## Good Foods at Substantial Savings

(Personal)  
In times like these, when money isn't as plentiful as it might be, the old superstition that the best food must be high in price is wearing pretty thin. For now that women are thinking harder about getting their money's worth, more and more of them are wending their way to A&P stores. And once there, they simply can't believe that good food is expensive.

QUALITY and SAVING... are two things to consider when buying food... It's always a saving to buy good food, but to buy good food in the A&P way is always an added economy.
