Out of a foxhole on to the dole— is this what you want for YOUR boy?

NO! And it isn't what he wants, either. Is this what he's fighting for?

Yet what else can you or he hope for under the present administration that fears peace, a fear instilled by eight years of failure to make a single job, though it spent billions without hindrance on its crack-pot, phony "pump priming" theories?

What else can you expect of an administration that created class consciousness, that has set friend against friend—an evil that never before existed in America?

This is the administration that has had unbridled power—vested in one man whose very whims he makes law under the thin guise of wartime economic necessity.

Yet, after eight years of such arrogant power, ten millions of people remained jobless. It took a war to provide jobs. Must we have war to make jobs? Maintain jobs?

No! A sane government, a government that cooperates with industry, labor and capital, will make this the land of sound prosperity... the land to which YOUR boy can return knowing he will partake of that prosperity and security under free government.

If you want that kind of government... if you want your boy to enjoy the just fruits of his gallant sacrifices
