### SECOND THOUGHTS

By javie aiche

Addle-pated addresses on apathy, pusillanimous appeals on patriotism; these, for the sake of the public intelligence, ought to be halted. The suggestion that they might be censored would be utterly silly, because there are more people who know how to win the war, and want to tell others about it, than there are soldiers in the present armies of the United Nations.

Here's a pip culled from Wednesday's Record. It was uttered by a patrioteer whose only contribution to the war history of America is his murder of the King's English. Talking on the subject of indifference he said: "We are too much like the hero of 'The Legend of Sleepy Hol-" You and I know that the hero of the Washington Irving classic wasn't indifferent at all. He wanted the girl; the schoolmaster was in his way; he got rid of the schoolmaster, ingloriously but fin-

What the speaker had in mind, of course, was that other story by Washington Irving, simply named after its delightfully worthless chief character, Rip Van Winkle. But, should men who profess to guidance of the people carry such ignorance into the public halls, churches and schoolrooms? If we stand for that, there you have indifference indeed.

Another patrioteer, quoted in the amazing Times-Leader-News, proudly declared for all and sundry to hear: "We have struck our colors. We are prepared to meet the foe." Once again you and I know that if we ever meet the foe after we have 'struck our colors" it will be to arrange the terms of our surrender.

I suppose all the misinformation, miscalculation and misappropriation of motives can be charged against the one great sin of every democracy-lost motion. Some very sincere persons get all het up about a war, and it is not surprising that at a recent meeting of "best minds" there was serious contemplation of using the anthracite mines for airraid shelters. Not considering, of course, that getting thousands of persons into the mines in an emergency would be comparable only to the gargantuan task of getting them out in the event that only one bomb landed at the base of the ventilation system, commonly known as the

There's been a lot more damphoolishness, such as preparing against parachute troops. What would they want here? We haven't a munition plant worthy of the name and if our anthracite mines were captured or destroyed the fuel they produce would be replaced in no time. Why do you suppose they're opening pipe lines, and why the broad violation of the health laws by blanket permission to the railroads to burn bituminous coal while making all their revenue out of the hard variety? Find out where eighty-seven thousand Luzerne Countyites have munity life is being mantained on I am most grateful. moved. There, if anywhere, you need invasion guards.

There ought to be a clearing lege students. house, for schemes, for speeches, for general intelligence. There are in ward, all that it means, but par-Those men could be used, at least as guides to the ignorant who are trying to tell all about something of which their knowledge is exactly

And there ought to be change from the wholly nefarious accusation that you and I and the rest of us are apathetic about this conflict. The fact is: we have it so much on our minds that we are obfuscated in our desires and confused in our designs. How in hell can you forget something that forbids you to purchase the things you need and for what you can't get along with-

P. S.: Did you ever compute, against the once verdant and agricultural Luzerne County, what King Coal has cost us in destroyed communities, upset economies, caves blonde. and abandonments? And what the absentee landlords left us as a monright, then; now who do you sup- stuck) pose is supporting the miners and the year ranges between eight and ten dollars a week? You are, in things). taxes paid to support the Department of Public Assistance. Anthracite, so much considered an asset that other industries were kept out to avoid competition for labor, has become a liability. You couldn't even give it to the Indians.

#### THE LOW DOWN FROM HICKORY GROVE

We sure been hearing plenty about Morale. Everybody that bobs up with a new idea or new scheme, and edges in onto Uncle Samuel's pay roll, says it is for Morale. How we have got along so far without experts on morale, is hard to savvy. And Mr. George Washington, how he ever got up the courage to cross the Delaware without the help of a psychologist, or a toe-dancer, or a poet, to bolster him, is also a big question.

Today you can hardly turn around without trampling on a Govt. uplifter of some stripe. It is getting tougher and tougher to find a place to park, with E-cars at every curb.

But when all is said and done, maybe some good will come from it. If a toedancer can make Congress show its teeth, even just a little, versus being docile, then I guess it is money well spent.

Yours with the low down, JO SERRA

#### What Not To Do In Case Of An Air Raid

1. As soon as the bombs start like hell)

a. Wear track shoes if possible. If the people in front of you are slow, you won't have any trouble stepping over them.

2. Take advantage of opportunities afforded you when air raid copy of the Post makes you pay through the nose sirens sound the warning of attack, for example:

a. If in a bakery, grab some pie or cake, etc. b. If in a tavern, grab a few

beers c. If in a movie or taxi, grab a

3. If you find an unexploded ument to their Moloch greed? All it like hell. (Maybe the firing pin is lived outside our window this sum-If that doesn't work, heave it in

LINCOLN: His Life in Photographs by Stefan Lorant. Duell, Sloan & Pearce, Inc. \$3.00. Reviewed by Diane B. Bryan

Today with our nation at war again, everyone recalls our struggles in the past. They recall the great battles, the losses and the victories, and the heroes. One of our greatest battles was one in which only we ourselves took part: the Civil War. The greatest and most famous hero of that day was Lorant has compiled a biography called, Lincoln: His Life in Photo-

#### THE SENTIMENTAL SIDE By EDITH BLEZ

It was February 9 when the alarm went off! I didn't know it was February 9 at the time but for your information it was the morning of February 9, in the year 1942. The alarm went off and I awakened with an unusual start! Wht had happened? It wasn't time to get up. It was still dark. The alarm wasn't in the habit of going off before there was at least

a streak of light in the sky. There wasn't even a suggestion of daylight! What was this? A trick of some sort? Had something happened to the clock? Who had wakened us up in the middle of the night?

The street lights were still on. Why had that alarm gone off? Were we going somewhere- Were we go-Going into Clarence Elston's house ing to catch a train? Was it sumat Huntsville requires running the mer time? Could we be going on a blockade of a pair of gentle, harm- picnic or something? Had we comless, yet, oh, so ferocious, geese. pletely forgotten something we had many a honk and hiss. They stick were we doing up in the middle of out their long snaky necks and the night? There was something

much louder than a watch dog. You fic moving up the Pike for the midtake your electric eye system, I'll dle of the night. The traffic seemed to be all going one way. Where were Then they haste to the attack. all the machines going at this time No Stuka ever bore down on a of the night? pinch. His honk is worse than his stairs in the dark-from somewhere came a flash! "You darned fool this When we raised our 15 it was "us is the first day of War Saving time!"

Undulant Fever (Brucellosis) is an infectious disease found in various of the disease are cattle, goats and hogs. It is transmitted to man, secthrough abrasions of the skin has packers and dairy workers. The organisms of undulant fever are found in the blood, urine and stools of infected animals and in human carriers. The ingestion of liver and sausage is the most frequent source of meat infection. Drinking water

carry the infection to man. Undulant fever causes abortion in animals. In acute cases in human beings, it is characterized by chills, fever, sweats, headaches, backache weakness, muscular pains, joint pains and loss of weight. In many cases the course of the disease is months or years. It occurs principally during the summer. The onset is gradual and the incubation is in males and in early adult and middle life. Diagnosis is completely established only by laboratory tests. These tests are the blood serum agglutination test, the skin test and the cultivation and identification of the organism.

The disease is widespread in the United States and is on the increase. Cases have been reported from every state. It is endemic in Europe, Asia, Africa, South America and the West Indies. Testing, segregating and disposing of infected animals is necessary to control the disease. Human carriers should not be permitted to handle food. Pasteurization of milk destroys the organisms. Butter and cheese made from infected milk is dangerous. Hog meats should be well cooked, particularly liver and sausages. The immediate disinfection of wounds inflicted while handling possible infected stock is necessary. Human carriers should be kept under control until free from the disease.

We thought we knew a lot about beginning by the author, it still is ested them. They were indifferent to geese, but the blow fell when we
