

FARM TOPICS

Timely Reminders From The Pennsylvania State College School of Agriculture

Arrange Farm Shop—Early spring is a good time to get into the farm shop to put it in order. Hammers and axes should not only be kept in condition as aids to good workmanship, but also kept in their place in the interest of safety.

Look After Calves—Since it is impossible to correct mistakes that

were made when the cows were calves, proper calf feeding and management should receive all the attention they deserve.

Get Sawlogs To Market—Sawlogs cut during the late winter and early spring should be marketed no later than three or four months after cutting. Longer delays may result in logs checking badly, causing poor lumber.

Home Freezer Units—Home freezer units large enough to fit farm family needs average five to seven cubic feet of storage space per person. A cubic foot holds about 30 to 35 pounds of food.

Bigger 4-H Enrollment—On the

basis of preliminary reports, the 1947 4-H enrollment in Pennsylvania should go substantially above the mark for 1946.

4,000 Demonstrations—Extension erosion control demonstrations in the State now exceed 4,000, says F. G. Bamer, Penn State extension agronomist.

Thirsty Plants—Azaleas growing in the home require large amounts of water.

Good Construction Pays—The extra value and effort which went into well-constructed Pennsylvania farm buildings paid off during recent heavy snows and windstorms. Such buildings generally came through in good shape as contrasted with those of poor construction, many of which were reported damaged from

the stress of wind or weight of snow.

Dairy Records Help—In breeding up a herd for better production, dairy herd improvement association records are an invaluable help for checking on performance of individual animals. Herd tests or private records also can be of value.

Baby Beef Profits—Farm boys and girls, on the average, earned attractive financial rewards from 4-H Baby Beef projects in 1946, and Allen L. Baker, State club leader of Pennsylvania State College, says "what is of equal importance, they learned proper feeding and management of beef cattle."

Annual ABC Meeting—Rules and regulations for guarding breed purity was one of the topics discussed at the recent annual meeting of the Pennsylvania Association of Artificial Breeding Co-operatives at Pennsylvania State College.

Get Lambs To Market—Since the first lambs to reach market may bring the season's best prices, W. B. Connell, Penn State extension livestock specialist, reminds to get the lambs to market weight soon as possible.

Clean-up On Borers—Since corn borer moths can fly for miles, clean-ups of their over-winter shelters, such as cornstalks, should be organized by whole communities.

LEGAL

Notice is hereby given that Martin A. Brennan of Duryea Borough, Luzerne County, Pennsylvania, Guardian of Mary E. Kennedy, a weak-minded person, has filed in the Office of the Luzerne County Prothonotary his first and final account to No. 1014 October Term, 1944, and that the same will be presented to the Court for audit and confirmation on the 21st day of April, 1947, at ten o'clock A. M., and that unless cause be shown to the contrary the same will be confirmed.

PATRICK J. FLANNERY, Attorney

OUR DEMOCRACY

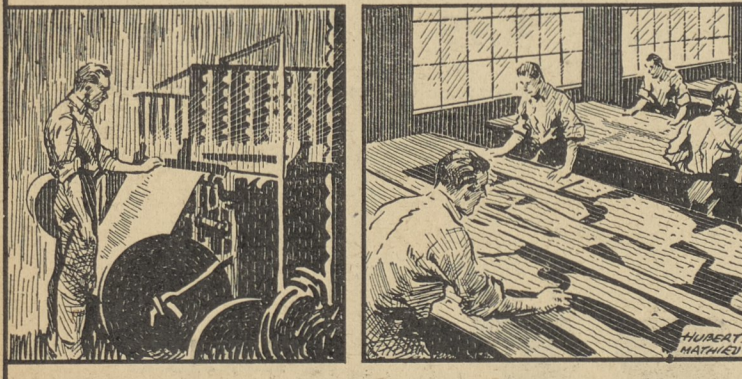

by Mat

HOMESPUN

IN THE EARLY DAYS OF AMERICA, WHEN THE FAMILY HAD TO PRODUCE ALMOST EVERYTHING IT USED, CLOTHING THE FAMILY WAS ONE OF THE MAJOR TASKS.

—IT INVOLVED CARDING AND SPINNING, DYEING AND WEAVING AND, FINALLY, THE FASHIONING AND STITCHING OF THE GARMENTS—ALL DONE BY HAND.

THERE IS PROBABLY NO MORE STRIKING EXAMPLE OF AMERICA'S ENERGIES AND GENIUS IN PRODUCTION AND DISTRIBUTION THAN IN THE TRANSITION FROM "HOMESPUN" TO "STORE" CLOTHES. TODAY, CLOTHING IS ON A MASS PRODUCTION BASIS, WITH STYLE AND VALUES CONVENIENTLY AVAILABLE TO ALL FAMILIES THROUGHOUT THE LAND.
