STRIFE FORGOTTEN, FRIENDSHIP MADE Inscribed on a brass plate over the fireplace in the visiting team's room in Davis Field House at Dartmouth College is the following inscription: "Strife forgotten, friendships made." At Princeton and at Cornell there are similar inscriptions which leave on the minds of opponent's the impression that the student bodies of these great schools are more interested in maintain- in regard to his hardware store. Earl ing the friendship of other colleges than in winning annual athletic combats. has already stocked up with various Athletics were first established in schools and colleges to afford an opportunity Christmas toys and novelties. Save for the physical development of the students. Later it was argued that carrier to town by buying your

and in every way tended to develop the minds of the players.

With these as the primary reasons for existing, school athletics have now grown to the point where their benefit to the student, the student body and "in sprucing up the tree." the school have often been questioned. Certainly jealousy, pettiness and unfair competition have never been advanced as reasons why high schoosl and colleges should maintain an elaborate and expensive system of athletics. To those who doubt the value of school athletics, the action of Dallas Borough's "L. A." is commencing to go home a representative at the recent meeting of local school heads to establish a Rural little earlier in the evening. While Basket Ball League leaves a still further question whether athletics are justinot a bad fellow, he seems to take fied in the local high school. The borough's representative refused to enter and enjoy passing the time of day, and league in which the team from Dallas township was entered. His action sometimes far into the night, in a followed a meeting of the borough student council when that body voted to good sociable chat with his fellow sever all athletic connections with the township. The action of the council men. was the direct result of hard feelings following a recent football game with the team from Dallas township.

Such action was unwarranted. It was the result of hasty and angry thinking on the part of a council whose action was stimulated by the disagreeable attitude of fans who witnessed the recent football game. There is still a question in the minds of many spectators as to just which football team played the hardest and roughest game on that occasion. And the student council should have waited until the community and the council itself cooled down before taking action. Nothing is to be gained by severing connections with the township. Much is to be lost. Certainly the faculty and the directors of the local schools will not allow the development of ill feelings between the borough and township just because a council made up of undeveloped child minds has said that "such shall be the case." Better to follow the leadership of Cornell and Princeton, where athletics mean something and adopt the slogan: "Strife forgotten, friendship made," than to allow further prejudices to grow up in this community. If athletics mean hard feelings and prejudices then discontinue athletics.

The great American question now seems to be: "When is the next installment due?'

Fatty Arbuckle's wife is suing him him for divorce, and as we see it radios this week for the Monk Hard- of Beaumont. The oddest to Horace that is about what a sensible woman would do.

# HEARD AROUND THE CORNER

# Some Fisherman

When it comes to fishing, and especially for pickerel, Hal Wagner of town seems to have the fever, and on Armistice Day, just past, he seems to have copped the prize when it comes to size, over his companions, Charlie Johnson of Beaumont and F. F. Morris of Dallas.

Some few weeks ago both Wagner and Johnson each caught a pickerel approximately twenty-nine inches long and considerable discussion followed as to 'who was who." But on Monday last Wagner caught one weighing three pounds and eleven ounces and showed a total length of twenty-six inches without stretching, which is sometimes done by these good friends who accompanied him on the trip. That, is not stretching the truth, but

## Up to the Minute

This fellow Earl Monk of Shavertown is sure right up to the minute athletics developed loyalty to the school and friendship with other schools Christmas toys from Monk and the difference will pay for those new tree trimmings that you are figuring on

# MANY GET KNIVES

So many persons have sent in new subscriptions and coupons for the new Lindsay bread knife which the Post is giving away free with every new subscription that we have been unable to send personal letters when we sent out the knives. We hope that everybody likes the knives because they are good ones and easily worth a dollar. If by chance any of the knives should prove unsatisfactory be sure to return them to us at once and we will send you a new knife. We welcome all of our new subscribers and we hope that you will like the Post. If you have any personals items or news you would like to see in the Post be sure to send it

Stone Mountain

The estimated volume of Stone mountin is 7,500,000,000 cubic feet. Since granite weighs from 160 to 170 pounds per cubic foot, this would be approximately equivalent to 600,000,-000 short tons.
