**Chopping Sheaf Oats**

Oat hay cut in the milk stage, well cured, chopped and stored, makes a very satisfactory feed for milk or meat production. Runs 4.5 to 6% digestible protein.

For sure profits, use a Letz Separator Mill to chop and store all roughage crops.

Letz is the only mill that does ALL these money-making jobs:  
Chops, stores any hay  
Chops, stores sheaf oats  
Chops and stores fodder  
Separates beans and corn  
Makes mixed feed  
Grinds grain uniformly  
Makes molasses hay-silage  
Cuts better ensilage

*Thomas A. Edison*  
1847 Centennial 1947

Today, as we celebrate the 100th birthday of Thomas A. Edison, we pause to pay homage to the creative genius of this great man who has contributed so much to make living easier and more enjoyable in every way.

While we think of Edison first in terms of the electric light, let us also not forget that to him we owe the phonograph, motion picture, radio and many other developments in electronics, electro-plating and other industrial improvements.
