Editorially Speaking:

THE BUSINESS MAN IN WONDERLAND

Curiosity killed the cat, but government apparently thrives on it.

Government's inquisitive tendency is a familiar matter to farmers and business men, who spend a substantial part of their time answering questions. But this year the public is going to become conscious of these matters, too, for the census taker will soon be ringing doorbells again.

The 1940 census will be the most comprehensive ever undertaken by any government. It is going to seek a lot of answers that, if they are sensibly interpreted, can be very helpful. On the other hand, among the 50 questions the American housewife will answer this time there will be found some to which pretty good answers already exist.

On a small scale, then, the average citizen is about to experience a phenomenon that the man who is trying to run a business, keep up production, find new jobs and earn a small profit runs into just about every day of the "working week"

In the past five years, duplication of the questions asked by government commissions and agencies has proved a sore point to many a company that is trying to get its work done. The curiosity of government has meant that employes have had to be delegated to the non-productive work of answering questionnaires; it has meant that the orderly processes of work have had to be slowed up while check-ups on it have been made; and it has meant that business must keep voluminous records that have no earthly use once they have satisfied the curiosity of the particular government agency or commission in question.

Of course, there is a valuable and necessary function to be performed by government in finding out answers to pertinent questions about business, about agriculture and about various other sections of the American economy. But the observer, observing multiplicity and duplication and, frequently, just plain chaos, can't help asking one short question on his own hook:

"Exactly how much of all this curiosity is necessary and how much represents nothing more than a love of asking questions?"

Something of the same wonderment may have existed in the mind of President Roosevelt last year when he declared that he was "concerned over the large number of statistical reports which Federal agencies are requiring from business and industry," and ordered an investigation. Of course, the investigation meant more questions, but this time the results were worth it. Here are some of the facts that came to light:

Individuals and business concerns in the United States made about 135,700,000 reports and returns to questionnaires sent out by administrative agencies of the Federal government. About 21 million returns of all kinds were filed for farms, making an average of approximately three returns for each farm in the country. A total of 60,000,000 returns were filed by industrial, commercial and financial enterprises, a yearly average of about 20 for each enterprise. And the average industrial questionnaire contained about 65 questions.

Supervisors Fail **To Acknowledge Bids To Meeting Councilmen Wait Two**

Vol. 50

Hours In Vain; Firemen **Had Requested Session**

After waiting two hours for some vord from Dallas Township supervisors, councilmen of Dallas Borough adjourned their meeting last Friday night without reaching any conclusion on the request of Dr. Henry M. Laing Fire Co. for financial assistance from the two communities.

Invitations to attend the conference were mailed to the three supervisors after Harry T. Ohlman, chairman of a committee from the volunteer fire company, had asked borough council to confer with the supervisors to discuss the possibility of sharing maintenance costs of the company, which has, since its found-ing 12 years ago, been financed by public subscription.

No acknowledgment of the invitations was received, but the councilmen met as planned. Three members were at the borough building and two more 'phoned and were ready to appear if the supervisors turned up. After waiting until 9:30 without any word, the councilmen adjourned.

The firemen, who work without pay, have never received an appropriation from either Dallas Borough or Dallas Township and have raised an amount estimated at \$20,-000 in the last 12 years to assure fire protection for residents of the two communities.

Rationed Food No Hardship Yet, **Britisher Says**

Post's Correspondent Finds His Half-Pound Of Butter Sufficient

By B. E. H. AMPS

EXCLUSIVE Ilford, England (By Mail [Censored])—The weather has commanded most attention recently because it has been much more severe than we have had for many years. We do not get the extreme cold Dallas has, but we had as much as 29 degrees of frost a week or so ago, and that was plenty cold enough But It's Exciting for us, for our houses are not equipped to meet the cold as yours are and our cold is a damper cold.

We are not allowed to give some, for hardly a piece of the icy blasts like a natural. newspaper copy comes in but

Topic No. 1! We had a story the other week about a bride who was held up by a snow-drift on her way to the wedding and had to be rescued by the bridegroom's brother. We had to eliminate all reference to the snow, and it half-killed the story. Chalk up another black mark to the war!

Rationing No Evil Yet

Rationing, of course, affects us all, but it can scarcely be said that we are feeling it very much as yet. And that is the truth, and not propaganda, though it might look like

Trip Through Drifts To Recover Frozen Body

It was shock and exposure, following a mule kick which fractured his right leg, which caused the lonely death of John Bickman, 51, in an isolated lumber camp 11 miles beyond Noxen, after last week's blizzard, according to R. W. Greenwood of Tunkhannock, Wyoming County coroner, who completed a post mortem early yesterday morning.

A weary posse of State troopers, WPA workers and lumbermen reached Noxen with Bickman's body about 9:30 Wednesday night after a

storm of national proportions was raging this week.

On one hand the parents of the child and Benjamin Howells, Nanticoke newspaper publisher who prints the prognostications of "The Little Prophet", defended claims that Faith can foresee future events.

Opposing such claims was a handful of investigators, like Dr. Joseph Rhine of Duke University and U. L. Ghilini of Beverly Hills, Cal., who seemed to be agreed that the child is normal.

It all began when Mrs. Harry Harding, Faith's mother, took the child to New York, where she was guest of honor at a salon conducted by a group of people who are interested in psychic phenomena, including Mrs. Arthur G. Learned, at whose Oriental Temple at Brucehaven, Stamford, Conn., Faith Hope Charity was christened last August.

Backs Challenge With \$10,000

The story appealed to New York newspapers, which carried long articles and photographs of the youngster. After Mrs. Harding came home she was besieged with requests for information from other Eastern news-Within a few days Faith's predictions were papers. a chief source of argument among physic researchers.

Joseph Dunninger, famed magician and chairman of Universal Council of Psychic Research, minithe mized the claims made for the child and offered to pay \$10,000 if Faith would disclose a three-letter word which Dunninger would write on a slip of paper and seal in an envelope.

Charging that the Trucksville child is being sponsored by The Psychic Observer of Lily Dale, N. Y., which has frequently used articles about Faith, Dunninger said he doesn't believe in any kind of prophecies. "She

Storm Rages About 'Wonder Child's' Head *

Around the curly head of four-year-old Faith Hope | is a cute little girl," he said, "and at one time they tried to make a dancer out of her. Now she's being made into a miracle child."

Protesting against the publicity and obviously hurt by the attacks, Mrs. Harding declined to accept Dunninger's challenge, explaining that she has always avoided such sensational offers and has never sought money for Faith's services.

Dr. Rhine, who has done considerable research into extra-sensory perception and who, about two years ago, received a regular record of Faith's forecasts for study, said during a long distance telephone call from Durham, N. C., that none of the claims made to him for the child could be substantiated scientifically. The prophecies were in such general terms, he said, as to be of no consequence.

"Spook Detective" Quizzes Faith

Dr. Ghilini, who is publicized as a "spook detective", came to Trucksville this week and said he vis-ited with the child. "The only weird thing I could find about Faith is her diet," he said. "It seems to consist of milk, wheatcakes and soft drinks. When I asked her, 'Have you a message for me?' her eyes lighted up and she said, 'I'll take a soda.'"

In his daily newspaper, Mr. Howells defended Faith staunchily. "Fame of 'The Little Prophet,'" he wrote, continues to spread, with many hopeful of securing some advantage or making some gain through the little girl's prophecies. Personal gain or commercial-ization of the God given talents of Faith are definitely prohibited, though.

Coincident with the controversy was the announcement that a group of the child's patrons in New York City are preparing to publish many of her predictions in book form.
