Mr. and Mrs. S. P. Frantz and Miss Jane Keener attended the Frantz reunion at Fernbrook on Wednesday.

The Ladies' Aid Society held their regular all-day meeting and quilting in the basement of the M. E. Church. Hostesses were: Mrs. Gordon Johnson, Mrs. Cassie Brown, Mrs. H. W. Danks, Mrs. George Kostenbauder, Mrs. Lillian Whited. There was a good attendance.

DALLAS DISTRICT SUNDAY SCHOOL PICNIC WEDNESDAY

The Dallas district Sunday school picnic will be held at the picnic ground at Harvey's Lake on Wednesday, August 21. It is especially desired that a good crowd be present this year. There will be plenty of entertainment, plans which will include young and old. It will be a good place to meet your friends for a social chat, to enjoy a fine day's outing and to get an inspiration for another year's Sunday school work.

JOHN MacLUSKIE, Sheriff.

PAGE, LINE AND PARAGRAPH

The careful livestock feeder watches each animal and feeds according to the animal's needs. Many farm animals are underfed and can not produce a profit on the feed they get.

In the Rocky Mountain and Western states, the forest are dry as timber this time of year. Watch out for fire. Be extra careful with matches and "smokes," and with campfires.

The growing of one intertilled crop following a good clover or alfalfa sod is excellent in a rotation, but the common practice of growing two or more intertilled causes rapid destruction of the soil organic matter.

New Zealand spinach stands the heat better than ordinary spinach and so is obtainable during the hottest months. Strip the leaves from the stems, wash well, and cook in an uncovered pan with only enough water to prevent burning. Add salt when the spinach has wilted sufficiently, chop and mix with butter before serving. Serve vinegar or sliced lemon with spinach.

Sweet cream butter made for winter use will keep best if stored in brine made of one part of salt to three parts of water, says the Bureau of Dairy Industry, U. S. Department of Agriculture. Butter stored by the bureau in dry salt and paraffin deteriorated on the surface. Be sure to use enough salt in the brine, wrap the butter in parchment butter paper, and see that the rolls are entirely submerged in the brine.

Bacteria are single celled plants, so small they can not be seen with the naked eye. They are found in large numbers in the soil and in many other places. They multiply rapidly when given proper food and warm temperature. Warm milk is an ideal food for bacteria. Bacteria cause milk to sour and produce other undesirable changes. For this reason milk should be produced in a sanitary manner and kept cold.

A common mistake in the management of sweet clover is to pasture a first year stand too heavily. New seeding should seldom carry more than one mature animal to two acres. The rate of grazing may be heavier than this in August, but by September 15 the rate should be decreased, to allow the plants to store food in the roots. Each plant should go into the winter with at least 6 inches of top growth. Sweet clover pastured too heavily the first year will start slowly and grow unevenly the second year and will yield considerably less forage than if than if pastured lightly the first year.

BEAVERS GET NEW HOMES

Trapping instructors of the Game Commission during the past month have removed beaver in Centre, Potter, Union, Clearfield, Columbia and Snyder counties to localities where the busy little animals will not cause damage.

How to Fool the Rats

An ingenious way of catching rats is told in the People's Home Journal. In setting the rat trap this article advises the covering of it with tissue paper. Rats are too intelligent to walk into an open trap. However, they are curious to know what is under the paper, and will soon find out.

"INSIDE" INFORMATION

Serve children small portions of food. Then they can clear their plates without urging and without the feeling of being stuffed.

Sun bath should be given to all well children to keep them well and to many sick children to help make them well. They should, however, be given carefully at first, exposing only a small area of the child's skin to the sunlight until he is used to it and has acquired a protective coat of tan.

Resinous substances such as sticky fly paper are often hard to remove from clothing. Try turpentine, benzol, carbon tetrachloride, chloroform, wood or denatured alcohol, ether, kerosene.

Acustom your family to fresh fruits served as natural as dessert once in a while. It will be good for them, and save work for you.

Many vegetable combinations are good when you do not have enough of any one vegetable to go around. Carrots and peas in equal quantities; string beans and carrots; celery and turnips rutabaga and potato; tomato and onion, or tomato and okra; corn string beans, onions; beets and peas; blends of different greens.
