THE PARADE OF ALPHABETS

Earl Monk has at last been able to bring to this section a new medium through which those letters—W-L-W, W-O-W, W-O-A—letters of mysterious fascination, passwords to American night's entertainment, take on a new meaning, for he has been able to secure the agency for the new Bremer-Tully radio. These letters and dozens of other stations march in quick procession from the new micro-balanced chassis of this new machine. The faintest whisper is so clearly reproduced on the Bremer Tully. It is a super-sensitive instrument; a good one—and Earl Monk sells it. Next week he will have an announcement. Watch for it.

STOCK FISH IN LAKE

One hundred and sixty cans of fish were placed in Harvey's Lake on Friday by employees of the State Game Commission's fish hatchery at Pleasant Mount, near Carbondale. The fish were taken to the lake in two of the hatchery's large Autocar trucks. Fish stocked were shiners, cat fish, perch and sunfish. With the exception of the shiners, all were of legal size. The cat fish measured from ten to twelve inches in length. The Pleasant Mount hatchery is the largest in the State and ships continually from the opening of the lakes and streams in the spring until ice covers them in the winter.

**Give Your Child
a Chance**

It isn't right to let a child toil under the handicap of defective eyesight. Poor eyes make backward children. They not only affect their work, but their nerves as well and health as well. Wisely, our educators do not consider glasses on children a "crime," knowing that the duller child may be one of the brightest with the help of properly fitted eyeglasses.
