

GRAMS \$240. IN PRIZES

EASY RESTING FITABLE

YOUNG AND OLD Every Week

- 5.00 MERCHANDISE CERTIFICATE
- 2.00 MERCHANDISE CERTIFICATE
- 1.00 MERCHANDISE CERTIFICATE

BEFORE THE RULES READ THEM CAREFULLY!

Persons in Luzerne and Wyoming Counties may use this newspaper or their immediate neighbors to compete. You may use the same answer in the same form, or, better yet, send in this page and they will furnish you a coupon.

There are fifteen advertisers on this page who make up a grammatically correct sentence from each advertisement. The grammatically correct sentence EX-TRA will be awarded the first prize. The person sending in the next best sentence, or the best in the third best.

Prizes may work together on a sentence, and as many as they wish, but only one sentence from any one family. Sentences will be selected by this paper, and participation in evidence that those participating agree to the judges.

Prizes will be paid in cash for the next thirty weeks. Prizes will be paid in cash for any of the order in which the words are changed from week to week as the names of the winners will be

SPECIAL INSTRUCTION

On any idea you wish, taking not more than one advertisement selected at random. List together with the name of the advertiser.

(11) **The Scranton-Spring Brook Water Service Company**

The water supply of the entire Wilkes-Barre district, comprising 52 separate civil divisions, with an area approximately 90 square miles, is furnished by Scranton-Spring Brook Water Service Company. The total population is estimated at 371,000, which is served through 82,500 taps in the distribution system.

The water, obtained from virgin mountain springs and streams, from 15 separate sources in forested watersheds, is impounded in 39 reservoirs, providing a total storage of 12 billion gallons, and distributed through 705 miles of distribution mains.

All Water Served To Consumers Is Carefully Sterilized.

Oriental Carpet Importers

There is only one way Oriental Carpets can be safely washed, and that is by hand under the care of experts. Oriental carpets deserve a care no less specialized than paintings. We invite our patrons to see their carpets being washed, by hand, in Castile soap, carefully rinsed and dried by tepid air in motion.

All carpets called for and delivered. Other carpets may be loaned, so floors need not be marred or patrons inconvenienced. All carpets, tapestries and other woven objects d'art carefully insured while in our possession.

POULTRY

BROOD CHICKS BY ELECTRICITY

Easier to Run Than Those Heated by Coal or Oil.

"Electric brooders are excellent for brooding chicks when the weather is mild. In New York state they may usually be used satisfactorily after April 15, or at any time in a room that does not depend entirely on the brooder for its heat," says Prof. L. E. Weaver of the poultry department at Cornell University, Ithaca, N. Y.

In answer to the question—can chicks be satisfactorily and economically brooded with electricity?—Professor Weaver says, "the answer is yes, but with reservations."

"Electric brooders are far more simple to run than are coal or oil brooders. When once regulated there is almost no more work or worry with them. But they must be in a room that is at least moderately warm, for the electric brooder confines the heat almost entirely to the space under it. It does not warm the room as is the case with coal or oil brooders. The chicks will not do well if the room is cold, and the cost of heating just the brooder alone gets too high even with a low rate for the current under such conditions.

"In purchasing an electric brooder one should be sure that it is provided with a positive heat regulator, that it is well insulated to prevent unnecessary loss of heat, and that provision is made for ample ventilation.

"Electric brooders are of two types, those with a curtain and those without. The curtain type requires less current but is apt to be poorly ventilated or not ventilated at all. The curtainless type with a good ventilating arrangement is probably the most desirable," says Professor Weaver.

When to Market Ducks to Make Most Money

Green ducks at eight weeks of age should weigh 9 pounds to the pair, and at ten weeks ought to reach 10 to 11 pounds. They command best prices about the first of May, and from then on until July the price gradually drops. From July 1 to September prices remain unchanged, but by September to November they are up again.

The general laying season starts about February and continues until the last of August. The first eggs of the season are rarely fertile. Fertility and vitality are the keynotes of success in duck culture.

One way to make money out of ducks is to be ready with a good supply at the opening of the season, writes Michael K. Boyer in the Farm and Ranch. Another important item is the value of the manure, that of duck ranking second to hog for growing vegetables.

The trade for ducks is largely found in the restaurants and mountain and shore resorts, where they are served in quarters—the carcass being cut into four pieces. Consequently, a duck weighing 4 or 5 pounds, served in that way, will command just as much money as one weighing 2 pounds more.

In all large cities, where there is a large Jewish population, live ducks are in demand. In Chinese sections there is also a heavy call for this favorite fowl.

Poultry Facts

Lameness is one of the first symptoms of tuberculosis in poultry.

Plan on sufficient brooding space and equipment, all you have room for. Figure how many chicks you can brood and then write several hatcheries and decide where you want to order, and then order early.

There are six steps in raising healthy chicks from hatching to maturity. They are clean chicks, clean houses, clean litter, clean feed, clean management and clean ground or close confinement.

It is necessary to have the brooder large enough—and it is better to have it too large than to take chances on overcrowding.

Milk has been found to be the best single source of animal protein for laying hens, it being easily digested and rich in protein and minerals.

If you are sending away for baby chicks have the brooder all ready for them, warm and comfortable, and clean. They get chilled if they have to wait while you "make up the bed."

Duck eggs are successfully hatched in incubators, but geese eggs are not. Geese will lay about three dozen eggs per year.

The highest egg production has been secured by using milk with some form of meat, such as fresh meat, tankage, or meat scraps.

Some farmers feel that the birds will gather sufficient insects while on the range to make up for the lack of protein in the ration, but tests do not bear out this belief.

To Hear Arguments On Lake Policemen

Judge W. A. Valentine rendered a decision Tuesday on the petition for the appointment of deputy constables to act as township police in Lake and Lehman Townships for the year 1929, in which he directs that the case be placed on the argument list for Thursday, March 14, at which time argument will be heard before the court in banc.

Last October certain taxpayers of Lake and Lehman Townships presented a petition asking for the appointment of five deputy constables to serve as township police for the coming year. A few weeks later exceptions to the application were filed by Lake Township. On November 24 Judge William S. McLean, Jr., entered a decree granting the prayer of the petition, and on December 14 both townships excepted to the decree and requested that the matter be passed on by the court in banc. This will be done a week from Thursday.

Request Red Cross To Knit Sweaters For Service Men

Wyoming Valley Chapter of American Red Cross, has been requested to furnish sweaters for the men in tuberculosis hospitals and Miss Margaret Elliott, secretary of the local chapter, has issued an appeal for volunteers who will knit the required quota. Sweaters are to be tuxedo style as the former slip-ons caused too much exertion on the part of the invalid men.

Anyone wishing to knit for the men can apply at headquarters or to Mrs. Charles Millard, of the Schooley apartments, city, where they will be supplied with the necessary yarn and needles. Other garments are to be made for the patients and the local organization will appreciate any volunteer aid given them in this charitable work.

Frank Martz Invites Public To Visit Plant

A visit to the Frank Martz bus plant will amply repay one for the time taken to make it. Established in 1908, this concern has grown into a marvelous business concern. It has a beautiful building located on Old River Road, taking up an acre and one-half of space. The beautiful display room with broken marble floor, craft walls and well lighted makes a nice spectacle at night. A large spacious office employing fourteen or more people, a beautiful apartment hall for banquets and other functions, and an automatic fire prevention sprinkler system throughout the entire building.

The firm operates 87 busses and have an order placed for 18 more of the latest modern designs to be delivered on or about March 15. Each coach is serviced before leaving the garage each day and have all the latest safety devices including air brakes and shatter-proof glass. Inside baggage racks are also a fixture in each bus. The drivers are carefully chosen from hundreds of applicants and must be sober and industrious and physically fit for the job and courteous at all times.

The routes taken by these comfortable riding busses are over the Lackawanna, Sullivan and Roosevelt Trails, noted for their scenic beauty and include the residential streets through the different cities to avoid any sight displeasing to the eye.

The Fort Durkee Hotel, on Public Square is the Wilkes-Barre Terminal and ticket office and the representatives at that place will be glad to explain some of the many features that the Martz people offer.

The mechanical arrangement of the business is a wonder of modern achievement. The heating plant is of the latest. Exclusive electrical rooms, cleaning racks with high-pressure hose. Buried tanks with a capacity of 80,000 gallons of gasoline and 15,000 gallons of oil. Wash room accommodates two cars at a time. Electrically opened doors. Club rooms with swimming pool and shower bath. Paint shop using Duco spray entirely care for all renewals. Tires alone are worth a small fortune. The tool and machine shop are valued at \$14,000. Everything is modern, even to the smallest device including shears for cutting metal.

The plant of Frank Martz is a marvel and well worth one's time to pay it a visit. It's buss service cannot be beat. When planning your next trip investigate the Martz service and be convinced of its economy and comfort.
