrow him and to picke him on his nose, though it be er hard stones, so that by this meanes sometimes their necks are broken, sometimes their hecks are broken, sometimes their her ans, sometimes one part thrust out of joynt, sometimes another; some-times the noses gush out with blood, sometimes their eyes start out-fight-ing, brawling, contention, quarrel pick-ing, murther, homicide and great effu-sion of blood, as experience dayly teachet." a consul in recent years. They Don't Speak English. There are 1,470,000 persons over the age of ten resident in the United States who cannot speak the English lan-guage, exclusive of 72,000 Indians, The number is about 2 per cent of the total population. The largest number of non-English speaking persons is found in New York, where they number 220,-000. Pennsylvania, Illinois and Texas follow. Texas has a considerable Spanish speaking population. So have New Mexico and Arizona. In the for-mer there are 16,000 persons not speak-ing English and in the latter 27,000.

ing English and in the latter 27,000. The Beauty Found In Slime. Slime, mere brown slime, inside a watering trough or outside of damp timbers consists of uncountable mil-lions of exquisitely designed gemilke plants which under the title "Plants of Crystal" are described and pictured by Professor Albert Mann in Harper's Magazine. There are more than 2,500 species of these microscopic plants, the diatoms, and the variety of the beauty of their forms is inconceivable. Pro-fessor Mann expresses surprise that designers do not seek for new ideas among these ornate creatures.

among these ornate creatures. The Largest Library. The largest library in the world is the Bibliotheque Nationale, in Paris, found-ed by Louis XIV II contains 2000,000 volumes, 200,000 pamphlets, 175,000 manuscripts, 300,000 maps and charts and 150,000 coins and medais. The col-lection of engravings exceeds 1,300,000, contained in some 10,000 volumes. The portraits number about 100,000. The British museum and the Imperial libra-ry at St. Petersburg each contain about 1,500,000 volumes.

<text><text><text><text><text><text><text><text> A Freak of Nature. William Heitz of Egg Harbor City, N. J., is the possessor of a curious freak of nature. It is a piece of flint corn which nature has molded into a right hand. All five fingers are won-derfully well shaped and are in such a position that abdseball would just fit into their clutches: This ear of corn was the ould weeven the stalk, which was ln a large field.

Ter, brit Kessedy's Cherry, Balsam best for Code, Coghs, Consmption. sc, sc, St.co. Two Remarkable Epitaphs. The two most remarkable epitaphs in the United States are those of Daniel Barrow, formerly of Sacramento, and of Hank Monk, Horace Greeley's stage driver. The former reads as fol-lows: "Here is laid Daniel Barrow, who was born in Sorrow and Borrow-well little from nature except his name and his love to mankind and his hatred for rodskins. Who was nevertheless a gentieman and a dead shot, who through a long life never killed his man except in self defense or by acci-dent, and who, when he at last went un'er beneath the builets of his cow-ardly enemies in Jeff Morris' saloon, did so in the sure and certain hope of a glorious and everlasting morrow." Hank Monk's epitaph reads thus: "Sacred to the memory of Hank Monk, the whitest, biggest hearted and best known skind to all and brought ill to none. He lived in a strange era and was a hero, and the wheels of his coach are now ringing on the golden streets."
