**There are as many different kinds of tires as there are prices**

As many as 6 to 15 different types of tires will fit your rims—you could pay any one of the 6 to 15 different prices asked for them and get tire service.

You, however, may drive your car differently than the next fellow does. Maybe you drive it harder, faster—or maybe easier, slower. Perhaps you'll drive it thousands of miles farther—or thousands of miles less. You travel different roads, with different loads.

There is one type and size of tire, therefore, which is the most economical buy for you—for your particular needs. That's where our service is different. We help you to pick that tire. Often we save a customer money by pointing out where a low-price tire is all his driving will require.
