L Digger changes the hardest job in potato growing to almost a pleasure. It speeds up the harvest, does away with a lot of hired help, and cuts harvest costs so low that a good profit is assured.

It's a wonderful feeling to sit on the seat of this digger and see it root out every hill without cutting or bruising. You will like the way the adjustable apron shakes the potatoes free of vines, dirt, and stones. The ease of gathering the clean, trash-free rows of potatoes will surprise you. Users say it is easier to pick up behind a McCormick-Deering than any digger they have ever used. Faster gathering saves you money, too, because it reduces losses due to sunburn and exposure.
