

Woman Suffers Burns When Oil Stove Explodes

Mrs. Maud Doran, of West Wyoming, was severely burned about the face and hands on Saturday night when an oil stove exploded. She was treated by a physician. West Wyoming fire department was called to extinguish the slight blaze which followed the explosion.

"Pinioning" Chickens

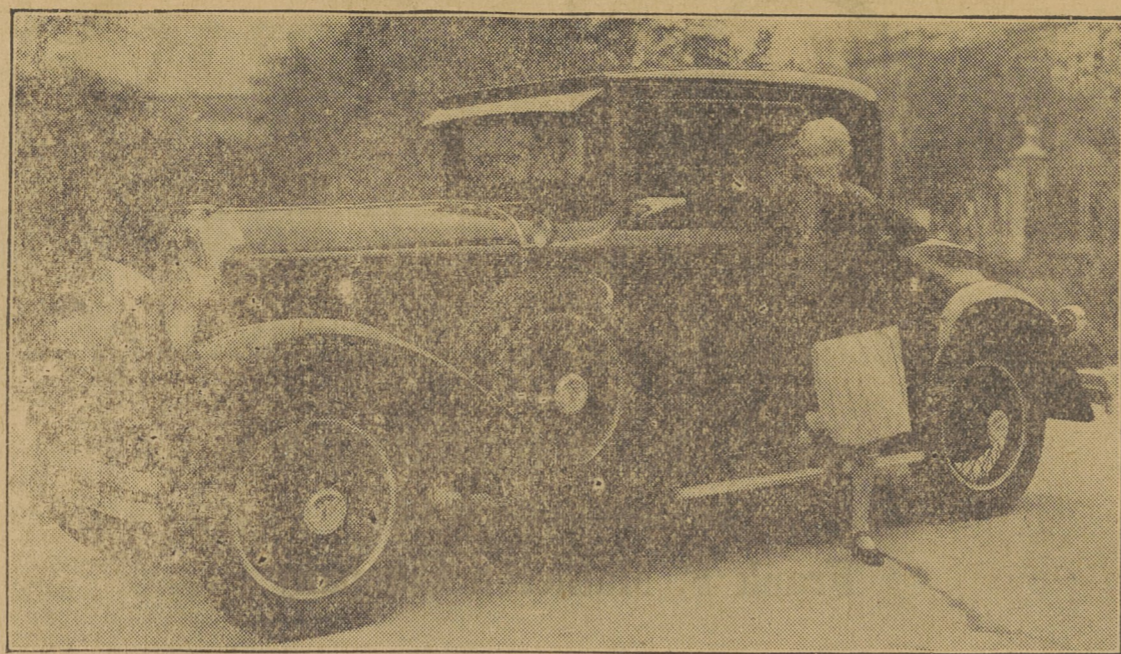

In clipping a chicken's wings to prevent flight, feathers of one wing should be cut so that when the chick starts to fly it will fly unevenly. This should be repeated every year after the chickens have molted. If the feathers of new chickens are plucked when the chicken is only a few days old it will never grow long feathers. This is called pinioning.

Meteoric Temperatures

According to experts, falling meteorites are fused of white heat on the outside as a result of air friction, but inside they are extremely frigid—more than 400 degrees below zero, which is approximately the temperature of outer space.

Is Old Superstition

Just when the groundhog idea started is not known, but the superstition that the weather on Candlemas day is an indication of the weather for the rest of the winter is old. It has prevailed in Europe for centuries. The Germans still have a saying that "the shepherd would rather see a wolf in his stable on Christmas day than the sun."

Evil

It is easier to contend with evil at the first than at the last.—Da Vinci.

Trucksville

Rev. Mr. and Mrs. Sanderson have returned to Greenville, Ill., after spending some time with Rev. and Mrs. Raymond Smith.

Going Back Into History

The first telegraph line in Canada was erected by the Toronto, Hamilton, Niagara and St. Catharines Telegraph company, in 1847.

Safety, silence and simplicity are features of the new Ford six-brake system

ONE of the first things you will notice when you drive the new Ford is the quick, effective, silent action of its six-brake system.

This system gives you the highest degree of safety and reliability because the four-wheel service brakes and the separate emergency or parking brakes are all of the mechanical, internal expanding type, with braking surfaces fully enclosed for protection against mud, water, sand, etc.

The many advantages of this type of braking system have long been recognized. They are brought to you in the new Ford through a series of mechanical improvements embodying much that is new in design and manufacture. A particularly unique feature is the simple way by which a special drum has been constructed to permit the use of two sets of internal brakes on the rear wheels.

A further improvement in braking performance is effected by the self-centering feature of the four-wheel brakes—an exclusive Ford development. Through

this construction, the entire surface of the shoe is brought in steady, uniform contact with the drum the instant you press your foot on the brake pedal. This prevents screeching and howling and makes the Ford brakes unusually silent in operation.

Another feature of the Ford brakes is the ease of adjustment.

The four-wheel brakes are adjusted by turning a screw conveniently located on the outside of each brake plate. This screw is so notched that all four brakes can be set alike simply by listening to the "clicks."

The emergency or parking brakes on the new Ford require little attention. However, should they need adjustment at any time, consult your Ford dealer for prompt, courteous, and economical service. He works under close factory supervision and he has been specially trained and equipped to help you get the greatest possible use from your car over the longest period of time at a minimum of trouble and expense.

FORD MOTOR COMPANY

Mistakes of the Great

Greatness of men is never fully realized until they have been dead long enough that their mistakes are either forgotten or ignored. Caesar, Napoleon, Hamilton, Washington and Lincoln all benefited by the process.

Fireworks

Fireworks are not modern. The Chinese and Indians used them thousands of years ago. Returning Crusaders brought them to Europe about A. D. 1200. The first official display in England was in 1685, to celebrate the accession of James II.
