One morning three days ago it was 30 below but there has been no really bad weather since around Christmas when we had a couple of mornings 50 below. "Your deer are some problem. I think they once had similar trouble near the Utah and Arizona line, in the Kaibab or Zion National Park district. The trouble was they killed about all the cougar and soon there were too many deer for the amount of feed and they degenerated, as you say. They increased the limit and let the cougar come back. Now they have both deer and cougar hunting.

"I was crazy about hunting in Pennsylvania once and I believe I would enjoy it now."
