FARM CALENDAR

WHEAT GOOD FOR SWINE

Ground or crushed wheat is an excellent feed for swine. It is 5 to 10 per cent higher in feeding value than corn. When coarsely ground or rolled, wheat may be self-fed. Finely ground wheat should be fed in slop, because when fed dry it becomes pasty in the hog's mouth.

STORE SURPLUS VEGETABLES

All available vegetables should be stored for winter use. Directions for storing, giving temperature, moisture, and entilation requirements, can be obtained from your county agent or from the Vegetable Gardening Extension Department, State College, Pa.

MAKE FILTERED CIDER

A very clear and immensely superior product for the market can be made by filtering cider. The equipment necessary can be made at home for a few dollars. Leaflet 46, an extension publication of the Pennsylvania State College, tells how. It is available at your county agent's office.

IMPROVE PASTURES NOW

Fall is the best time to begin pasture improvement. About one or one and one-half tons of lime to the acre should be applied first. This should be followed with about 400 pounds of superphosphate an acre any time before snow flies.
