ALDERSON

This corner of the lake has been a noisy one this week. Contractor Coons' steam shovels, steam rollers, trucks and graders have made such a racket that it is plain to anyone that there is "something doing." The grading work at this end of the new road is about finished. The steam shovels have made a huge cut back of the site of the former sawmill. The earth taken from this cut was used to build the new road along the end of the lake. The filling and grading of the new crossing at this end of the road has been completed. A great deal was said about the advantages of this new crossing when the surveyors were busy, but those advantages don't seem to show up so well now. Perhaps we will see them when the concrete is in place.

Laketon high school's base ball team journeyed to Lehman last Wednesday, where it was defeated by a score of five to three. We hear that the Harvey's Lake park is to open under new management this summer. A better season than last has been predicted but only time will tell.

The birds seem to have all arrived from their winter homes in the South and we are regaled with lots of pleasant bird music. Soon the other kind of birds will arrive from the cities and then we will hear an entirely different type of music. We fear that our pleasant bird music will be drowned out.
