

### FARM TOPICS

Timely Reminders From The Pennsylvania State College School of Agriculture

**Budgets Help Control Costs**—Draw up a farm-and-home budget and then adhere to it to help control of farm costs. Long range plans also help.

**Fill Concrete Blocks**—Filling concrete blocks with sifted cinders in new construction will help keep the structure warmer and drier.

**Young Cows Excel**—Cows pro-

duced from artificial breeding, and now in production, are doing better than expected, reports Joe S. Taylor, dairy extension specialist of the Pennsylvania State College. One dairyman reports that his 2-year-old cows from artificial breeding are producing more milk than their mature dams. In 1946, 88,000 cows owned by 14,000 Pennsylvania dairymen were bred artificially.

**Plan Poultry Pasture**—Ladino clover pasture, excellent for poultry, can be started this spring by seeding on winter grain or with oats or spring barley, or with ryegrass as a nurse crop.

**Sods Improve Orchards**—Early

spring disking of permanent sods in orchards will ease fertilizer requirements by liberating plant food through decomposition of the vegetable matter.

**Cheaper Than Bulls**—The largest Pennsylvania dairy herd using artificial breeding breeds all of its 300 cows that way. The owner says it is cheaper than keeping bulls.
