**YOU NEED THESE life-saving advantages OF CONCRETE**

From your own experience you know that concrete is the safest road. Its even surface makes driving easier, reduces nervous strain and results in better car control. Its gritty texture improves traction and braking, resists skidding, wet or dry. Because of its flat "crown" drivers don't tend to ride the center of the road—passing is safer. Concrete makes night driving safer. Its light-grey surface re-

flects more light, helps you see better. Illuminates obstacles and pedestrians. Sharply defines the edges and helps you stay on the road. Highway officials are striving to reduce traffic accidents. Urge them to pave with concrete and secure for your community the safest as well as most economical pavement money can buy. You can benefit by your active interest as many others have done.
