## A Practical Contribution to NATIONAL DEFENCE

War abroad is making vast demands on commerce and industry throughout our land. All-out effort for Democracy means all-out cooperation with our national government in supplying the needs of industry as this nation's arsenal of democracy grows. Coal must reach its goal on time in order that the wheels may keep rolling. You can do your part in this national emergency by ordering your supply now. Early delivery will ease the production burden later on when factories of the country are hitting the peak of their capacity.

Let's Help ...
