McCormick-Deering Spreaders Are Built for BUSY FARMERS

If you "can't find time to spread manure" you need this new, easy-loading McCORMICK-DEERING Manure Spreader

BEING "too busy to spread manure" is a good sign. Good farmers are always too busy to waste time on this job. That's one good reason why so many farmers are using McCormick-Deering Manure Spreaders.

The McCormick-Deering is designed and built for busy farmers. It has many new and time-tested features which make it possible to do a good job of spreading, easily, economically, and quickly. It is easy to load,

easy to operate; it is an easy pull, loaded to capacity, for two horses. It is strongly built to travel at top speed with a tractor. It pulverizes thoroughly and spreads evenly—covers a lot of ground in surprisingly short time.

If you can't find time to spread manure, if you are spreading by hand, or if you are working under the handicap of an old-fashioned spreader, investigate the new McCormick-Deering. Talk it over with us.

A mistake that may ruin your tour

YOU doubtless have heard it—maybe you are one of those to repeat it: "All tires are about alike."

Do you really think this is true? If you do, how do you explain the fact that one tire towers above all others both in popularity and in sales?

How do you explain the fact that not alone this year but for fourteen years it has been true, "more people ride on Goodyear Tires than on any other kind"?

NO, good friend, these things are not to be explained, except on the true and unassailable promise that "all tires are NOT alike."

Summer is here, the roads are calling, the chances are

you are planning some fine morning to head out for distant and alluring places on vacation in your car.

A blowout, or a flat, on a hot dusty road a long way from a service station, is one of the surest destroyers of the vacation frame of mind that ever was!

SO why not get the best insurance there is, against a mistake that may ruin your tour, by insisting that your new tires be Goodyear Tires?

They'll cost you little if anything more than other tires, and it is the judgment of an overwhelming percentage of motorists that they are outstandingly the best tire money can buy.
