These last few mornings we've found ice in pails and tubs left outside and we've heard several people complaining of frozen radiators on their cars. Every fall the crows gather in large flocks here at the lake and there is a great deal of fluttering about and a great deal of noise just like our big party conventions. Whether there is "much ado about nothing" as at the party conventions we don't know but they do see into arrive at some definite point, for after a few days of convening the majority of them rise in a body and start south. The few dissenters remain to guard the roosts during the winter and we, the interested on-lookers, crawl back in our shells and wait for the next "crow convention."

The McCormick-Deering Potato Digger

Rod-link diggers in 6-foot 2-horse; and 7-foot, 4-horse sizes; with shaker and vine turner, or extension elevator delivery. Also 6-foot 2-horse riddle-type diggers, with shaker and vine turner.

It Digs the Potatoes,

Shakes Dirt Off,

and Puts Them in Rows.

THE McCormick-Deering Potato Digger changes the hardest job in potato growing to almost a pleasure. It speeds up the harvest, does away with a lot of hired help, and cuts harvest costs so low that a good profit is assured.

It's a wonderful feeling to sit on the seat of this digger and see it root out every hill without cutting or bruising. You will like the way the adjustable apron shakes the potatoes free of vines, dirt, and stones. The ease of gathering the clean, trash-free rows of potatoes will surprise you. Users say it is easier to pick up behind a McCormick-Deering than any digger they have ever used. Faster gathering saves you money, too, because it reduces losses due to sunburn and exposure.
